Bienvenidos

AMERICAS 2023

*D*iving In... To the Latest Science and Industry!
We are excited to plunge into the international world of dermatology, plastic surgery, and aging science with the upcoming methods and research of the southern hemisphere!

This year brings a world of specialty treatments to tailor and refine your practicing skillset. The program gathers over 100 scientifically curated sessions from some of the best experts to expand the scope of current methods amidst regional trends and new science.

We aim to provide a relevant technical program that prioritizes safety first, so treatment and patient successes become the new standard. To do so, we blend the study of established methods and upcoming research to refine clinical and cosmetic treatments to the highest potential.

Take time to read through some of our top sessions and modules, as well as our outstanding selection of exhibiting companies! IMCAS Americas offers the perfect place to develop your clinics and businesses, featuring new products and a wealth of exchange opportunities among fellow physicians and partners.

We are ready for another extraordinary event, to capture the essence of inspiration and scientific discovery! We extend a warm welcome to all attendees for this magnificent 5th edition and look forward to all the great work to come.

*iS*umergiéndonos... en lo último de la ciencia y de la industria!
Estamos emocionados de adentrarnos en el mundo internacional de la dermatología, la cirugía plástica y la ciencia del envejecimiento con todos los métodos y la investigación que se avecinan en el hemisferio sur.

Este año trae un mundo de tratamientos especializados para adaptar y perfeccionar tus habilidades prácticas. El programa reúne más de 100 sesiones científicamente seleccionadas de algunos de los mejores expertos para ampliar el alcance de los métodos actuales en medio de las tendencias regionales y la nueva ciencia.

Nuestro objetivo es proporcionar un programa técnico relevante que priorice la seguridad, de modo que el tratamiento y el éxito del paciente sean un nuevo estándar. Para hacerlo, combinamos el estudio de los métodos establecidos y la investigación en curso para perfeccionar los tratamientos clínicos y cosméticos al máximo potencial.

Tomese el tiempo para leer algunas de nuestras mejores sesiones y módulos, así como nuestra destacada selección de empresas expositoras. IMCAS Américas ofrece el lugar perfecto para desarrollar tus clínicas y negocios, con nuevos productos y una gran cantidad de oportunidades de intercambio entre colegas médicos y socios.

Estamos listos para otro evento extraordinario, para capturar la esencia de la inspiración y el descubrimiento científico. Damos una cálida bienvenida a todos los asistentes para esta magnífica quinta edición y esperamos con ansias todo el gran trabajo por venir.

Dive deep into learning and immerse yourself in the regional treatment methods of the Americas! Our scientific program merges beauty, science, and technical discovery to study the latest patient trends and procedure techniques arising in clinical practice. The following pages include the leading topics and essential sessions for this year's event.

New Depths of Discovery: Your Scientific Highlights for IMCAS Americas 2023

Nuevas profundidades
del descubrimiento :
aspectos destacados científicos
para IMCAS Americas 2023

Anatomy on Cadaver

Anatomía en cadáver

Delve into key anatomical areas in procedure through step-by-step dissections alongside live patient injections from upper face to neck as well the hands. This edition offers a unique format with intra-procedural and post-procedural ultrasonography mapping, alongside live demonstrations, to explore the procedural advantages of these game-changing devices.

Clinical Dermatology

Dermatología clínica

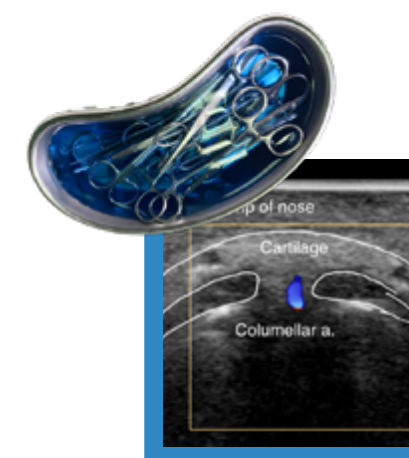

Take on the most treated skin diseases in LATAM with innovative tools and methods from the region's top specialists. Debate on diagnosis and treatment options when managing active acne, hyperpigmentation, melasma, scars, and hair disorders, and uncover how holistic approaches can offer optimal treatment outcomes.

Plastic Surgery

Cirugía plástica

Dive into deep surgical sessions that cover technical procedure from head to toe. Explore specific techniques when conducting facial rejuvenation for upper, mid, lower face and nose, as well as methods when approaching the periorbital region. Plus, study techniques for breast optimization, tummy tuck, and 360° body definition.

Regenerative medicine

Medicina regenerativa

Compare current treatments with the latest regenerative science to know when, where, and how to include breakthrough methods in your practice. Are they fact, fiction, or a fountain of youth? Discover the latest evidence-based research and upcoming cell therapies among exosomes, PRP, cellular matrix, and nonfat.

Combined treatments

Tratamientos combinados

The best aesthetic results require full process and full body care. Study the science behind expert treatments that blend injectables, biostimulators, threads, HA, collagen, US tech, and micro needling. Understand ingredients, dosages, and new techniques to restore facial glow and offer the secrets of youth for full-body patient transformations.

Ultrasound

Ultrasonido

Explore the new capabilities and applications of ultrasound, the upcoming treatment tool for optimizing results and patient outcomes. This year brings you the latest training, from device selection through surgical and nonsurgical applications, and features expert practices for fillers, complication management, and visualizing anatomy.

Sessions to catch

Sesiones imperdibles

THURSDAY

Scars, Fast and Furious Acne & Scars

S009 & S010 ROOM 2 AT 5:00 PM

With 10-minute bullet lectures and Q&A discussions, these sessions are packed with engaging methods that keep you on the edge of your seat!

Discover more

Browse the full program on IMCAS Live App

FRIDAY

Combined Treatments Facial glow

S043 ROOM 3 AT 9:30 AM

EBD, cosmeceuticals, and exosomes... see how to achieve radiant results and turn back the clock using facial treatments.

Anatomy on Cadaver Decollete & Hands

S029 ROOM 1 AT 12:00 PM

Hands hold the truth of a every ageless look. Discover the top injection methods for hand rejuvenation with in-depth anatomical demonstrations.

Biostimulation The Mother of Nature

S055 ROOM 4 AT 3:00 PM

Biostimulators are the new driving force in combined treatments. See how they are being used to make current methods more efficient.

SATURDAY

Experts on the Grill for Derm & Surgery Ask Your Questions

S085 & S086 ROOM 3 AT 4:00 & 5:00 PM

Got questions? Join our experts in round table sessions to discuss your most challenging surgery and dermatology questions.

Wellness & Hormones Healthy Aging Strategy

S078 ROOM 2 AT 5:00 PM

Health is the key to enhancing youth and beauty. Explore the upcoming methods in holistic medicine and the ways they influence aesthetic outcomes.

IMCAS EXPERIENCE LABS

Dive into learning by doing

Sumérgete en el aprendizaje ¡manos a la obra!

This year, the new IMCAS Experience Labs offer concentrated live demonstrations and hands-on training so you can truly master injection and ultrasonography! Available Friday afternoon, these exclusive lab options elevate your congress badge to include an exclusive hour of hands-on training and one-to-one demonstrations. [Find out more information on page 82 and register at the Welcome Desk on Level 1.](#)

Ultrasonography: Hands-on Training Ultrasonografía: Entrenamiento Práctico

Attain proficiency in operating ultrasonography devices, identify key anatomical structures in target patient areas, and interpret ultrasound images for effective treatment planning and delivery.

Live Demo Injection Labs Laboratorios de Inyección en Vivo

Observe and analyze expert techniques up close! Limited, 15-person labs follow the full injection procedure with a performing expert from product selection through safe procedural applications.

The NextGen Module

SESSIONS S087 TO S089 & S092 TO S094

The **Next Generation sessions** are dedicated to young physicians and offer an excellent opportunity to learn from and interact with some of the top experts in the field! The module is designed to include scientific sessions tailored in assisting early clinical work, as well the **NextGen Awards** to recognize the leading research of brilliant young physicians.

It's an unbeatable experience of intergenerational practice to both support and learn from and for our future generations. Join the module **all-day Saturday in Room 4.**

IMCAS Surgery
ACCESS RESTRICTED TO BOARD-CERTIFIED PLASTIC SURGEONS, FACIAL PLASTIC SURGEONS AND OCULOPLASTIC SURGEONS MAY ACCESS SESSIONS ON THE FACE ONLY.

We'll explain how it works

In an effort to adhere to our mission of providing objective medical sessions, IMCAS works diligently to maintain a strict distinction between the scientific and commercial content. To achieve this, the IMCAS program is largely divided into non-sponsored and sponsored sessions.

SCIENTIFIC SESSIONS NON-SPONSORED

Our scientific sessions provide educational material that is entirely based on medical research. The contents of non-sponsored sessions are built by the IMCAS Scientific Committee and partnering academic societies, both ensuring that there are no biases or influences from commercial bodies.

SCIENTIFIC SESSIONS UNDER AN UNRESTRICTED EDUCATIONAL GRANTS NON-SPONSORED

Educational grants are financial contributions that IMCAS receives from partnering institutions and medical organizations. These donations are non-sponsored and provide support for the educational and impartial research presented in our congress sessions.

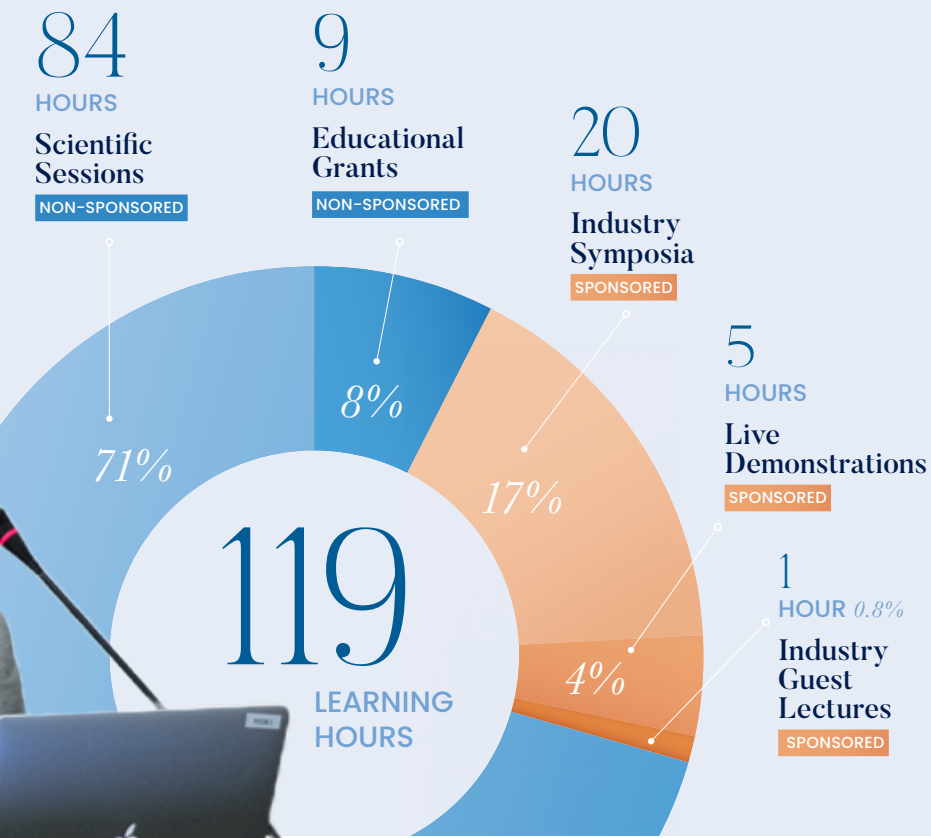

CONTRIBUTING LECTURES NON-SPONSORED

Contributing lectures consist of fellow experts and professionals within our specialty fields who wish to present their current, scientific work to the greater aesthetic community. Each lecturer acts as an individual representative of their work and are selected by the IMCAS Scientific Board based on the submission of their abstract.

SPONSORED SESSIONS SPONSORED

Sponsored sessions are congress partnerships that allow individual companies to present their lectures and promote their products. These sessions receive financial compensation and are not endorsed by IMCAS. All sponsored sessions are clearly indicated in the scientific program per the rules and regulations of the IMCAS COI policy.

IMCAS AMERICAS 2023

The IMCAS objective

El objetivo de IMCAS

Prioritizing a safe, accredited, and scientific education
Priorizando una educación segura, acreditada y científica

IMCAS CONFLICT OF INTEREST (COI) POLICY POLÍTICA DE IMCAS SOBRE CONFLICTOS DE INTERESES (COI)

To ensure the integrity and quality of our congresses, IMCAS distinguishes all instructional (or scientific) courses from any industry support.

All scientific lectures are developed through and based on impartial scientific evidence with unbiased, professional interpretation. The program also works to present a fair representation of all specialties concerned in the field of aesthetics, including both medical aesthetics (such as the fields of plastic surgery and dermatology) and non-medical aesthetics (such as cosmeceuticals).

Each area of the IMCAS scientific program requires disclosure of any potential influence within the session and speaker information presented in the IMCAS program. All disclosure information is publicly available both during speaker presentations and on our website.

Para asegurar la integridad y calidad de nuestros congresos, IMCAS diferencia todos los cursos instructivos (o científicos) de cualquier apoyo de la industria a nuestros congresos.

Todas las conferencias científicas se desarrollan y se basan en pruebas científicas con una interpretación imparcial y profesional. El programa también trabaja para presentar una representación justa de todas las especialidades implicadas en el campo de la estética, incluyendo tanto la estética médica (tanto el campo de la cirugía plástica y la dermatología) como la estética no médica (como los cosmeceúticos).

Cada área del programa científico de IMCAS requiere de una declaración oficial de cualquier influencia potencial de la industria dentro de la sesión como también requiere la información del ponente que presenta dentro del programa de IMCAS. Toda la información declarada está a disposición del público tanto durante las presentaciones de cada orador como en nuestro sitio web.

IMCAS AMERICAS 2023 IS COMPLIANT UNDER ETHICAL MEDTECH IMCAS AMERICAS 2023 CUMPLE CON LAS NORMAS DE ETHICAL MEDTECH

The European Medtech Code of Ethical Business Practice maintains a strict policy to verify the reputation and credibility of all educational material provided within the medical aesthetics industry. The policy outlines relationships with Healthcare Professionals (HCPs) and Healthcare Organisations (HCOs) to enforce transparency for any bias present in educational medical information and includes all arrangements with consultants, researchers, and research institutions for any financial reparations that may be provided.

El Código Europeo Medtech de Prácticas Comerciales Éticas mantiene una política estricta para verificar la reputación y credibilidad del material educativo proporcionado dentro de la industria de la estética médica. La política describe las relaciones con los profesionales de la salud (HCP) y las organizaciones sanitarias (HCO) para hacer cumplir la transparencia de cualquier sesgo presente en la información médica educativa e incluye todos los acuerdos con consultores, investigadores e instituciones de investigación y cualquier reparación financiera que se pueda proporcionar.

CERTIFICATE OF ATTENDANCE CERTIFICADO DE PARTICIPACIÓN

1	At the end of the conference, head to our website.	Al final de la conferencia, visite nuestro sitio web.
2	Log in to your IMCAS Account and complete the evaluation by August 22 nd .	Acceda a su cuenta IMCAS y complete allí la evaluación antes del 22 de Agosto.
3	Following its submission, your Certificate of Attendance will be available for download through your account.	Tras el envío de su evaluación, su Certificado de Participación quedará disponible para su descarga a través de su cuenta.

If you have any questions about obtaining your certificate, visit the Welcome Desk or send an inquiry to contact@imcas.com.

Si tiene alguna pregunta sobre la obtención de su certificado, visite la mesa de registro o envíe una consulta a contact@imcas.com.

IMCAS Americas 2023 is compliant under Ethical Medtech

DON'T HAVE AN IMCAS ACCOUNT? NO TIENE CUENTA IMCAS?

If you have never logged into the IMCAS website, you can activate your account with the information found on your badge. Begin the activation with your badge information, and then follow the prompt to enter your chosen email and password. Your account activation will be finalized upon confirming the activation through the user email provided.

Si nunca ha iniciado sesión en el sitio web del IMCAS, puede activar su cuenta con la información que figura en su pase del congreso. Inicie la activación con la información encontrada en su pase y, a continuación, siga las instrucciones para introducir la dirección de correo electrónico y la contraseña que haya elegido. La activación de su cuenta se dará por finalizada una vez confirmada la activación a través del correo electrónico de usuario proporcionado.

Anatomist's Vision: Safe Treatment & Aesthetic Education Systems

INSIGHTS FROM **PROF. DR. SEBASTIAN COTOFANA**

Prof. Dr. Sebastian Cotozana is a renowned anatomist in the world of regenerative medicine. He holds two academic Ph.D.'s in Medical Science (Ludwig-Maximilians-University, Munich, Germany) and Anatomy (Paracelsus Medical University, Salzburg, Austria) and is a trained trauma surgeon, licensed in Germany. He holds Honorary Professor titles at Queen Mary University of London, London, UK, at Pirogov University, Moscow, Russia, and at the Department of Plastic and Reconstructive Surgery, Guangdong Second Provincial General Hospital, China. He is also Visiting Professor at the University of Belgrade, Belgrade, Serbia and member of the Department of Dermatology, Erasmus Medical Center, Rotterdam, the Netherlands. He offers his thoughts on our IMCAS America's topics, the importance of safe practice, and the future of aesthetic educational systems.

As a highlight for the IMCAS Americas ANATOMY ON CADAVER WORKSHOP, what are your thoughts on the importance of hand injection?

Pr. SC: I love the hands. Not only because I've published in that field, but I also think that hands are important, important to be treated and important to be understood. So this year, we will of course cover the face, and also the neck and hands.

If hands are not treated accordingly, and age-related changes of the hands are not addressed, they can unmask all the efforts that have been done to the face. Treatments need to focus on the face, neck, and the hands equally. If you focus just on one area and disregard all the other areas, then you can see how much was done in one area and how much the other areas were neglected. So, treatment should be holistic and cover all areas of the human body.

In the light of anatomy and procedural safety, how would you recommend physicians proceed when testing new toxins, dosages, or new points of injection?

Pr. SC: The first point is to always follow the FDA—or other national regulatory institutions'—approved dosages and injection patterns. Because this is how studies were initially designed to be used during aesthetic treatments. There was a recent study, which shows that most adverse events happen when products are being used off label.

Once safety and knowledge with the respective product is obtained, on the own responsibility of the injector, treatment options can be adjusted and customized in certain instances. However, it has to be kept in mind that deviating from the on-label use of a product is done at the treatment providers' own risk.

Do you have any thoughts on modern US technology and how it can be used within procedures?

Pr. SC: I think ultrasound is a great tool and it should be a standard of care for every physician in the minimally invasive field. A lot of physicians stay away from using ultrasound because they don't know how to read the images, the device might be expensive, and it's time consuming to use. With a busy practice, adding ultrasound can mean losing 1 to 3 patients per day, so it's understandable why some decide not to use it. But in the long-term, ultrasound devices, and the understanding and applications of ultrasound, are improving treatment. It's a steep but quick learning curve.

In addition, ultrasound can also be used as a verification of one's own injection technique. Like, you test yourself and you verify yourself to know, did I really treat the muscle I wanted to or the layer that I needed to achieve. So, it goes hand in hand with treatments, and increasing its clinical use will increase treatment safety overall.

“The first maxim of all treatment should always be safety.”

What is your take on understanding anti-aging through a lens of holistic medicine? Do you believe treatment extends beyond the clinic and plays a role in overall wellness?

Pr. SC: Oh, totally. The external appearance of our body and our face is only one part in human well-being. There are many, many aspects of health and if you follow the WHO definition they even acknowledge, “health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.”

As someone who has been in research and physician education for some time now, what is your opinion on aesthetics and ethics, particularly in the realm of accreditation and access to quality educational information?

Pr. SC: What I see now, when it comes to education and when it comes to understanding and accepting science, is a change in the way that science is presented and the way that research and knowledge is generated. Because normally in the medical field, research, science, and knowledge are only accepted following the specific methods through which they are generated. They are completely based on evidence. However, in the aesthetic fields, unfortunately there are many procedural areas that are not evidence-based but eminence-based; meaning knowledge is often gathered and obtained through personal opinions (evidence level 5). In aesthetic treatments, higher levels of research are missing, which it is starting to improve, but at the moment is still missing.

I see a good trend to move from eminence-based to evidence-based practices. A lot of new research and new methods are surfacing, all of which are evidence-based. But we are still behind any other medical field and there's still a long way to go.

At the end of the day, everything starts with

our individual ethics, the techniques we choose, and the methods we use. Because we shouldn't do harm in the first place. The first maxim of all treatment should always be safety. Unfortunately, I often see that safety is traded for aesthetic outcome and this means that the first maxim is violated. But there are good trends visible and great changes have been done in the last years which makes me happy and creates hope for the future of the aesthetic field.

Beyond the Surface

INSIGHTS FROM **DR. ELIZABETH BAHAR HOUSHMAND**

Dr. Elizabeth Bahar Houshmand is a double board-certified dermatologist who specializes in cosmetic dermatology, laser medicine, acne, hair loss, and melasma. She is certified in both Dermatology and Internal Medicine and holds a prestigious academic and research background. She is a well-known speaker and author in cosmetic dermatology and uses her experience to connect with and treat patients in Dallas, Texas. Dr. Houshmand offers her expertise for treating patients in a connective, personalized, and holistic way.

As someone with a background in both dermatology and internal medicine, how do you find that the two are connected?

Dr. EH : The skin is your largest organ, and it is one of the most intelligent organs in the sense that your overall health is reflected in your skin. So, with a background in internal medicine, I have a very deep knowledge base of the body, and when treating skin entities, I look at the body overall. Therefore, I often try to focus not just on a patient's skin but on their overall health and wellness because you can never have healthy beautiful skin unless you are healthy.

At IMCAS Americas 2023, one of the things we will be discussing is holistic medicine (and the ways in which lifestyle and overall wellness influence aging). In what ways do adrenal health can play a role maintaining healthy skin and how might holistic care assist treatment?

Dr. EH : I believe that any time you look at skin presenting with a condition, whether it's acne, rosacea, anything with inflammation, you have to be concerned about other issues in the body. I was initially a psychobiology major, which is the study of your hormones and behavior, and we know with certainty that your memory, your behaviors, and how you respond to things are based on your hormone levels and fluctuations. This will of course affect your skin, so it is important to look at the body and your overall skin together as one unit.

The adrenal system, is one that is deeply affected when you have excessive stress (which we all seem to have at all ages unfortunately). So, you really do have to consider and address this within patient lifestyles as well. For my younger patients, I love for them to be involved in sports at their school, arts, or any activity that gives them joy. Not everyone has the resources, means, or the time quite honestly,

to do things outside of school. So, if you are working with a younger patient, there are many resources within their school campus and support networks that offer as realistic lifestyle changes.

I don't think it is beneficial to make lofty treatment plans for people. Treatment must be something that can be incorporated into a daily curriculum and is attainable.

In your experience, what are some of the key factors at play in acne-prone skin and what are some of the upcoming methods to consider when selecting and implementing treatment?

Dr. EH : Acne is a challenging disease that can start for a number of reasons. Number one is genetics, so I like to take a detailed history and see if patients have any family members affected with acne. Second is age, because age can determine whether patients are undergoing hormonal changes, such as teenagers and females going through menopause. If patients are experiencing life with high levels of stress, this can also affect hormones levels. So, when initially addressing skin disorders it's critical to look at family history and genetics, age of onset, and lifestyle factors.

“The skin is your largest organ, and it is one of the most intelligent organs in the sense that your overall health is reflected in your skin.”

In terms of lifestyle, diet plays a role, sleep, and the external of how you are taking care of your skin. Something that I am currently discussing with many of my patients is the role of laptops, cell phones, and blue light factors on the exacerbation of skin conditions. This is something that we are really noticing and beginning to learn much more about. Plus, I think we are starting to realize more and more the influence of the environment that you are in. Patients that live in highly populated areas (ie. major metropolitan cities) are obviously going to be exposed to a lot more pollution. For my colleagues in

Paris, other European cities, Asia, and areas with heavier pollution, as physicians we must consider factors like air quality, especially when we are designing treatments and skincare regimens for our patients.

From a physician perspective, what are some of your other approaches when implementing realistic skincare regimens for the treatment of acne or other skin disorders?

Dr. EH : So, from a physician perspective, I think the first part is really customizing skincare. For acne this involves considering does the patient have dry skin, oily skin, for females is it around the time of their menses, and what are their triggers. Then I often choose cleansers and moisturizers, and depending on the severity of the acne, perhaps a combination of over-the-counter products, prescription productions, and in-office treatments. You then work together with the patient to see their response.

It's really important to have a close relationship and monitor how they do over time because I tell patients that acne (and other skin disorders) often don't develop overnight, and they don't go away overnight. You need to be consistent, not give up, and there may be a time that it gets a little worse (such as purging) before getting better. Typically, I like to recommend the first 3 months or so is a minimum time commitment to be in the active phase of treatment. Once the patient is stabilized I then put them on a maintenance regimen.

I think with the advent of social media, people have had a lot of misinformation and it is critical to share proper information, as what worked for someone on TikTok may or may not be the best choice. So, I say to patients, there's often a lot we can do, and it really doesn't have to be so expensive. More expensive skincare doesn't mean it is better quality. It's more knowing what you need and really personalizing to optimize your patient outcomes with a dermatologist.

Breaking New Grounds in Ultrasound for Enhancing Aesthetic Treatments

INSIGHTS FROM **DR. MARIANA CALOMENI**

Dr. Mariana Calomeni is a certified Brazilian physician (MD), dermatologist, and radiologist. She holds a prestigious study background including a residency in Radiology and Diagnostic Imaging (2006), a fellowship in Magnetic Resonance by CDPI (2007), and post-graduate studies in Dermatology (2020). She is currently an active member and contributor within multiple Brazilian societies and practices dermatology at Bravo's Clinic in Rio de Janeiro, Brazil. She reflects her ultrasonography experience, the ways it influences her practice, and offers insight on the potential and uses of US tech.

As a specialist in both dermatology and radiology, how does having a background in both benefit your work?

Dr. MC : A key aspect of becoming a great dermatologist, especially in aesthetic treatment, is to have a strong understanding of anatomy and anatomical structures. There is a crucial link between radiology and anatomy: by allowing us to covert anatomical information from 3D structures to 2D images, and vice versa.

By combining these, you can use ultrasound devices to learn anatomy and greatly improve your skills in the dermatologic field, from diagnosis through the most accurate forms of treatment, for both clinical and aesthetic approaches.

IMCAS Americas this year includes a dedicated module of US exploring the basics through specified uses in filler and surgery procedure. What is the value of using US in everyday clinical procedures and treatments?

Dr. MC : First of all, it's crucial to understand that ultrasound imaging modality stands out for its safety, portability, non-invasiveness, painlessness, and relatively low cost, which supports its use in various clinical scenarios.

Ultrasound devices have become an important tool to help injectors before, during, and after procedures. Overall, it improves the quality and safety in our daily practice because injectors can now discover what is beneath the skin before starting a cosmetic treatment.

Another important aspect is its ability to assist in diagnostic accuracy which optimizes aesthetic treatments and gives the patient complete and personalized attention.

So, ultrasound imaging has become an important diagnostic tool for an increasing number and range of clinical treatments, enabling a greater variety of treatment options.

How is ultrasound imaging different from classic anatomy?

Dr. MC : Unlike cadaver dissection, which is static, ultrasound allows the study of anatomy in a different, more dynamic way. It's possible to obtain real-time images of tissues, vessels flow, and skin layers in vivo.

It's crucial to understand the benefits of incorporating ultrasound in anatomy teaching, including the potential to observe the dynamic nature of living anatomy, to better our understanding and treatment of certain anatomical structures.

“Ultrasound devices offer a deep anatomical knowledge where it may be necessary and even critical in treatment”

How can ultrasound help in preventing and/or managing complications?

Dr. MC : Ultrasound devices provide accurate and current anatomical knowledge, which is important in injection for understanding the best planes to apply product to avoid potential complications. It can also be crucial for recognizing certain anatomical variations and avoiding risk zones in filler augmentation. Therefore, ultrasound has the potential to help physicians to provide more accurate treatment both in the procedure itself, as well as any complications by guiding the management of vascular adverse events/occlusions.

What are other areas in aesthetics can ultrasound be used?

Dr. MC : In aesthetic treatments, ultrasound can be used in several ways: to better understand patient anatomy, recognize anatomical variations, guide filler injections (especially in facial risk zones), guide the

use of hyaluronidase when being inserted in a precise location, diagnose complications after procedure, and guide complication management.

Do you have any advice for physicians who may be just learning how to use or implement US tech in their work?

Dr. MC : Physicians must realize that US is a tool for improving medical procedures as it allows you to identify the exact anatomic points that you need to access. It can be of great use in specific situations, especially when essential knowledge of anatomy, is necessary for dermatologic and aesthetic uses.

If you have US available, it can also offer security in recognizing better points and layers when proceeding with

injection, and over time, this will build more confidence. It is ultimately an incredible training tool for physicians practicing injection. After long periods of training, injectors can know the exact layers for placing the product without even needing the use of ultrasound.

Ultrasound devices offer a deep anatomical knowledge where it may be necessary and even critical in treatment, and it greatly improves injection technique.

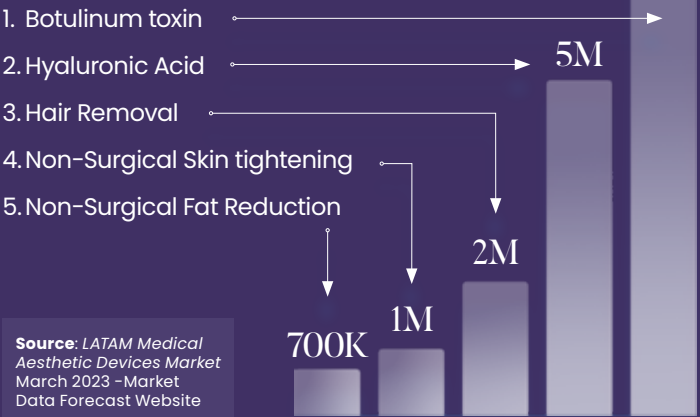

Where do you see the future of ultrasound and its effects on plastic surgery, dermatology, and aesthetic treatments?

Dr. MC : I expect that US will be widely used in all of these areas in the near future. First, in clinical practice to guide procedures, diagnose, and reverse complications. And also, it will be used in anatomical studies to improve our knowledge, and allow us to perform more aesthetic injections safely.

Scientific sessions under an unrestricted educational grant

Sesiones científicas en el marco de una subvención educativa sin restricciones

S016, S017 – Hair restoration & new treatments

With an unrestricted educational grant from: SKINGEN COLOMBIA

S027 – Anatomy on cadaver – Midface & nose (with ultrasonography)

With an unrestricted educational grant from: NEAUVIA

S047 – Lasers & EBD – Tattoo

With an unrestricted educational grant from: ROCOL INTERNATIONAL SAS

S048 – Drug or laser treatment – Active acne

With an unrestricted educational grant from: TENTREK LASERS

Our educational grants are financial contributions that support the educational and impartial research presented. All is subject to review and approved by the Scientific Board, therefore falling under the category of non-sponsored sessions (sorted by session number).

Nuestras becas educativas son contribuciones financieras que apoyan la investigación imparcial que presentamos y están sujetas a la revisión y aprobación del Consejo Científico, por lo que entran en la categoría de sesiones no patrocinadas (ordenadas por número de sesión).

S049 – Drug or laser treatments – Face redness

With an unrestricted educational grant from: TENTREK LASERS

S071, S072 – Skin tightening to body shaping: synergy effect

With an unrestricted educational grant from: ROCOL INTERNATIONAL SAS

S079 – Genital treatments – aesthetics (in collaboration with ISRAIT)

With an unrestricted educational grant from: SKINGEN COLOMBIA

Training labs Zona de entrenamiento

These dedicated labs are proposed by sponsoring companies as a different training experience. Head to Level 3 to find these training opportunities.

Estos laboratorios son propuestos por las empresas patrocinadoras como una experiencia de formación diferente. Dirígete al nivel 3 para encontrar las salas dedicadas.

FRIDAY, JULY 21

VIERNES 21 JULIO

All of its products incorporate and thoroughly follow the world-class self-test standard test procedures and all its medical equipment, manufacturing facility and process management carry GMP certification system.

NUEVOS LANZAMIENTOS 2023

icoone®
BEAUTY

icoone® es el único dispositivo en el mundo para realizar Multi Micro Alveolar Stimulation (MMAS), con resultados visibles después de la primera sesión, con la innovadora patente Roboderm® estimula el tejido conjuntivo de forma eficaz y profunda, con tratamientos completamente naturales e indolores.

Icoone realiza estimulación bimanual, lo cual permite trabajar en ambos lados del cuerpo simultáneamente garantizando resultados más óptimos.

Con su amplia combinación de programas, icoone realiza tratamientos faciales y corporales efectivos para hombres y mujeres, en usos médicos y estéticos como:

- Drenaje Linfático.
- Reducción de Celulitis.
- Reafirmación.
- Remodelación.
- Mejora aspecto de estrías.
- Mejora circulación sanguínea.
- Regeneración de tejidos.
- Cicatrices de quemaduras.
- Realce de pecho.
- Efecto lifting.
- Tartamientos antiedad.
- Regeneración celular.
- Arrugas profundas.
- Tratamientos con efecto reafirmante y rejuvenecedor.

POTENZA™

El primer sistema de radiofrecuencia con microagujas del mundo que combina radiofrecuencia monopolar y bipolar en frecuencias de 1 o 2 MHz en un solo equipo.

Potenza lleva el sistema de microagujas a nuevos niveles, permite personalizar los tratamientos en función de: todos los fototipos de piel, en cualquier parte del cuerpo, en cualquier época del año.

- 4 modos diferentes de radiofrecuencia, monopolar, bipolar, capacidades de 1 y 2 MHz.

- La tecnología única de Tiger Tip™ trata más tejido a varias profundidades.

- Pieza de mano de una sola aguja utilizada para localizar con precisión y mejorar las manchas de la piel.

- 9 puntas diferentes: matrices de agujas múltiples en varias densidades.

AIR JET II™

Tecnología de energía neumática de aire.

AirjetII es un dispositivo de lifting facial que invade la piel utilizando una tecnología de chorro neumático sin aguja, que actúa solo con presión de aire, basada en energía cinética e inspirada en la "teoría de fondo".

La energía cinética de AirjetII y boquilla de diseño especialmente hidrodinámico, genera energía de alta presión y rocía soluciones en el objetivo.

- Tiene alta inyección neumática.
- Cuenta con suministro de solución a la boquilla de diseño hidrodinámico del objetivo.
- Subcisión 3D por energía cinética.
- Proceso de curación natural + aceleración de la síntesis de colágeno + efecto lifting.
- Generación de la piel y engrosamiento dérmico.

 - sponsored sessions

IMCAS is a congress created by physicians, for physicians. Access to the congress and sessions is subject to a number of regulations that aim to guarantee the scientific independence of the congresses and preserve it from any commercial interest or influence. A precise badge policy has been implemented specifying the rules of admittance to the different areas of the congress, complying with the criteria required by the CME accreditation organizations.

According to each badge type a full or partial access is issued (after verification of required supporting documents). In this regard, in respect of the local policies towards aesthetic treatments, no admittance to the congress is allowed for nurses or dentists. IMCAS is authorized to take measures which may lead to the withdrawal of the badge and the denial of access to the congress area if the badge policy is violated.

REPLAY

2 weeks replay of all sessions will be available on IMCAS Live (session access subject to badge type).
2 semanas de replay estarán disponibles en IMCAS Live para ver todas las sesiones en repetición (el acceso a las sesiones depende del tipo de acreditación).

*INFORMACIÓN ADICIONAL SOBRE LOS ACCESOS

- Las pausas para el café están incluidas para todos los tipos de distintivos.
- Los pases de acceso completo incluyen:
 - exhibición
 - todas las sesiones científicas
 - sesiones de la industria
- Las sesiones de Cirugía del IMCAS están restringidas a cirujanos certificados:
 - cirujanos plásticos
 - cirujanos plásticos faciales (sólo sesiones de cirugía facial)
 - cirujanos oculoplásticos (sólo sesiones de cirugía facial)
 - residentes en cirugía
- Los pases de acceso parcial incluyen:
 - exhibición
 - sesiones científicas de cosmeceuticals & nutraceuticals
 - sesiones científicas de practica profesional
 - sesiones de la industria

IMCAS es un congreso creado por médicos, para médicos. El acceso al congreso y a las sesiones está sujeto a una serie de normas que pretenden garantizar la independencia científica de los congresos y preservarla de cualquier interés o influencia comercial. Se ha puesto en marcha una política precisa de ingreso y de pases que especifica las normas de acceso a las diferentes áreas del congreso según el pase adquirido, cumpliendo con los criterios exigidos por las organizaciones de acreditación CME.

Según el tipo de pase que se adquiere y luego de verificar las pruebas y documentación específica para cada pase adquirido, se concede un acceso total o parcial. En este sentido, y respetando las políticas locales en materia de tratamientos médicos estéticos, no se permite la entrada al congreso a enfermeras ni odontólogos. IMCAS está autorizada y puede llegar a tomar medidas para retirar el pase y/o a la denegación al acceso a la zona del congreso si se infringe la política de pases.

General info

ACCIDENTS, DAMAGES, & LOSS

IMCAS and the Centro de Convenciones de Cartagena accepts no liability for any damages and/or losses that may be incurred during both the official conference and social programs. Please do not leave any property unattended in the venue, as each participant is responsible for their own personal property.

All attendees participate in the congress events at their own risk and are advised to have insurance against any loss, accidents, or damages that could take place during the congress. Verbal agreements will not be binding unless confirmed in writing.

If you are looking for any lost items, come to the Welcome Desk and a member of staff will be happy to assist you.

BADGE ACCESS

IMCAS welcomes all professionals active in the world of aesthetics, including doctors and related professional bodies. Access to conference rooms is contingent on each badge category and the verified physician certification of each delegate.

Once you purchase a badge under your name, it is not transferable to another individual. Please check our registration form for the badge categories, their accesses, and our cancellation policy.

CERTIFICATE OF ATTENDANCE

Delegates, faculty, and contributing speakers can obtain a certificate of attendance at the end of IMCAS Americas 2023. Each registered delegate is asked to fill in the online evaluation form within 30 days following the congress on www.imcas.com. Once completed, the certificate of attendance will be available for download.

COFFEE & LUNCH BREAKS

Complimentary lunch and coffee are provided to delegates and faculty at designated serving areas. You can find these areas on level 2 across from Rooms 3 & 4.

SPONSORED BY DERMAVAN COLOMBIA & GILMEDICA SA

CONFLICT OF INTEREST (COI) POLICY

IMCAS values transparency in all scientific courses. As a part of our COI Policy, each speaker is required to disclose any information indicating if their presentations contain financial support or commercial bias.

The COI policy applies to all congress speakers or contributors for our scientific program, including all faculty members and members of the Scientific Board.

The content within the Scientific Program consists of both non-sponsored and sponsored session materials by means of educational grants and direct sponsorships.

CONGRESS FORMAT

ON-SITE is face-to-face with sessions and exhibitions all three days (see venue schedule below). Throughout the congress and up to 15 days post-event, you can access the replay of all sessions on www.imcas.live.

CONGRESS VENUE & OPENING HOURS

Cartagena de Indias Convention Center - Julio Cesar Turbay Ayala Getsemani, Calle 24 No 8 a - 344 Cartagena de Indias, Colombia

Both the Congress and Exhibition are open and accessible at the following hours:

Thursday: 9.00 – 19.00 Friday: 7.30 – 18.00 Saturday: 8.00 – 18.00

E-POSTERS

The e-posters will be available in English throughout the congress on a digital touch screen in the exhibition hall in front of Room 3. Head over to read recently published research and scientific articles from our scientific and industry community.

SPONSORED BY ZERO GRAVITY SKIN

EXHIBITION

The exhibition is open each of the congress days and is accessible to all badge holders. Check the congress app for an updated list of all the sponsors.

GALA DINNER

For a classic fine dining experience to unwind with friends and colleagues, the Gala Dinner is a perfect ending to an intensive congress day. The event will be held at El Ruedo (La Serrezuela) on the evening of Saturday July 22nd and dinner will begin promptly at 8.30pm. Tickets are available for purchase at \$160. Please visit the registration desk for more information and to verify availability.

Event Address: El Ruedo - Cra. 11 # 39 – 21 Centro Histórico Cartagena, Cartagena de Indias

IMCAS ACADEMY

Discover all that IMCAS Academy (the leading e-learning platform) has to offer at the Academy booth, and explore the extensive content now available through the Academy app. All videos are provided in English, with a large selection in Spanish as well!

IMCAS LIVE PLATFORM

Download the official congress mobile app “IMCAS Live” or connect to www.imcas.live to get all the latest information! Watch all sessions in replay, browse the full program details, create your personal calendar, use the interactive maps to locate booths and rooms, and much more.

All attendees have access to all the congress sessions in replay for two weeks through IMCAS Live (accesss to scientific sessions is tied to your badge access). Your credentials will be your IMCAS account login.

NETWORKING COCKTAIL

On Thursday evening, the Networking Cocktail provides the perfect opportunity to expand your professional network and socialize! Gather with fellow physicians at the exit door of the event also known as ‘Plaza de Banderas’ directly following the close of our first congress day for an hour of light drinks and fun conversations.

SPONSORED BY TOSKANIMED

OPEN STAGE

Don’t forget to head over to the open stage in the exhibition area to hear contributing and industry guest lectures throughout the duration of the congress. Capturing the collaborative spirit of the exhibition, these speeches are presented by a global community of experts to expand on session subjects and provide engaging information for any interested participants. The open stage is located directly across from Rooms 1 and 2.

EXPERIENCE LABS

Experience Labs are specialized sessions provided for in-depth discussions of specific aesthetic areas and subjects. Access to these sessions is granted to all- inclusive badge holders or to badges who have purchased the specific Experience Labs. Session access is granted only to the courses selected upon payment.

Visit the registration desk for any questions regarding the purchase or access to the Experience Labs (cost per class 100 USD).

PHOTOBOOTH

Take a candid photo with a professional photographer! Check out the Photobooth right between Room 1 & 2 to relive the congress moments post-congress when the pictures are uploaded to the IMCAS social networks.

SPONSORED BY BIOSCIENCE GMBH

PRIVATE LOUNGE

The Private Lounge is accessible exclusively to delegates who have registered for an “All Inclusive” Pass or who have purchased the private lounge option. This secluded and comfy lounge area provides a quiet space during the busy congress environment and comes with complimentary food & beverages throughout the day. Get access to this area at the Welcome desk on Level 1.

SPONSORED BY MESOESTETIC

RECORDING POLICY

Recording of any kind (photographic, video, or audio) during sessions are **STRICTLY PROHIBITED**. Any violators will be banned from future IMCAS congresses and any equipment will be seized.

SELFIE CORNER

Gather with colleagues to take a fun photo! Head over to the Selfie Corner, located by the Speaker Preview room in the main exhibition area.

SPONSORED BY MERZ AESTHETICS

SPEAKER PREVIEW ROOM

The Speaker Preview Room has restricted access to speakers only. All speakers must upload their presentations here at least 1.5 hours prior to their sessions. Direct plug-in within each session room will not be permitted. In this area the Club Lounge also offers a seating area with food & beverages throughout the congress day for all faculty badge holders.

TRAINING VILLAGE

These dedicated labs are proposed by sponsoring companies as a different training experience. Unlike symposia, their formats focus on small and intimate groups, consequently allowing for closer interactions between the audience and the teaching team. Head to Level 3 to find more about these dedicated rooms.

TRANSLATIONS

While the official IMCAS conference language is English, translations between English and Spanish are provided for all sessions. Translation headsets are available free of charge at the registration desk. Upon retrieval, your ID will be required as a form of security deposit.

WIFI

Complimentary WiFi is available throughout the venue.

Any questions?

Come see us at the Welcome Desk at the entrance of the venue and we are happy to help!

Información general

ACCIDENTES, DAÑOS Y PÉRDIDAS

IMCAS y el Centro de Convenciones de Cartagena no se hacen responsables de los daños y/o pérdidas de cualquier tipo que puedan ocurrir durante la conferencia oficial y los programas sociales. Por favor, no dejes tus pertenencias desatendidas en el lugar, ya que cada participante es responsable de sus propias propiedades personales.

Todos los asistentes participan en los eventos del congreso bajo su propio riesgo y se les recomienda contar con un seguro contra cualquier pérdida, accidente o daño que pueda ocurrir durante el congreso. Los acuerdos verbales no serán vinculantes a menos que se confirmen por escrito.

Si estás buscando objetos perdidos, acude a la Mesa de Registro y un miembro del personal estará encantado de ayudarte.

ACCESO CON PASE

IMCAS da la bienvenida a todos los profesionales activos en el mundo de la estética, incluyendo médicos y organismos profesionales relacionados. El acceso a las salas de conferencias está sujeto a la categoría de cada pase y a la certificación verificada del médico de cada participante.

Una vez que compres un pase a tu nombre, no es transferible a otra persona. Por favor, consulta nuestro formulario de registro para conocer las categorías de los pases, sus accesos y nuestra política de cancelación.

CERTIFICADO DE ASISTENCIA

Los participantes, profesores y oradores contribuyentes pueden obtener un certificado de asistencia al final de IMCAS Americas 2023. Se solicita a cada participante registrado que complete el formulario de evaluación en línea dentro de los 30 días siguientes al congreso en www.imcas.com. Una vez completado, el certificado de asistencia estará disponible para su descarga.

COFFEE Y LUNCH BREAK

Se ofrece un almuerzo y café de cortesía a los participantes y profesores en áreas designadas de servicio. Puedes encontrar estas áreas en el nivel 2, frente a las Salas 3 y 4.

PATROCINADO POR DERMAVAN COLOMBIA & GILMEDICA SA

POLÍTICA DE CONFLICTO DE INTERESES (COI)

IMCAS valora la transparencia en todos los cursos científicos. Como parte de nuestra política de COI, se requiere que cada orador revele cualquier información que indique si sus presentaciones contienen apoyo financiero o sesgo comercial.

La política de COI se aplica a todos los oradores o contribuyentes del congreso en nuestro programa científico, incluyendo a todos los miembros de la facultad y miembros del Comité Científico.

El contenido del Programa Científico consta de materiales de sesiones tanto patrocinadas como no patrocinadas mediante becas educativas y patrocinios directos.

FORMATO DEL CONGRESO

El formato EN LUGAR es cara a cara con sesiones y exposiciones durante los tres días (ver horario del lugar a continuación). Durante todo el congreso y hasta 15 días después del evento, puedes acceder a la repetición de todas las sesiones en www.imcas.live.

LUGAR DEL CONGRESO Y HORARIO DE APERTURA

Centro de Convenciones de Cartagena de Indias - Julio Cesar Turbay Ayala Getsemani, Calle 24 No 8 a - 344 Cartagena de Indias, Colombia.

Tanto el Congreso como la Exposición están abiertos y accesibles en los siguientes horarios:

Jueves: 9.00 - 19.00 Viernes: 7.30 - 18.00 Sábado: 8.00 - 18.00

E-POSTERS

Los e-posters estarán disponibles en inglés durante todo el congreso en una pantalla táctil digital en el salón de exposiciones frente a la Sala 3. Acércate para leer investigaciones recientemente publicadas y artículos científicos de nuestra comunidad científica e industrial.

PATROCINADO POR ZERO GRAVITY SKIN

EXPOSICIÓN

La exposición está abierta todos los días del congreso y es accesible para todos los portadores de pase. Consulta la aplicación del congreso para obtener una lista actualizada de todos los patrocinadores.

CENA DE GALA

Para disfrutar de una experiencia clásica de cena elegante para relajarse con amigos y colegas, la Cena de Gala es el final perfecto de un intenso día de congreso. El evento se llevará a cabo en El Ruedo (La Serrezuela) la noche del sábado 22 de julio y la cena comenzará puntualmente a las 8.30 pm. Las entradas están disponibles para su compra a \$160. Por favor, visita el mostrador de registro para obtener más información y verificar la disponibilidad.

Dirección del evento: El Ruedo - Cra. 11 # 39 - 21

Centro Histórico Cartagena Cartagena de Indias.

IMCAS ACADEMY

Descubre todo lo que IMCAS Academy (la plataforma líder de aprendizaje en línea) tiene para ofrecer en el stand Academy, y explora el extenso contenido ahora disponible a través de la aplicación de la Academia. ¡Todos los videos se proporcionan en inglés, con una amplia selección también en español!

PLATAFORMA IMCAS LIVE

¡Descarga la aplicación móvil oficial del congreso "IMCAS Live" o conéctate a www.imcas.live para obtener toda la información más reciente! Mira todas las sesiones en repetición, consulta los detalles del programa completo, crea tu calendario personal, usa los mapas interactivos para ubicar stands y salas, ¡y mucho más!

Todos los asistentes tienen acceso a todas las sesiones del congreso en repetición durante dos semanas a través de IMCAS Live (el acceso a las sesiones científicas está vinculado a tu acceso con pase). Tus credenciales serán las credenciales de inicio de sesión de tu cuenta IMCAS.

CÓCTEL DE NETWORKING

El jueves por la noche, el Cóctel de Networking brinda la oportunidad perfecta para ampliar tu red profesional y socializar. Reúnete con otros médicos en la puerta de salida del evento, también conocida como "Plaza de Banderas", inmediatamente después del cierre de nuestro primer día de congreso, durante una hora de bebidas ligeras y conversaciones divertidas.

PATROCINADO POR TOSKANIMED.

ESCENARIO ABIERTO

No olvides visitar el escenario abierto en el área de la exposición para escuchar conferencias de oradores contribuyentes e invitados de la industria durante toda la duración del congreso. Capturando el espíritu colaborativo de la exposición, estas charlas son presentadas por una comunidad global de expertos para ampliar los temas de las sesiones y proporcionar información interesante para todos los participantes interesados. El escenario abierto está ubicado justo enfrente de las Salas 1 y 2.

IMCAS EXPERIENCE LABS

Los Laboratorios de Experiencia son sesiones especializadas proporcionadas para una discusión en profundidad de áreas y temas estéticos específicos. El acceso a estas sesiones se concede a los titulares de pases "Todo Incluido" o a los pases que hayan adquirido el curso opcional específico. El acceso a las sesiones se concede solo a los cursos seleccionados al realizar el pago. Visita el mostrador de registro si tienes alguna pregunta sobre la compra o adición del acceso a los Experience Labs (costo unitario 100usd por clase).

PHOTOBOOTH

¡Hazte una foto espontánea con un fotógrafo profesional! Visita el Photobooth justo entre la Sala 1 y la Sala 2 para revivir los momentos del congreso después de que las fotos se suban a las redes sociales de IMCAS.

PATROCINADO POR BIOSCIENCE GMBH

PRIVATE LOUNGE

El private lounge es una sala accesible exclusivamente para los participantes que se hayan registrado con un pase "Todo Incluido" o que hayan adquirido la opción de la sala privada. Esta zona apartada y cómoda ofrece un espacio tranquilo durante el ajetreado ambiente del congreso y cuenta con comida y bebidas de cortesía durante todo el día del congreso. Obtén acceso a esta área en la Mesa de Registro en el Nivel 1.

PATROCINADO POR MESOESTETIC

POLÍTICA DE GRABACIÓN

Queda **ESTRICTAMENTE PROHIBIDO** grabar de cualquier forma (fotográfica, de video o de audio) durante las sesiones. Cualquier infractor será prohibido en futuros congresos de IMCAS y se confiscarán los equipos.

SELFIE CORNER

¡Reúnete con colegas para tomar una foto divertida! Ve al Selfie Corner, ubicado junto a la Sala de Vista Previa de Oradores en el área principal de la exposición.

PATROCINADO POR MERZ AESTHETICS.

SALA DE VISTA PREVIA DE ORADORES

La Sala de Vista Previa de oradores tiene acceso restringido solo para los oradores. Todos los oradores deben cargar sus presentaciones aquí al menos 1.5 horas antes de sus sesiones. No se permitirá la conexión directa dentro de cada sala de sesión. En esta área, el Club Lounge también ofrece una zona de asientos con comida y bebida durante todo el día del congreso para todos los titulares de pases de la facultad.

TRAINING VILLAGE

Estos laboratorios especializados son propuestos por empresas patrocinadoras como una experiencia de entrenamiento diferente. A diferencia de los simposios, su formato se centra en grupos pequeños e íntimos, lo que permite una interacción más cercana entre el público y el equipo docente. Dirígete al Nivel 3 para obtener más información sobre estas salas dedicadas.

TRADUCCIONES

Si bien el idioma oficial de la conferencia IMCAS es el inglés, se proporcionan traducciones entre inglés y español para todas las sesiones. Los auriculares de traducción están disponibles de forma gratuita en la mesa de registro. Al recoger tus auriculares, se te solicitará una identificación válida para garantizar la devolución de los auriculares al final del congreso.

WIFI

Wifi gratuito se encuentra disponible en todas las áreas del evento.

Tiene preguntas ?

No dude en contactar al equipo IMCAS en la mesa de registro y estaremos contentos de ayudar !
