GENERAL INFORMATION

Conference Admission and Exhibition Hall

Admission is by badge only. An adult must accompany children under the age of 16.

IMCAS Asia 2015 showcases companies which are displaying their products and services on the same level as the Conference

Official Conference Language

English is the official congress language.

35 Symposia List of abbreviations

How do you learn?

36

Apart from the Chinese Masterclass, in which the official language is Chinese.

Nominal Badges

IMCAS strictly complies with the criteria required for CME accreditation. Therefore access to the conferences is subject to a number of strict rules, aiming to guarantee the scientific independence of the conferences, and to preserve them from any commercial interest or influence. A precise Badge Policy has been implemented, specifying the rules related to the admittance to the different areas of IMCAS conferences.

IMCAS Badge Policy is mandatory for all participants. Its violation authorizes IMCAS Staff to take measures, and may lead to the withdrawal of the badge and the prohibition of access to the conference area. According to each participant's status (delegate, faculty, exhibitor, etc...), a corresponding barcoded badge is issued

Fees for full delegate registration include:

- · all conference sessions during the 3 days (except optional teaching courses)
- · access to the exhibit area including lunches and coffee breaks
- the Networking cocktail on Friday evening

Badge Categories

IMCAS welcomes all professionals dealing with the world of aesthetics: doctors and all related professional bodies. Access to the Exhibition is available for all types of badges whereas access to Conference rooms will depend on whether one holds a doctor badge or a non-doctor badge.

Please refer to the Registration Form on page 95 for more informations

Coffee & Lunch Breaks

Coffee breaks and lunches are served on site to allow our delegates to fully visit the Exhibition Hall. Complimentary food and beverage is provided to Doctor and Faculty type badges. It is our primary concern to provide you with the freshest and best products. A particular attention has been given to the content of the lunch buffets.

Friday

Coffee breaks: 10.30 to 11 am and 5 to 5.30 pm

Lunch break: 1 to 2 pm

Networking cocktail: 7 pm (access open to all attendees)

Coffee breaks: 10.30 to 11 am and 4 to 4.30 pm Lunch break: 1 to 2 pm

Coffee breaks: 10.30 to 11 am

Neither IMCAS Secretariat nor the Westin Resort Nusa Dua accept any liability for damages and/or losses of any kind which may be incurred by congress participants or by any persons accompanying them, during both the official conferences and social program.

Attendees may participate in all events at their own risk. Attendees are advised to take out insurance against loss, accidents or damages that could be incurred during the Congress. Verbal agreements will not be binding unless they are confirmed in writing.

Optional Teaching Courses

IMCAS Congresses offer their attendees the possibility to register for optional teaching courses, providing an opportunity for in-depth exposure to specific techniques and topics, as well as more personalized contact with recognized leaders in aesthetic surgery and cosmetic dermatology.

These special courses require additionnal fees (please proceed to the Welcome Desk). Giving the limited number of seats, please, register early before your course selections sell out!

See the Teaching Course program on pages 30 to 33.

Recording Policy

Recording (Photographic, Video and Audio) of the sessions of IMCAS congresses is STRICTLY PROHIBITED. Violators will be banned from future meetings and their equipment will be confiscated

Mobile Phones

As a courtesy to all speakers and attendees, please turn off your mobile phone and/or pager while attending sessions.

Evaluation Forms & Certificate of Attendance

Your evaluation of this meeting is extremely important to the Scientific Committee in preparing future events. Evaluation Forms should be electronically filled in during or within one month after the congress. A Certificate of Attendance will then be automatically established and emailed to the attendee.

Speakers' Preview Room & Club Lounge

All sessions are equipped with computer projection. In order to ensure a successful congress, speakers are asked to have their presentations delivered to the Preview Room at least 2 hours before the start of the session or on the day before.

Speakers: please present yourselves at the Speaker Welcome desk where you will be given all necessary information. The Preview Room is located in the Club Lounge.

E-learning Station

You will be able to visit the IMCAS E-learning Station to check your emails, view the scientific lectures in electronic format (E-PAPERS), exchange ideas about clinical cases, and send personalized emails to the authors.

Besides allowing participants to submit their evaluation and to browse the web during the whole congress period, this station completes the learning experience by providing additional content to classical scientific sessions.

Program Book & USB Key

Each delegate receives a free IMCAS Asia 2015 program book and a USB key containing a link to the abstracts that have been accepted by the Scientific Committee. Companies and participants may copy materials for their personal use but further copying for sale or for any other commercial purposes is prohibited without prior permission from IMCAS.

BOARD'S LETTER

DEAR COLLEAGUES,

On behalf of the IMCAS Asia 2015 Scientific Board, we would like to welcome you to our 9th edition of IMCAS Asia and we are proud this year to mark it as our "premiere" in Indonesia in the paradisiacal setting of Bali.

IMCAS Asia, often seen as IMCAS Annual World Congress' "younger sister", has shown exponential growth year after year since its first implementation almost a decade ago and showcases the booming Asia Pacific medical aesthetics market.

Over the course of three days, you can delve into a scientific program featuring the latest techniques and updates of the profession with a special focus on Asian trends and particularities carried into both the injectables and surgery modules. Additionally, this year, IMCAS has forged collaborations with a number of prestigious learned societies and the entire congress is fully endorsed by the Indonesian Society of Dermatology and Veneorology (PERDOSKI).

Our line-up of top international dermatologists, plastic surgeons and facial plastic surgeons are sharing their collective knowledge on everything from facelifts and breast augmentation to rhinoplasty and blepharoplasty and from toxins and fillers to lasers and EBD, passing by practice management, clinical dermatology and cosmeceuticals. Our aim is to provide all participants with the very best learning experience in a vast range of specialist fields.

Besides the scientific program is the exhibition, which is attracting industry players large and small from across Asia and from around the world. The IMCAS social events and Gala Dinner give you even more opportunities for networking in an informal ambience and a spectacular setting.

Once again, we are delighted to welcome you to this very promising IMCAS Asia 2015!

SUNDAY

8 am Registration begins

8.30 am - 2 pm Conference & exhibition

End of IMCAS ASIA 2015

ABSTRACT STATISTICS

We received 243 abstracts for IMCAS Asia 2015, representing 63% of all presentations!

Thanks to the dedication of our lecturers, whether Faculty members or contributing speakers, and the thorough reviewing work of the IMCAS Scientific Board, the scientific program attains a higher level of quality every year. The selection and study process of these abstracts ensures in particular the tracking and follow-up of the program content as well as the best studying materials for our delegates.

The Conflict of Interest policy (COI) that was initiated a few years ago ensures unbiased presentations: all presentations, including oral lectures, posters and e-papers are concerned by this COI, which is constantly updated by IMCAS in order to match the criteria imposed by international CME accreditation entities.

This year, 71% of expected abstracts in surgery have been submitted, bringing plastic surgeons at the top of the submission process, while dermatologists and MDs are close behind with 61% of abstracts submitted in their category.

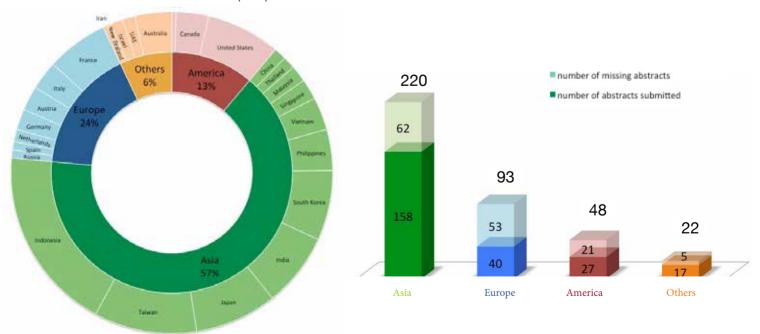

Abstracts are sorted out into three topic categories, all dealing with aesthetic surgery and cosmetic dermatology.

57% of presentations come from Asia

As expressed in the graphics below, the worldwide reputation of IMCAS has been well proven. The eagerness of international physicians to share and spread their knowledge at a large scale is higher than ever.

Illustrating the booming interest for our field in Asia, 11 Asian countries are highly contributing to the Scientific Program, the first being Indonesia, followed by Taiwan, India and Japan. Europeans are closely behind, accounting for 24% of all presentations.

In terms of abstract submission, Asia still ranks #1 with 72% of abstracts submitted out of all Asian presentations, while Europe still does well with 43% of abstract submissions out of all European presentations.

We would like to express our utmost appreciation to all abstract submitters, and to all their reviewers for their precious time and efforts spent on the IMCAS Asia 2015 meeting, always helping us to improve and go beyond our limits. - IMCAS Asia 2015 Scientific Board

Nota: all abstracts submitted remain available for consultation on IMCAS website on the digital program at any time: http://www.imcas.com/en/attend/imcas-asia-2015/program

PAPERS: Face surgery

Injectables

*CME ACCREDITATION: IMCAS Asia is under process of accreditation by SKP IDI, the local organism that grants Continuing Medical Education (CME) credits to Indonesian doctors.

The process to get CME credits will be available through a dedicated website link as soon as the accreditation number is obtained, keeping in mind that, as for any other international accreditation process, evaluation of the conference will be the first step.

Submit your Evaluation Form via www.imcas.com within the 30 days following the conference in order to get your Certificate of Attendance sent directly to your email inbox.

FOCUS THEMES

TAKE A LOOK AT OUR SELECTION OF SOME OF THE MOST INNOVATIVE THEMES AT IMCAS ASIA. ASSOCIATED WITH EACH THEME ARE A NUMBER OF DEDICATED SESSIONS. READ ON FOR A SUMMARY OF THE HIGHLIGHTS OF EACH THEME.

INJECTABLES & FAT

ANATOMY ON CADAVER WORKSHOP

Our pioneering cadaver and injectables & fat workshop is back by popular demand! Enjoy a unique opportunity to observe live injections on patients alongside a live dissection of a cadaver. The module dedicated to fat anatomy covers the different parts of the body; from face to breasts. By attending this workshop improve your knowledge of anatomy for injections and lipofilling treatments and better deal with complications.

INJECTABLE SESSIONS

Get valuable insights into administering botulinum toxins and fillers for a number of different parts of the face and for a variety of indications. A number of sessions focus on the best techniques to employ to achieve the desired outcomes for Asian patients in particular. Become better equipped to get the best results and to avoid complications.

LASERS & EBD

Lasers and Energy Based Devices (EBD) are part of a booming market. Our sessions cover everything from ultrasound and fractional lasers to radiofrequency and cryolipolysis. In addition, skin rejuvenation and tightening, hair removal and the treatment of hyperpigmentation are covered. Asian skin can pose particular challenges when using lasers and EBDs so these sessions emphasise the safe usage of these devices to get optimal results. Take the additional teaching course for further insights into this

LIPOFILLING & STEM CELLS

It has long been said that the future of medicine will be in stem cells. Our sessions on lipofilling and liposuction can update you on the newest developments and techniques in this sphere. Covering both the face and the body, they help you to identify the most appropriate treatments to use, the best strategies for harvesting grafts and ensuring fat survival and the all-important pre- and post- operative procedures to follow. Video demonstrations further complement your learning.

COSMECEUTICALS CLASS

This year we are introducing a brand new cosmeceuticals class to the program. This course gives a fantastic insight into this relatively new field that is currently developing at lightening speed. Enjoy the opportunity to explore the scientific research that lies behind the laboratories' claims. Furthermore discover which products to use for different skin types and conditions and how best to use cosmeceutical products as a complementary therapy to traditional cosmetic procedures.

5

MARKET PERSPECTIVES

This economic forum dedicated to the Asia-Pacific market offers you the most up to date information regarding the development of the aesthetic market in Asia. International experts examine the market and offer insights into the strategies used by industry players, both big and small. The session helps you to understand the Asian market and the potential for growth across different sectors. Finally, a round table discussion between doctors and industrials certainly sparks some dynamic debates.

BREAST SURGERY

Breast augmentation continues to hold its position at the top of most lists of popular surgical procedures. Being one of the most in-demand surgical procedures internationally, it is vital for any plastic surgeon to keep up to date with new developments in this field. These sessions—cover the best techniques to use when choosing and inserting breast implants along with the developing trend of mastopexy. Enjoy the opportunity to bring your knowledge up to date and to ascertain the scientific facts linked to this procedure.

7

SURGICAL & NON-SURGICAL BODY SHAPING

With the increasing advancement and popularity of non-invasive technologies, it is important for today's surgeons to be able to offer a variety of options to their patients who are thinking about body reshaping procedures. From fillers, lasers and EBD to threads and scalpels, these sessions cover an extensive array of procedures, always focussing on the best techniques to use to help you to avoid complications.

8

CLINICAL DERMATOLOGY

Also new this year are the sessions that focus on the pathology that lies behind many common dermatological conditions such as pigmentation or vascular disorders. Clinical dermatology lies on the boundary of aesthetic medicine but as the results gained from treating dermatological conditions most often have additional aesthetic benefits, it is clear that cosmetic and clinical dermatology are closely intertwined. These sessions also present innovations in treatments and in doing so give you essential knowledge and skills that you can apply to your everyday practice.

9

MARKETING & PRACTICE MANAGEMENT

It is rare to find an aesthetic practitioner of today who only performs procedures. The increase in the number of private clinics means that most practitioners also need to be astute business people. These sessions help you to understand the importance of digital communication: from creating the perfect website to managing your social media presence effectively. Furthermore, they cover the booming business of medspas along with an important update on the battle against the fake market in Asia.

10

BLEPHAROPLASTY

Blepharoplasty is an essential procedure in the repertoire of any plastic surgeon who operates in Asia. During the two hours dedicated to this subject, learn revised techniques for performing blepharoplasty for the upper and the lower eyelids. Also gain insights into the results desired by the Asian population and how best to achieve them

11

RHINOPLASTY

The nose is at the center of the face, so achieving great facial harmony often begins here. As ever, there are both invasive and non-invasive procedures to consider, so these sessions give you an understanding of all of the available options. A session dedicated entirely to the Asian nose gives you a greater understanding of the aesthetic look desired by the Asian population, thus enabling you to give your patients the results that they are looking for.

12

FACELIFT

Asian facial morphology requires a distinct approach when it comes to the facelift. It is vital to understand the desired outcome of the patient and, most importantly, how to achieve this. These sessions concentrate on the particularities associated with performing facelifts on Asian patients thus enabling you to approach the myriad of facelift techniques with confidence.

INTENSIVE COURSE

4 hours of lectures

Explore the science behind this significant new trend during this innovative half-day class!

Cosmeceuticals & anti-aging

LEARNING OBJECTIVES

Following these sessions the attendee should be able to:

- Identify the appropriate cosmeceuticals to use for a variety of dermatological indications
- Examine and assess practical clinical studies and treatment options in this sphere
- Understand and apply business development opportunities and legal issues in the cosmeceutical field

PROGRAM & EXPERTS

8:30 am to 9:30 am - R&D and fundamentals: face

CHAIRS: Uliana GOUT, Anak Agung Gde PUTRA WIRAGUNA

- > Cosmeceuticals in skin barrier Leihong Flora XIANG (26730 / 12min)
- > Nanotechnology-based cosmeceuticals Maria Vianney SANSAN (27397 / 12min)
- > Skin aging and skin barrier function Ashraf M BADAWI (26850 / 12min)
- > Combining cosmeceuticals with injectables for Asian skin Hema SUNDARAM (17640 / 12min)
- > Questions & answers

9:30 am to 10:30 am - Fundamentals & natural medicine

CHAIRS: Malavika KOHLI, Hema SUNDARAM

- > Pathophysiology of cellulite and possible role of cosmeceuticals Ashraf M BADAWI (26852 / 12min)
- > Managing rosacea with cosmeceuticals Uliana GOUT (27238 / 12min)
- > Topical administration of Bulung Boni against UV-B radiation to prevent skin aging Anak Agung Gde PUTRA WIRAGUNA (26316 / 12min)
- > The science behind herbal cosmeceuticals Patrick Po Han HUANG (26882 / 12min)
- > Questions & answers

11:00 am to 12:00 pm - Cosmeceuticals for skin whitening: do they really work?

CHAIRS: Thada PIAMPHONGSANT, Sri Aryani SUDHARMONO

- > Cosmeceuticals in whitening Leihong Flora XIANG (26728 / 12min)
- > Update on cosmeceuticals for skin lightening and pigmentation Mukta SACHDEV (26894 / 12min)
- > Practical topical therapy for melasma Thada PIAMPHONGSANT (26702 / 12min)
- > Cosmeceuticals for the treatment of melasma in Asians Chee Leok GOH (26236 / 12min)
- > Round table discussion: cosmeceuticals for skin whitening, do they really work?

12:00 pm to 1:00 pm - Cosmeceuticals for acne: are they really effective? CHAIRS: Ashraf M BADAWI, Chee Leok GOH

- > Update on dermocosmeceutics in acne Malavika KOHLI (26078 / 12min)
- > East Indian sandalwood oil for clinical acne improvement Adri Dwi PRASETYO (26802 / 12min)
- > The state of cosmeceuticals for acne healing Yulianto M LISTIAWAN (27092 / 12min)
- > Cosmeceuticals for the treatment of acne in Indonesia Andreas WIDIANSYAH (27100 / 12min)
- > Round table discussion: cosmeceuticals for acne are they really effective?

IMCAS ASIA 2015 \ 12 JULY 27 V32

SESSION 1

Live anatomy on cadaver: injectables & fat workshop

CHAIRS LEARNING OBJECTIVES

Benjamin ASCHER, Plastic Surgeon, FRANCE Hee Jin KIM, Anatomist, SOUTH KOREA Adri Dwi PRASETYO, Dermatologist, INDONESIA Frank ROSENGAUS, Facial Plastic Surgeon, MEXICO Jonathan SYKES, Facial Plastic Surgeon, USA Following this session the attendee should be able to:

- Apply a deepened knowledge of anatomical structures to their everyday practice
- Assess the best techniques to use when performing injections or lipofilling procedures
- · Avoid complications relating to injectables and fat transfer

PROGRAM & EXPERTS

Part 1 - Muscle and bone structures

- > Dissection on cadaver Philippe KESTEMONT (26942 / 15min)
- > Injections on living patient
 Daniel CASSUTO (26944 / 20min)
- > Expert opinion Upper face anatomy and advanced techniques Kuldeep SINGH (26350 / 5min)
- > Expert opinion Mid & lower face anatomy and advanced techniques Jonathan SYKES (26958 / 5min)
- > Questions & answers

Part 2 - Fat compartment & different locations for volumetry

- > Dissection on cadaver Philippe KESTEMONT (26946 / 10min)
- > Volumetric injections on living patient Tatjana PAVICIC (26948 / 20min)
- > Expert opinion Midface/orbit fat compartments and advanced techniques Thomas RAPPL (26950 / 5min)
- > Expert opinion Lower face & peribuccal area: fat compartments and advanced techniques Adri Dwi PRASETYO (26964 / 5min)
- > Questions & answers

Part 3 - Face anatomy to avoid complications

- > Dissection on cadaver Philippe KESTEMONT (26952 / 15min)
- > Injections on living patient Hema SUNDARAM (26954 / 20min)
- > Expert opinion Facial anatomy: inflammatory complications Raj ACQUILLA (26600 / 5min)
- > Expert opinion Facial anatomy: vascular complications Hee-Jin KIM (26956 / 5min)
- > Questions & answers

Round table discussion

5:30 PM to 7 PM

Asia-Pacific Market Perspectives

Economic Tribune

Open to exhibitors and delegates alike, the Asia-Pacific Market Perspectives session is guaranteed to bring you up-to-date on the development of the medical aesthetic market in Asia.

LEARNING OBJECTIVES

Following this session the attendee should be able to:

- Anticipate the future trends of the Asian medical aesthetic market with a focus on South East Asia
- Identify the differences between the Asian medical aesthetic market and other international aesthetic medical markets
- Understand the different approaches to the medical aesthetic market that doctors and members of the industry have

Part 1 > Market analysis

> Treating the wrinkles: concerns of the Asia-Pacific aesthetics market

by Sana SIDDIQUI, Financial Analyst, CANADA

> Fundamental dynamics and valuation trends of Asian medical aesthetics

by Jean-Yves COSTE, Financial Analyst, FRANCE

Part 2 > Face to face: industry vs doctors

Moderators: Laurent BRONES & Jean-Yves COSTE

Doctor panel:

- > Dr Patrick Po Han HUANG, Dermatologist, TAIWAN
- > Dr Florencio LUCERO, Plastic Surgeon, PHILIPPINES
- > Dr Adri PRASETYO, Dermatologist, INDONESIA

Industry panel:

- > Yongtai HOU, Board Chairman, Shanghai Haohai Biological Technology (Matrifill), CHINA
- > Scott MCLENNAN, Head of Regional Centre of Excellence, Galderma, HONG KONG
- > Robert RUCK, Executive Vice President Asia Pacific, Syneron, ISRAEL
- > Sana SIDDIQUI, Principal Consultant, Decision Resources Group, CANADA
- > Maor SINAI, Vice President Business Management APAC, Venus Concept, ISRAEL
- > Sarah WONG, APAC Regional Aesthetics Marketing Director, Merz, SINGAPORE

PROGRAM FRIDAY - ROOM 2

SESSION 03

8:30 AM 9:30 AM

Which laser, which parameters, for which indication?

CHAIRS: Hirotaka AKITA, Andreas WIDIANSYAH

- > Fractional therapy: what's the best indication? Tokuya OMI (25594/15 min)
- > Indication of collagen remodeling of the skin: fractional, non-ablative lasers vs other lasers Kuldeep SINGH (26622 / 15 min)
- > Indication of photodamaged skin: ablative fractional CO2 lasers vs IPL

Patrick Po Han HUANG (26266 / 15 min)

Round table discussion: what are the best machines & parameters for fractional therapy in collagen remodeling & photodamaged skin therapy?

SESSION 04

The science behind lipolysis

CHAIRS: Diane Irvine DUNCAN, Adri Dwi PRASETYO

9:30 AM 10:30 AM > Injectable lipolysis: where are we?

- Diane Irvine DUNCAN (31682 / 12 min)
 > Injectable lypolisys: benefits of local treatments
- and complications

 Igor RUDENKO (25248 / 12 min)
- > EBD vs injectables for lipolysis Benjamin ASCHER (26722 / 12 min)
- > EBD for lipolysis: an evidence-based approach
 Hema SUNDARAM (26876 / 12 min)

Questions & answers

SESSION 06

12 PM 1 PM

Injectables, lasers & EBD: neck and décolleté rejuvenation

CHAIRS: Gunawan BUDISANTOSO, Igor RUDENKO

- > Effects and risks of combinations of non-ablative lasers, IPL, microfocused ultrasound and injectables Tatjana PAVICIC (25838 / 12 min)
- > Lower face & neck rejuvenation: combining toxins and fillers

Peter Hsien Li PENG (25940 / 12 min)

- > Lower face & neck rejuvenation: combining injectables, radiofrequency and minimal invasive surgery

 Benjamin ASCHER (26726 / 12 min)
- > Today's technology for neck treatments Frank ROSENGAUS (27266 / 12 min)

Questions & answers

All submitted abstracts are available for consultation online at www.imcas.com through the digital program.

TEACHING COURSE 01

5:30 PM 7 PM

Lasers, EBD & pigmentation

DIRECTORS: Sri Aryani SUDHARMONO, Hema SUNDARAM

More info on page 30

SESSION 05

11 AM

12 PM

Lasers & EBD: different approaches in skin tightening

CHAIRS: Daniel CASSUTO, Andreas WIDIANSYAH

- > Bipolar radiofrequency with fractional photothermolysis for skin tightening in aged Asian skin Hirotaka AKITA (22252 / 12 min)
- > Fractional needle radiofrequency for acne scar Abraham ARIMUKO (26116 / 12 min)
- > Minimally invasive shaping of the jawline and neck: tricks and techniques Diane Irvine DUNCAN (23790 / 12 min)
- > Microfocused ultrasound for skin tightening: how effective is it?

Chiranjiv CHHABRA (26610 / 12 min)

Questions & answers

CONFLICT OF INTEREST DISCLOSURE

How does IMCAS broadcast the information to its speakers?

Scientific lectures are presumed to be based on objective interpretations of evidence and unbiased interpretations of facts. The integrity of our conference requires disclosure of the possibilities of potentially distorting influences. The audience may then judge and, if necessary, make allowance for the impact of the bias on the information being reported.

In general, the safest and most open course of action is to disclose activities and relationships that, if known to others, might be viewed as a conflict of interest, even if speakers do not believe that any conflict or bias exists.

This is why each speaker is asked to display his or her

How about speaker(s) declaring a "no Conflict of Interest"?

Neither the speaker nor any member of his/her immediate family has a significant financial arrangement or affiliation with the product, device or company involved in the congress nor any potential bias against another product, device or company.

JULY 27 V32 15 \ IMCAS AS/A 2015

PROGRAM FRIDAY - ROOM 3

SYMPOSIUM 02

Matrifill - 3 dimensional approach to facial aging with HA

9:30 AM 10:30 AM More info on page 35

SESSION 07

Live demonstration: fillers

CHAIRS: Thomas RAPPL, Kuldeep SINGH, Hema SUNDARAM

11 AM 1 PM

- > What's new in fillers in the era of microcannulae? Patrick Po Han HUANG (26270 / 10 min)
- > Live demonstration Matrifill HA Dermal filler -Happyface treatment Frank ROSENGAUS (26342 / 15 min)
- > Comments on demonstration Matrifill HA Dermal filler - Happyface treatment Nadia PERMATASARI (30712 / 15 min)
- > Live demonstration Galderma Restylane® Perlane® - HA filler Olivia ONG (27080 / 30 min)
- > What's new in fillers?
 Hema SUNDARAM (31680 / 10 min)
- > Debate: What is the best approach for the midface? Sharp needle vs cannula & perpendicular vs horizontal injection (27086 / 20 min)

Organisation: Successive 20 minute live demonstrations are transmitted from a local hospital treatment room. Chairmen and the audience are in direct contact with the expert performing the demonstration.

TEACHING COURSE 02

5:30 PM 7 PM

Breast augmentation

DIRECTORS: Stephanie Chuk Kwan LAM, Mark Richard MAGNUSSON

See full course details on page 30

S ASIA 2015 \ 16

PROGRAM FRIDAY - ROOM 4

SESSION 08

Vulvovaginal treatments

CHAIRS: Steven R COHEN, Lokesh KUMAR

8:30 AM 9:30 AM

- > Defining a specific HA vs fat for vulvovaginal discomfort treatment Bernard MOLE (27022 / 12 min)
- > Use of non-invasive devices in vaginal tightening and external genitalia rejuvenation Diane Irvine DUNCAN (26902 / 12 min)
- > Fractional laser for skin resurfacing and vaginal reiuvenation Wenny TAN (27094 / 12 min)
- > Wedge labioplasty for labial hypertrophy Mark Richard MAGNUSSON (26884 / 12 min)

Questions & answers

SESSION 12

2 PM

3 PM

Non-invasive body shaping

CHAIRS: Richard ABS, Chih Hsun Jason YANG

- > Body contouring using energy devices Taro KONO (24216 / 12 min)
- > Thermal non-invasive body shaping Diane Irvine DUNCAN (30958 / 12 min)
- > Cryolipolysis A new method of bodysculpting: how satisfying is it? Chiranjiv CHHABRA (26616 / 12 min)
- > How to decrease fat tissue with needle Igor RUDENKO (27336 / 12 min)

Questions & answers

SESSION 09

9:30 AM

10:30 AM

Breast augmentation: which approach, which implant, for which indication?

CHAIRS: Michel ROUIF. Constantin STAN

- > Planning your first breast augmentation Lokesh KUMAR (24260 / 12 min)
- > Choosing the correct implant for breast augmentation Nimrod FRIEDMAN (23544 / 12 min)
- > Breast augmentation vs breast aesthetic reconstruction Constantin STAN (24422 / 12 min)
- > Refinements in transaxillary submuscular augmentation mammoplasty Florencio Quiogue LUCERO (24878 / 12 min)

Round table discussion: which approach, which implant and for what indication?

SESSION 13

3 PM

4 PM

New approach for buttock & leg definition

CHAIRS: Sebastien GARSON, Constantin STAN

> Buttock implants and calf implants in body contouring

Richard ABS (27002 / 12 min)

- > Buttock augmentation using implant and intramuscular pocket: our experience of 90 cases Van Thang NGUYEN (26890 / 12 min)
- > Brazilian butt lift expanding the limits of large volume

Daniel DEL VECCHIO (26286 / 12 min)

> Gluteal augmentation and enhancement by combination of fat transplantation and liposuction Gilbert ZAKINE (26156 / 12 min)

Questions & answers

SESSION 10

Mastopexy: facts, trends and **limitations**

11 AM 12 PM

CHAIRS: Mark Richard MAGNUSSON, Van Thang NGUYEN

- > Combined treatment for breast augmentation and lift Gilbert ZAKINE (26168 / 12 min)
- > Lipomodeling in mastopexy Sebastien GARSON (23596 / 12 min)
- > A new approach for multiplane breast mastopexy

Constantin STAN (24428 / 12 min)

> Safety and accuracy of the "dermal vault technique" in breast augmentation with mastopexy Michel ROUIF (25272 / 12 min)

Questions & answers

SESSION 14

4 PM

5 PM

Clinical dermatology: vascular

CHAIRS: Abraham ARIMUKO, Yulianto M LISTIAWAN

> 2015 updates on facial vein treatment Chih Hsun Jason YANG (28816 / 12 min)

- > Laser treatment of vascular lesions Taro KONO (24222 / 12 min)
- > Expanding use of the pulsed dye laser in vascular dermatology

Chee Leok GOH (26240 / 12 min)

> PWS and laser: which duration and size? Leihong Flora XIANG (26756 / 12 min)

Questions & answers

SESSION 11

Surgical body contouring

CHAIRS: Daniel DEL VECCHIO, Tatsuro KAMAKURA

12 PM 1PM

> Brachioplasty with supralymphatic dissection after massive weight loss

Gilbert ZAKINE (26160 / 12 min)

- > Surgical body shaping with and without lipofilling Sebastien GARSON (26748 / 12 min)
- > Does macro fat grafting really improve surgical body shaping?

Michel ROUIF (26752 / 12 min)

> Combining radiofrequency with liposuction & body contouring Steven R COHEN (26750 / 12 min)

Questions & answers

TEACHING COURSE 03

5:30 PM **7 PM**

Clinical dermatology: treating pigmentation without laser

DIRECTORS: David Sudarto OEIRIA, Leihong Flora XIANG

See full course details on page 31

SESSION 15

8:30 AM 9:30 AM

From anatomy to upper face rejuvenation

CHAIRS: Peter Hsien Li PENG, Igor RUDENKO

- > Know your anatomy: an anatomical basis for successful upper face injections Jonathan SYKES (23196 / 12 min)
- > Orbital & periorbital combined treatments Hee-Jin KIM (26150 / 12 min)
- > Upper face rejuvenation with fillers: the right and wrong techniques explained with 3D movies Nimrod FRIEDMAN (23564/12 min)
- > Upper facial aging: is collagenic induction another option?

Bernard MOLE (25456 / 12 min)

Questions & answers

SESSION 19

2 PM 3 PM

Avoiding adverse reactions to toxin injections

CHAIRS: Sjarief HIDAYAT, Bernard MOLE

- > Difficult anatomical locations for toxin injections
 Thomas RAPPL (27342 / 12 min)
- > Anatomical data on the adverse reaction after toxin injections

Hee-Jin KIM (24170 / 12 min)

- > No more Spock & Co How anatomy and injection technique help to prevent and correct Tatjana PAVICIC (26776 / 12 min)
- > Weakness of Muller's muscle after toxin injections: how to prevent and treat this complication Igor RUDENKO (25266 / 12 min)

Questions & answers

SESSION 16

9:30 AM 10:30 AM

From anatomy to midface & nose rejuvenation

CHAIRS: Raj ACQUILLA, Malavika KOHLI

- > Mastering the art of midface volume Frank ROSENGAUS (25398 / 12 min)
- > All about cheekbones: Asian vs Caucasian approach Stephanie Chuk Kwan LAM (26246 / 12 min)
- > My thoughts on fillers on Midface in Asians Steven LIEW (30898 / 12 min)
- > Update in midface injections Daniel CASSUTO (26274 / 12 min)

Questions & answers

SESSION 20

3 PM 4 PM

The art of perfect lips: Caucasian vs Asian

CHAIRS: David Sudarto OEIRIA, Kuldeep SINGH

- > Secrets of lip rejuvenation: tips and tricks to natural yet beautiful lips

 Uliana GOUT (25040 / 10 min)
- > How to add volume making thick Asian lips smaller Peter Hsien Li PENG (25928 / 10 min)
- > Rejuvenation in older lips and enhancement in younger lips Malavika KOHLI (26082 / 10 min)
- > Lips lifting: the moustache flap Bernard MOLE (25396 / 10 min)
- > Lip and perioral beautification 6 point strategy Raj ACQUILLA (26520 / 10 min)

Questions & answers

SESSION 17

11 AM

12 PM

From anatomy to lower face & neck rejuvenation

CHAIR: Chiranjiv CHHABRA

- > An update in oral commissures and marionette lines Frank ROSENGAUS (25352 / 10 min)
- > Anatomy for lower face & neck injections Hee-Jin KIM (27340 / 10 min)
- > Lower face contouring with toxin Kyle Koo II SEO (30796 / 10 min)
- > Jawline contouring with hyaluronic acid fillers: tips and tricks

Uliana GOUT (25054 / 10 min)

> Working with modiolus: combination of techniques for male and female patients Igor RUDENKO (25220 / 10 min)

Questions & answers

TEACHING COURSE 04

4:30 PM 6 PM

Periorbital combined treatments

DIRECTORS: Patrick Po Han HUANG, Adri Dwi PRASETYO

SESSION 18

Nodules & injectable complications

CHAIRS: Sri ELLYANI, Mukta SACHDEV

12 PM 1 PM

- > PLLA filler complication Stephanie Chuk Kwan LAM (26254 / 12 min)
- > Management of nodes filler complications Bernard MOLE (25446 / 12 min)
- > How to deal with nodes and granulomas?

 Daniel CASSUTO (26276 / 12 min)
- > Complications from permanent fillers John Hinton FLYNN (26234 / 12 min)

Questions & answers

PROGRAM SATURDAY - ROOM 2

SESSION 21

Meet the experts: alopecia

Asian fake market: 2015 update

8:30 AM 9:30 AM CHAIRS: Gunawan BUDISANTOSO, Thada PIAMPHONGSANT, Chuchai TANGLERTSAMPAN CHAIRS: Benjamin ASCHER, Sjarief HIDAYAT, Florencio Quioque LUCERO

> Low level laser / light therapy for androgenetic alopecia: what's the evidence? Chuchai TANGLERTSAMPAN (23078 / 15 min)

- > Australian point of view **1PM** John Hinton FLYNN (26978 / 10 min)
- > The treatment of cicatricial alopecia with partial longitudinal – follicular unit transplantation (PL-FUT)

> Fake market coalition Benjamin ASCHER (26980 / 10 min)

> Hair stem cell transplantation

> Indonesian point of view: update on marketing of counterfeit aesthetic products in Asia

Gunawan BUDISANTOSO (27344 / 15 min)

David Sudarto OEIRIA (26210 / 10 min)

Peer-to-peer discussion and questions & answers

> Philippines point of view: the fake aesthetic surgery

Coen GHO (28643 / 15 min)

Florencio Quioque LUCERO (27852 / 10 min)

SESSION 22

Medical & surgical male treatments

> Hong Kong point of view: introduction on the market

9:30 AM

CHAIRS: Abraham ARIMUKO, Daniel DEL VECCHIO

Stephanie Chuk Kwan LAM (26260 / 10 min)

> Penoplasty - A 25 years experience 10:30 AM

Questions & answers

Maurizio VIEL (22492 / 12 min)

IMCAS Asia Gala Dinner will be held on Saturday August 1st, at 8 PM at the Laguna Hotel Beachside in Bali.

After a light sunset cocktail enjoy a 3-course menu while enjoying local ambiance and live music.

A few spots are still available for 150USD at the Welcome Desk

A shuttle bus will be departing from Westin & Grand Hyatt at 7:45 PM & 8 PM

Dress code: Summer & light clothing

PROGRAM SATURDAY - ROOM 4A

SESSION 28

Blepharoplasty & upper face surgery

CHAIRS: Ying Che HSU, Steve Chuan Hsiang KAO

8:30 AM 9:30 AM

- > A simple upper blepharoplasty for Asians Florencio Quioque LUCERO (24876 / 12 min)
- > Assessment of the lid / brow balance: selecting the appropriate periorbital rejuvenation Mark Richard MAGNUSSON (26332 / 12 minl
- > Double eyelid surgery in Japan (buried suture method)

Yoshio IKEDA (27313 / 12 min)

> The anatomy and biomechanics of brow lifting & upper blepharoplasty Jonathan SYKES (23194 / 12 min)

Questions & answers

SESSION 31

12 PM 1PM

Rhinoplasty: the Asian nose (in collaboration with the TAFPRS)

CHAIRS: Tony Yu Hsun CHIU, Steve Chuan Hsiang KAO

- > Presentation of TAFPRS Steve Chuan Hsiang KAO (27048 / 05 min)
- > Asian rhinoplasty with autogenous costal cartilage Steve Chuan Hsiang KAO (24072 / 12 min)
- > Autologous rhinoplasty in Asians Tony Yu Hsun CHIU (23286 / 12 min)
- Treatment of the deviated and short nose Jonathan SYKES (23202 / 12 min)
- Improve facial attractiveness: rhinoplasty with lip lift procedure Ying Che HSU (26826 / 12 min)

Questions & answers

SESSION 29

Mastering the lower blepharoplasty

CHAIRS: Yoshio IKEDA, Cuong NGUYEN XUAN

9:30 AM 10:30 AM

- > Closed blepharoplasty with optic fiber Daniel CASSUTO (26278 / 12 min)
- > Handling of periorbital fats in blepharoplasty Florencio Quiogue LUCERO (24882 / 12 min)
- > Fat redistribution in lower blepharoplasty Lee KIM SIEA (27862 / 12 min)
- > Lower blepharoplasties and micro autologous fat grafting: new tools and refinements for a delicate procedure Michel ROUIF (25268 / 12 min)

Questions & answers

SESSION 32

2 PM **3 PM**

Asian rhinoplasty (in collaboration with the HSPAS)

CHAIRS: Hanh LE, Van Thang NGUYEN

- > Presentation of HSPAS Hanh LE (27038 / 05 min)
- > Modern restructural rhinoplasty for the treatment of Oriental contracted noses Hanh LE (23844 / 12 min)
- > Importance of proper diagnosis to improve your results in rhinoplasty Lokesh KUMAR (24264 / 12 min)
- > Asian structural rhinoplasty; my preliminary results Van Thang NGUYEN (26888 / 12 min)
- > Correction of the deviated tip and columella Man Koon SUH (24402 / 12 min)

Questions & answers

SESSION 30

11 AM 12 PM

How far can medical rhinoplasty go?

CHAIRS: Steven R COHEN, Steven LIEW, Patrick Po Han HUANG

- > Modern rhinoplasty: medical vs surgical approach Tony Yu Hsun CHIU (23276 / 12 min)
- > Asian rhinoplasty Medical vs surgical to refine the nose

Gilbert ZAKINE (28648 / 12 min)

- > Injection rhinomodulation 8 point technique using botulinum toxin type A and HA Rai ACQUILLA (26524 / 12 min
- > Nasal remodeling with HA Can we make it safe? Frank ROSENGAUS (25386 / 12 min)

Debate and questions & answers

Interested in rhinoplasty? Study this topic in even more depth at the video-based Teaching Course on Saturday from 4:30 PM to 6 PM in Room 4B.

SESSION 33

3 PM 4 PM

Mid / lower facelift and neck lift: Asian trends

CHAIRS: Hee-Jin KIM. Maurizio VIEL

- > Further refinements in the marionette browlift: simplicity, precision and new choices in vectors Steven R COHEN (26094 / 12 min)
- > Optimal frontofacial full facelift in Orientals Hanh I F (23864 / 12 min)
- > Deep plane facelift: a better technique for the Asian face
 - Florencio Quiogue LUCERO (24880 / 12 min)
- > Facial implants: excellent alternative to osteotomies Lokesh KUMAR (24270 / 12 min)

Questions & answers

TEACHING COURSE 07

Asian facelift and profiloplasty

DIRECTORS: Benjamin ASCHER, Jonathan SYKES

4:30 PM 6 PM

See full course details on page 33

IMCAS ASIA 2015 JULY 27 V32

2小时的中国大师课程

由国际专家为中国医生演讲

2-HOUR CHINESE MASTERCLASS

BY INTERNATIONAL EXPERTS FOR CHINESE DOCTORS

8:30 AM 10:30 AM

官方语言:中问 同声翻译:从英文到中文 Official language: CHINESE Translation provided from English to Chinese

CHAIRS / 主席

Patrick Po Han HUANG, Thomas RAPPL, Weimin SONG, Flora Leihong XIANG

- > East Asian male attractiveness and how to approach it 东亚男性魅力及如何做到 Patrick Po Han HUANG (30198 / 12 min)
- Asian acne scars From peeling to fractional CO2 laser & antioxidant skin care
 亚洲人皮肤痤疮瘢痕 从化学剥脱到点阵激光 & 抗氧化皮肤保护
 Weimin SONG (30664 / 12 min)
- > Injectables in Asian vs Caucasian 充填剂用途: 亚洲人对比高加索人 Raj ACQUILLA (28820 / 12 min)
- > An Asian approach for pigmentation disease 亚洲方法治疗皮肤色素沉着 Leihong Flora XIANG (30666 / 12 min)
- > What's new in toxin in 2015 China and the rest of the world 2015肉毒毒素新发现 中国及其他国家 Benjamin ASCHER (30662 / 12 min)
- > EBD and skin tightening for the face: a comparative approach Asian vs Caucausian 光电仪面部除皱: 亚洲人对比高加索人 Diane Irvine DUNCAN (28822 / 12 min)

Questions & answers 问答

SESSION 34

11 AM 12 PM

Clinical dermatology: PDT

CHAIRS: Tokuya OMI, Chih Hsun Jason YANG

- > Photodynamic therapy for acne and rosacea Sachiko ASAYAMA (24224 / 12 min)
- > Photodynamic therapy in photoaging Leihong Flora XIANG (26102 / 12 min)
- > Role of photodynamic therapy in acne vulgaris Chee Leok GOH (27074 / 12 min)
 - TBA

Abraham ARIMUKO (28656 / 12 min)

Questions & answers

SYMPOSIUM 07

Galderma - Optimize treatment results with Restylane® range

12 PM 1 PM More info on page 35

SYMPOSIUM

08

Jeisys - Combination of RF & HIFU and treating pigmentation

2 PM 3 PM More info on page 35

SYMPOSIUM

09

Merz - Aesthetic management paradox: effective treatments yet sub-optimal outcomes - How to address these challenges?

3 PM 4 PM

More info on page 35

TEACHING COURSE 08

Rhinoplasty

DIRECTORS: Frank ROSENGAUS, Man Koon SUH

4:30 PM 6 PM See full course details on page 33

PROGRAM SUNDAY - ROOM 1

SESSION 35

8:30 AM

9:30 AM

Injectables to treat scars and wound care

CHAIRS: Diane Irvine DUNCAN, Mukta SACHDEV

- > Multidimensional approach in treating acne and scar Malavika KOHLI (27870 / 12 min)
- > Platelet-rich plasma and growth factors in scar healing

Gilbert ZAKINE (27868 / 12 min)

- > Hypertrophic scars: laser vs injectables Thomas RAPPL (27010 / 12 min)
- > Toxins for acne scarring
 Kuldeep SINGH (26626 / 12 min)

Questions & answers

SESSION 38

1PM 2PM

Combined treatments with injectables (in collaboration with the ACCS)

CHAIRS: John Hinton FLYNN, Frank ROSENGAUS

- > Presentation of ACCS

 John Hinton FLYNN (27408 / 05 min)
- > Structural filling and facial modeling with volumizing products

 John Hinton FLYNN (26228 / 12 min)
- > Combined treatments for the midface Frank ROSENGAUS (31684 / 12 min)
- > Combined treatments for the lower face Malavika KOHLI (27396 / 12 min)
- > Combination use of fillers and lasers in the perioral area

 Irene KUSHELEW (27826 / 12 min)

Questions & answers

SESSION 36

9:30 AM

10:30 AM

Injectables and vascular complications: fighting this growing issue

CHAIRS: Raj ACQUILLA, Mark Richard MAGNUSSON

> Deep investigation of ichemic reaction after filler injection

Igor RUDENKO (25212 / 12 min)

- > From anatomy to vascular complications after injectable treatments

 Hee-Jin KIM (24172 / 12 min)
- > Filler complications: avoidance and treatment of vascular compromise

 Tatiana PAVICIC (25814 / 12 min)
- > Treating and avoiding serious vascular complications of filler injection Peter Hsien Li PENG (25944 / 12 min)

Questions & answers

SESSION 37

11 AM 1 PM

Novel concepts and cutting-edge techniques of injectables (in collaboration with the TDA)

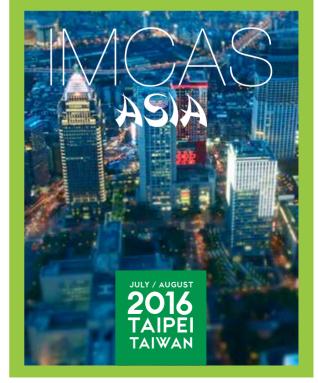

CHAIRS: Patrick Po Han HUANG, Chih Hsun Jason YANG

- > Presentation of TDA
 Patrick Po Han HUANG (27054 / 05 min)
- > Presentation of TDA
 Chih Hsun Jason YANG (27392 / 05 min)
- > The role of dermal HA injection following fractional lasers for skin rejuvenation
 Patrick Po Han HUANG (26830 / 15 min)
- > Focus on tweaking the smile with toxin alone or in combination with HA Kuldeep SINGH (26624 / 15 min)
- > Facial analysis: important parameters for the choosing the right filler Daniel CASSUTO (27384/15 min)
- > Anatomical landmarks for a correct filler placement to avoid possible complications Thomas RAPPL (27386 / 15 min)
- > The new science of fillers and Asian aesthetics Hema SUNDARAM (26842 / 12 min)
- > Masseteric injection: an overview Stephanie Chuk Kwan LAM (26256 / 12 min)
- > Latest advanced and knowledge in dorsal hand rejuvenation

Uliana GOUT (27388 / 12 min)

Questions & answers

Don't miss IMCAS Asia 2016 which will take place in the city of Taipei, Taiwan. This 10th anniversary edition will be supported by the Taiwanese national associations of dermatology (TDA), and facial plastic surgery (TAFPRS).

PROGRAM SUNDAY - ROOM 2

SESSION 39

Lasers to treat scars

CHAIRS: Daniel CASSUTO, Sri Aryani SUDHARMONO

8:30 AM 9:30 AM

- > Scar treatment by fractional lasers Sachiko ASAYAMA (24236 / 10 min)
- > Management of scars with 5-FU through injection and laser-assisted delivery Patrick Po Han HUANG (26262 / 10 min)
- > Fractional RF in the treatment of acne scar Leihong Flora XIANG (26106 / 10 min)
- > Scar management using pulsed dye laser and fractional devices Taro KONO (24218 / 10 min)

Questions & answers

SESSION 40

Radiofrequency & microneedling

CHAIRS: Abraham ARIMUKO, Bernard MOLE

9:30 AM 10:30 AM

- > Monopolar radiofrequency vs bipolar radiofrequency with microneedling: a subjective comparative study Chiranjiv CHHABRA (26614 / 12 min)
- > Microneedling combined with a new bone marrow growth factor topical with no prep kit Diane Irvine DUNCAN (23774 / 12 min,
- > New and emerging concepts in microneedling Hema SUNDARAM (22160 / 12 min)
- > The limits and side effects of microneedling Sebastien GARSON (26990 / 12 min)

Questions & answers

SESSION 41

What's new in lasers & EBD?

CHAIRS: Sachiko ASAYAMA, Chiranjiv CHHABRA

11 AM 12 PM

- > What's new in radiofrequency? Ashraf M BADAWI (27374 / 12 min)
- > What's new: nanosecond vs picosecond laser in tattoo removal Taro KONO (24214 / 12 min)
- > What's new in focus ultrasonic treatments? Diane Irvine DUNCAN (27376 / 12 min)
- > What's new in laser & pigmentation? Hirotaka AKITA (26154 / 12 min)

Questions & answers

SESSION 42

rejuvenation 12 PM

1PM

CHAIRS: Peter Hsien Li PENG, Maurizio VIEL

Treatment strategies for hand

- > Hand rejuvenation with fillers Anatomy based pro and contras of different injection techniques Tatjana PAVICIC (26996 / 12 min)
- > How anatomy allows you to avoid complications? Benjamin ASCHER (26994 / 12 min)
- > What technique for what indication? John Hinton FLYNN (26230 / 12 min)
- > Volumetric hand rejuvenation Anatomy and techniques

Thomas RAPPL (28650 / 12 min)

Questions & answers

SESSION 43

1PM

2 PM

Laser treatment of Asian pigmentation disorders

CHAIRS: Ashraf M BADAWI, Yoko FUNASAKA

- > How to avoid complications while treating pigmentation with laser? David Sudarto OEIRIA (26208 / 12 min)
 - > Micropulse Alexandrite laser treatment of solar lentiqines in Asians Taro KONO (30718 / 12 min)
- > Is there a role of laser and light devices in the treatment of melasma? Chee Leok GOH (26244 / 12 min)
- > Combined treatment for tattoo removal using fractional CO2 and Q-switched Nd:YAG laser Yulianto M LISTIAWAN (26084 / 12 min)

Questions & answers

PROGRAM SUNDAY - ROOM 3

SESSION 44

Thread lift: tips, tricks and limitations

CHAIRS: Lee KIM SIEA, Constantin STAN

8:30 AM 9:30 AM

- > Thread lift technique in Indonesia

 David Sudarto OEIRIA (25912 / 10 min)
- > Threads lift sutures in the mid face area -Tips and tricks Constantin STAN (30956 / 10 min)
- > PDO thread The complication and its management Abraham ARIMUKO (26114 / 10 min)
- > Thread techniques and patient selection in Taiwan Peter Hsien Li PENG (26998 / 10 min)

Debate: what are the real improvements after a thread lift intervention and how long do these last?

12 PM 1 PM

SESSION 47

Research & development: aging process

CHAIRS: Sebastien GARSON, Anak Agung Gde PUTRA WIRAGUNA

- > Anthropological characteristics of the Korean skull and face
 - Hee-Jin KIM (26148 / 12 min)
- > The skeletal changes of aging and how this relates to non-surgical rejuvenation Mark Richard MAGNUSSON (26330/12 min)
- > New concepts in facial rejuvenation Ashraf M BADAWI (22742 / 12 min)
- > Aging & pigmentation fundamentals Leihong Flora XIANG (26110 / 12 min)

Questions & answers

SESSION 45

9:30 AM 10:30 AM

Pigmentation in Asian skin (in collaboration with the JSAD)

CHAIRS: Uliana GOUT, Malavika KOHLI, Tokuya OMI

- > Presentation of JSAD Tokuya OMI (27044 / 05 min)
- > Laser therapy for pigmented lesions: a histological point of view

 Tokuya OMI (26698 / 10 min)
- > Low power Q-switched Nd:YAG laser for melasma (not melanoma) Hirotaka AKITA (26136 / 10 min)
- > What's the latest in darker skin? Mukta SACHDEV (24956 / 10 min)
- > Whitening agents: basics and therapeutics Yoko FUNASAKA (26182 / 10 min)
- > Chemical peeling therapy Yuki YAMAMOTO (26534 / 10 min)

Questions & answers

SESSION 48

1PM 2PM

Research & new technologies

CHAIR: Michel ROUIF, Kuldeep SINGH

- > Characterization and immunotypic features of human umbilical cord blood lymphocytes utilizing flow cytometery Habib TORFI (31082 / 12 min)
- 11abib 10H11 (310827 12 min)
- > Spectrum: a novel multi-wavelength laser platform for enhanced photoselectivity Paolo COSSICH (29861 / 12 min)
- > Novel high intensity focused ultrasound Won Serk KIM (27879 / 12 min)
- > Evaluation of absorbable dermal staples in mammoplasties and abdominoplasties Thierry BRON (31368 / 12 min)

Questions & answers

This session presents a range of new technologies. The aim is to present the technology and fundamentals of the product/ device itself rather than the clinical application on patients.

SESSION 46

11 AM 12 PM

Chemical peels from A to Z (in collaboration with the IPS)

CHAIRS: Uliana GOUT Tatjana PAVICIC, Leihong Flora XIANG

- > Presentation of IPS
 Tatjana PAVICIC (27036 / 05 min)
- > Chemical peels in treatment of melasma and hyperpigmentation - What to combine and how? Tatjana PAVICIC (26938 / 12 min)
- > A-Z of the basics in chemical peels Uliana GOUT (25110 / 12 min)
- Newer peels for melasma: the truth based on EBD Mukta SACHDEV (24954 / 12 min)
- Newer peels for difficult and stubborn indications: analysis of results Malavika KOHLI (28652 / 12 min)

Questions & answers

SESSION 49

Liposuction: when, why and how?

CHAIRS: Sebastien GARSON, Michel ROUIF

8:30 AM 9:30 AM > SST: a dominant technique in large volume fat transplantation

Daniel DEL VECCHIO (30794 / 12 min)

> The new frontiers for shaping the male body with liposuction

Nimrod FRIEDMAN (23554 / 12 min)

> Small volume liposuction with an off-the-shelf disposable kit: the value proposition for volumization with natural fillers

Steven R COHEN (26100 / 12 min)

> Liposuction and mini abdominoplasty Stephanie Chuk Kwan LAM (26248 / 12 min)

Questions & answers

PRP & dermal fillers

SESSION 52

12 PM

1PM

Lipofilling: body & breast

CHAIRS: Lee KIM SIEA, Bernard MOLE

> Fat grafting to the breast: a ten year experience in over 500 cases

Daniel DEL VECCHIO (26288 / 12 min)

> Optimization of autologous adipose-derived regenerative cells in fat grafting for breast augmentation

Tatsuro KAMAKURA (27024 / 12 min)

> Hi-def liposculpture: bringing art to the average liposuction procedure

Steven R COHEN (26096 / 12 min)

> Cell enriched lipotransfer to breasts Lee KIM SIEA (30876 / 12 min)

Questions & answers

SESSION 50

10:30 AM

9:30 AM (in collaboration with the JSAS) CHAIRS: Steven R COHEN, Yoshio IKEDA, Tatsuro KAMAKURA

Tatsuro KAMAKURA

> Presentation of JSAS
Tatsuro KAMAKURA (27046 / 05 min)

> Cell therapies in plastic surgery: do they make sense? Steven R COHEN (27000 / 12 min)

Innovative therapy with PRP and basic fibroblast growth factor in Japanese facial rejuvenation Kazuhiko MAEDA (26908 / 12 min)

> Filler injections using the finest needle in the world vs PRP

Yoshio IKEDA (26906 / 12 min)

Questions & answers

SESSION 53

Further studies in hyperhidrosis

CHAIRS: Cuong NGUYEN XUAN, Igor RUDENKO

1 PM 2 PM

- > Botulinum toxin therapy for axilla hyperhidrosis Tokuya OMI (27398 / 12 min)
- Non-invasive treatment of bromidrosis by microwave-based device vs suction-assisted subcutaneous shaver Chih Hsun Jason YANG (22382 / 12 min)
- > Botulinum toxin type A injections vs sweat gland suctioning: what is more effective? Thomas RAPPL (30292 / 12 min)
- > A new indication for axillar and scalp hyperhydrosis David Sudarto OEIRIA (27824 / 12 min)

Questions & answers

LANGE TO A ELECTRICAL CONTRACTOR LIMITERS

SESSION 51

Lipofilling: face

CHAIRS: Stephanie Chuk Kwan LAM, Gilbert ZAKINE

11 AM 12 PM

- > Lipofilling in facial rejuvenation: what's new? Thomas RAPPL (27004 / 12 min)
- > Adipose derived stem and regenerative cells in facial rejuvenation: new strategies for replacement and regeneration of soft tissues

 Steven R COHEN (26092/12 min)
- > Expanded mesenchymal stem cells for fat grafting for the face - A new technique Maurizio VIEL (22484 / 12 min)
- > Use of autologous fat transplantation for facial contouring and rejuvenation

 Hanh LE (23828 / 12 min)

Questions & answers

GET YOUR CERTIFICATE OF ATTENDANCE

Fill in the evaluation form and get your IMCAS ASIA 2015 Certificate of Attendance

Step 1: Submit your evaluation
• either on site at the e-learning station
• or online by September 1 at the latest at www.imcas.com

Step 2: Receive your Certificate of Attendance

• within the following 10 days by e-mail in PDF format

PROGRAM SUNDAY - ROOM 4B

SESSION 54

Contributing lectures: surgery

CHAIRS: Tony Yu Hsun CHIU, Christiane ERMISCH

8:30 AM 9:30 AM

- > Llifting of the lower eyelid: sub-cutaneous blepharoplasty Daniel CATALDO (26222 / 10 min)
- > Correction of alar retraction Steve Chuan Hsiang KAO (24078 / 10 min)
- > Tricks and techniques in facial flap: how to achieve natural results

Christiane ERMISCH (26180 / 10 min)

> Pearls and caveats for optimal results in fat grafting for facial rejuvenation

Francis M DECANGCHON JR (30689 / 10 min)

> Large volume fat transplantation and emerging techniques in the buttock

Daniel DEL VECCHIO (26284 / 10 min)

Questions & answers

SESSION 55

9:30 AM

10:30 AM

Contributing lectures: injectables & regenerative medicine

CHAIRS: Nimrod FRIEDMAN, David Sudarto OEIRIA

> Follicular stem cells in cosmetic & regenerative medicine

Coen GHO (28813 / 12 min)

> Synergistic rejuvenation with different injectables: combination treatment

Peter Hsien Li PENG (25934 / 12 min)

> A prospective, multicenter study of HA injectable gel for malar volumizing in Chinese subjects Yi JIA (29855 / 12 min)

> Avoiding complications - Where to and where not to inject

Raj ACQUILLA (26530 / 12 min)

Questions & answers

SESSION 56

Contributing lectures: lasers & EBD

CHAIRS: Yulianto M LISTIAWAN, Andreas WIDIANSYAH

11 AM 12 PM

> The diagnosis of facial pigmentation with imaging equipment

Hirotaka AKITA (22258 / 12 min)

> Application of the 2.940 nm Er:YAG laser in the daily practice: from classical ablative treatments to laser assisted drug delivery

Peter Arne GERBER (27831 / 12min)

- > Analysis of low level Nd:YAG laser therapy: a useful therapeutic approach for sensitive skin Weimin SONG (27881 / 12 min)
- > Photodynamic therapy using indocyanine green and long-pulsed diode laser for acne vulgaris Won Serk KIM (26315 / 12 min)

Questions & answers

Built from a call for abstract submissons, these sessions gather lectures from physicians from all over the world attending our conference. Updated topics will be covered during each short presentation, allowing lecturers to share their experience with the audience.

SESSION 57

12 PM 1 PM

Lasers & EBD techniques for acne and scars

CHAIRS: Taro KONO, Mukta SACHDEV

- > Laser for acne scars: what's the danger? Kuldeep SINGH (26618 / 12 min)
- > Pulsed dye laser treatment for acne and acne scar Taro KONO (30686 / 12 min)
- > EBD & laser for acne scars in skin of colour Mukta SACHDEV (30728 / 12 min)
- > Laser treatment of scars: ablative or non-ablative?

 Daniel CASSUTO (26272 / 12 min)

Questions & answers

SESSION 58

Laser hair removal for Asian skin

CHAIRS: Sachiko ASAYAMA, Yulianto M LISTIAWAN

1PM 2PM

- > Laser for facial unwanted hair Yulianto M LISTIAWAN (27090 / 12 min)
- > Combined diode laser for hair removal in Asian skin Andreas WIDIANSYAH (27098 / 12 min)
- > New technology for hair removal in skin of colour Mukta SACHDEV (24952 / 12 min)
- > Various laser modalities available for hair removal in Asian skin Sri FLLYANI (27390 / 12 min)

Questions & answers

27 \ IMCAS ASIA 2015

PROGRAM VIDEO PAPERS

Video papers are given in the exhibition hall, facing a camera. These presentations are filmed and delegates can watch the presentation live at the video paper stage of the exhibition hall.

FRIDAY

9:30 AM 3:30 PM

Industry guest lectures

- 9:45 AM Industry guest lecture Thermiaesthetics First injectable radiofrequency: ThermiRF™, ThermiRase™, ThermiTight™

 Steven R COHEN (26388 / 15 min)
 - 10 AM Industry guest lecture Zeltiq My experience with CoolSculpting®

 Tingsong LIM (26372 / 15 min)
- 10:15 AM Industry guest lecture Won Tech -Experience premier HIFU technology Yulianto M LISTIAWAN (26356 / 15 min)
 - 11 AM Industry guest lecture Merz Ultherapy as a complimentary treatment for achieving facial harmony and balance Tatjana PAVICIC (26386 / 15 min)
- 11:15 AM Industry guest lecture Cynosure New revolutionary rejuvenation technique in
 Asian skin: improved pigmentation, pore size
 and fine wrinkle using 755 nm picosecond
 laser with focus lens array
 Kuo Liang Carl CHENG (26368/15 min)
- 11:30 AM Industry guest lecture Jeisys Laser for skin resurfacing and vaginal tightening Wenny TAN (26366 / 15 min)
- 11:45 AM Industry guest lecture Syneron Candela VelaShape™ III

 Benjamin ASCHER (26380 / 15 min)
 - 12 PM Industry guest lecture Venus Concept -Nano fractional RF for skin rejuvenation and scar treatments Sri Aryani SUDHARMONO (26362 / 15 min)
- 12:30 PM Industry guest lecture N finders Facial rejuvenation with multiple bidirectional cog (multiple cog thread) PDO thread Summary of histological findings and multiple growth factor evaluation results

 Jeung Hyun YOON (26390 / 15 min)
- 12:45 PM Industry guest lecture PT Pro-health international Laminin 5, reinforcing dermal epidermal junction to accelerate skin repair Kristian SANJAYA (27240 / 15 min)
 - 2 PM Industry guest lecture Melsmon PT
 Millennia concepts How to use placenta
 extract in aesthetic and anti-aging treatment
 Wiwi Andralia KARTOLO (26398 / 15 min)
- 2:15 PM Industry guest lecture Esthetico derma institute Cosmetodynamic of efficacious & safe non-pharma barrier: maintaining topical combination therapy for hyperpigmentation / melasma

 Rendra Pranadipa TOFANI (26396 / 15 min)
- 2:30 PM Industry guest lecture Euromi Nutational Infrasonic Liposculpture (N.I.L): revolution in liposculpture Unique technology that changed my way of practice

 Lenzo LING (26740 / 15 min)
- 2:45 PM Industry guest lecture PT Immortal
 Cosmedika Indonesia Biomimetic peptide
 for aging skin treatment
 Yoga I KASMIR (27244 / 15 min)
 - 3 PM Industry guest lecture Martinex -Potentialities of the solid-state modificated hyaluronic acid based preparations into injectable anti-aging therapy Maria POGODINA (27878 / 15 min)
- 3:15 PM Industry guest lecture BTL Exilis Elite -Body Shaping and Skin Tightening Raj ACQUILLA (31078 / 15 min)

SATURDAY

9 AM 10:30 AM

Industry guest lectures

- 9 AM Industry guest lecture Melorin LDM Technology in skin rejuvenation and tightening - Wellcomet Amir AFSHAR (28810 / 15 min)
- 9:15 AM Industry guest lecture Complete Face APP
 The world's first digital encyclopedia on
 facial injectables
 Steven LIEW (27876 / 15 min)
- 9:30 AM Industry guest lecture Galderma The impact of the award winning smart click syringe

Scott MCLENNAN (27076 / 15 min)

- 9:45 AM Industry guest lecture Merz Rheology in fillers: is it important?

 Adri Dwi PRASETYO (26384/15 min)
 - 10 AM Industry guest lecture Matrifill How to choose a right filler?

 Frank ROSENGAUS (26382 / 15 min)
- 10:15 AM Industry guest lecture Daewoong Why US FDA chose Nabota?

 Hyung Joo NOH (26376 / 15 min)

SATURDAY

11 AM

1PM

Body surgery, lipofilling & PRP

- 11 AM Tummy tuck with local anesthesia

 Ago HARLIM (26804 / 15 min)
- 11:15 AM The hybrid technique Fat graft and implant augmentation mammoplasty

 Lee KIM SIEA (30874 / 15 min)
- 11:30 AM Giant condylomata acuminata in AIDS: a successful reconstructive surgery Nanny HERWANTO (26707 / 15 min)
- 11:45 AM Implants and supergrafting The value of composite surgery in aesthetic buttock surgery

Alexander Tobias HAMERS (26087 / 15 min)

- 12 PM The platelet-rich plasma (PRP) effect in the healing process of chronic plantar ulcer in leprosy patient

 Diana KARTIKA SARI (27117 / 15 min)
- 12:15 PM Melanocyte cell transplantation in facial leucoderma

Salim THURAKKAL (27391 / 15 min)

- 12:30 PM How to treat skin and fat excess in thighplasty after massive weight loss Gilbert ZAKINE (26162/15 min)
- 12:45 PM Gems and pearls for optimal results in liposuction: the art and science of body contouring

Francis M DECANGCHON JR (30691 / 15 min)

PROGRAM VIDEO PAPERS

SATURDAY

2 PM 4 PM

Laser & interface

- 2 PM Successful treatment using methotrexate in patient with guttate and plaque psoriasis A case report
 - Nadia WIRANTARI (26933 / 15 min)
- 2:30 PM Erythroderma et causa psoriasis vulgaris due to previous oral steroid Amalia ROSITAWATI (26705 / 15 min)
- 2:45 PM Pemphigus vulgaris with dependent steroid

 Lia Kinasih AYUNINGATI (26709 / 15 min)
 - 3 PM The glycolic acid peeling for Asian skin Leihong Flora XIANG (26112 / 15 min)
- 3:15 PM Epidermal channeling for TED with ablative fractional RF and acoustic pressure ultrasound: a breakthrough in dermatology?

 Amaranila Lalita DRIJONO LALANLANGI (26546 / 15 min)
- 3:45 PM Long pulse non-ablative Er:YAG laser in treatment of vaginal relaxation and SUI Ashraf M BADAWI (26856 / 15 min)

SUNDAY

Face surgery

8:30 AM 10 AM

- 8:30 AM Lower eyelid rejuvenation: transconjunctival orbital fat transpositioning and autologous fat graft for deep resistant tear trough deformity

 Sang Tae KIM (27075 / 15 min)
- 8:45 AM Surgical alopecia

 Conradus GHO (31002 / 15 min)
- 9:00 AM Face and cervical lifting technique -Platysma and SMAS suspension Daniel CATALDO (26224/15 min)
- 9:15 AM New technique of alar base reduction Cuong NGUYEN XUAN (29312 / 15 min)
- 9:30 AM Facial rejuvenation in the midface area: mixing surgical with non-surgical procedures

 Constantin STAN (24430 / 15 min)

SUNDAY

11 AM 1 PM

Injectables

- 11 AM Introduction and presentation of ISDS Kyle Koo II SEO (30870 / 15 min)
- 11:15 AM Granuloma foreign body reaction related to fillers
 - Ago HARLIM (26808 / 15 min)
- 11:45 AM Tools and procedures for lower face injections
 - Constantin STAN (24432 / 15 min)
 - 12 PM Temporary diplopia and strabismus after the injection of hyaluronic acid Kateryn PEREZ WILLIS (26547/15 min)
- 12:15 PM Assessing the safety and effectiveness of dermal fillers for the correction of moderate nasolabial folds in Chinese adults

 Yi JIA (29853 / 15 min)
- 12:30 PM Nasalis muscle and Bunny lines, the most abused and misunderstood

 Steven LIEW (30968 / 15 min)

TEACHING COURSE 1Laser, EBD & pigmentation

Friday from 5:30 to 7 PM • Room 2

COURSE DIRECTORS

Sri Aryani SUDHARMONO & Hema SUNDARAM

COURSE OBJECTIVES

by attending this TC, the attendee should be able to:

- · Recognize laser applications to optimize rejuvenative outcomes
- · Identify the indications and limitations of latest laser procedures
- Review latest trends in treatments for hyperpigmentation
- Choose the most appropriate technical devices for treating pigmented lesions

TEACHING COURSE 2 Breast augmentation

Friday from 5:30 to 7 PM • Room 3

COURSE DIRECTORS

Stephanie Chuk Kwan LAM & Mark Richard MAGNUSSON

COURSE OBJECTIVES

by attending this TC, the attendee should be able to:

- Identify trends in implant augmentation and lipofilling techniques to maximize the aesthetic outcome
- Explain how to avoid and manage complications from breast augmentation.

JULY 27 V32 33 \ IMCAS ASIA 2015

E-papers & Posters

E-PAPERS

E-papers are displayed on computers and are accessible to attendees at any time during the entire conference period at the IMCAS e-learning station. Abstracts are available to view at www.imcas.com.

THEME	E-PAPER TITLE	PRESENTER	NUMBER
BREAST & BODY SURGERY	Clinical cases to show that stem cell works	Florencio Quiogue LUCERO	24874
	Scar sparing supercharged augmentation mastopexy	Alexander Tobias HAMERS	26085
	Fat grafting for vaginal rejuvenation surgery	Alexander Tobias HAMERS	26311
	Tips and tricks for best results in gluteal augmentation with autologous fat graft transfer (Brazilian butt lift)	Francis M DECANGCHON JR	30687
HAIR TRANSPLANT	The principles of hair transplantation	Coen GHO	27885
INJECTABLES & THREADS	How I correct complications of silicone nasal injection	Ago HARLIM	26806
	Improving orgasm and sexual function in men and women with a safe and simple injection technique	Catherine STONE	29159
LASERS & EBD	High-power optically pumped semiconductor 577 nm laser systems represent a highly effective new option for the treatment of vascular lesions	Peter Arne GERBER	27875
	Efficacity of virgin sesame oil cream as a treatment for wrinkle and melasma	Prasetyadi MAWARDI	26968
	Histopathology of early superficial type basal cell carcinoma - A case report	Irma Tarida LISTIYAWATI	27115
	Hypertrophic scars and keloids - Current concepts	Salim THURAKKAL	27367
	Hair rejuvenation with LLLT & mesotherapy	K R CHANDVANIA	27819
MEDICAL CARE & COSMECETUCIALS	Exanthematous drug eruption due to cefadroxil confirmed by patch test	Cut Shelma MAHARANI	27871
	Complete resolution of early psoriasis vulgaris lesion treated by topical corticosteroid monotherapy	Alfrid ASDITYA	27873
	Vitamin U (S-Methylmethionine sulphonium) for fast wound healing and skin rejuvenation	Won Serk KIM	28653
	Complete resolution of condylomata acuminata treated with cryotherapy	Nurina Dhani RAHMAYANTI	29987
	Biomimetic peptide for aging skin treatment	Yoga I KASMIR	30729

POSTERS

Posters are displayed in the poster area (located near the Club Lounge) and available to view throughout the conference period. Presenters will stand by their posters on Saturday August 1, at 1 pm in order to answer the questions of attendees. Abstracts are available to view at www.imcas.com.

POSTER TITLE	PRESENTER	NUMBER
Two cycle methotrexate giving a good result in psoriasis vulgaris patient	Indah Sari LISTIANA DEWI	27119
Psoriasis vulgaris in a child	Febrina DEWI PRATIWI LINGGA	27121
Pyogenic granuloma in child	Meita Ardini PRATAMASARI	27235
Post-laser hypopigmentation treated with topical tacrolimus	En Hyung KIM	27281

Symposia

Symposia are sponsored sessions in which the content and speakers are entirely decided by the sponsoring company. Attend these sessions to find out more about the latest offerings of the company.

FRIDAY

From 9:30 am to 10:30 am in room 3 MATRIFILL 海薇 3 dimensional approach to facial aging with HA CONTRIBUTOR: Frank ROSENGAUS www.3healthcare.com

SATURDAY

From 3 pm to 4 pm in room 3 **ULTRA V CO LTD** Ultra V threads - Absorbable thread lifting upgrade with blunt cannula & PLLA Tornado CONTRIBUTOR: Han Jin KWON www.ulv.co.kr/en

SATURDAY

From 8:30 am to 9:30 am in room 3 DAEWOONG PHARMACEUTICALS The new botulinum toxin type A: Nabota - application and injection techniques CONTRIBUTOR: Hyung Joo NOH www.daewoong.co.kr

How do you learn?

IMCAS offers a variety of different session formats which will allow you to learn and interact with speakers in different ways. Discover the formats here.

E-PAPER

These electronic submissions are only viewable via our digital platform. Log onto the computers at the IMCAS e-learning Station to view the e-papers.

LIVE DEMONSTRATION

These are sponsored sessions during which different companies may demonstrate their product or device on a living patient. Procedures are normally performed in a treatment room and the images are beamed live to the conference room. Each demonstration usually lasts for 20 minutes.

REGIONAL MASTERCLASS

Regional Masterclass – A regional masterclass is usually made up of a series of scientific sessions each dedicated to a certain topic. Each of these sessions is carefully built to cater for practitioners from the region. The presentations reflect regional preferences and particularities.

SCIENTIFIC SESSION

The vast majority of our sessions fall into this category. Two chairpersons introduce a series of speakers who each give a presentation that is 8 to 12 minutes long.

The floor is then opened up for questions from the audience.

SYMPOSIUM

Symposia are sponsored sessions in which the content and speakers are entirely decided by the sponsoring company. Attend these sessions to find out more about the latest offerings of the company.

TEACHING COURSE

Teaching courses offer a more interactive and intimate experience than the scientific sessions. They are designed to offer comprehensive in depth coverage of a subject primarily through video-based learning. There is also more time allocated for questions and answers and the opportunity for participants to reflect on their learning and evaluate their understanding.

VIDEO PAPER

Video papers are given in the exhibition hall, facing a camera. These presentations are filmed and delegates can watch the presentation live in the video paper area of the exhibition hall.

ON ASIA IN BALL How is IMCAS funded?

IMCAS retrieves its revenues either from doctors' subscriptions or from industry financial support:

- · Regarding doctors' subscriptions, the fees that can be found on the registration form reflect the financial support that IMCAS receives from doctors.
- · Concerning industry financial support, the amount of investment proposed by the sponsor is characterised by the different support levels. For example, at IMCAS Asia 2015, the minimum investment requirement for a Platinum sponsor is 35 000 USD, whereas the minimum investment requirement for a Classic sponsor is 5 000 USD.

Additionally, there exist two ways that companies may financially support IMCAS activities, based on whether or not the companies have a direct influence on the program, individual sessions, subjects for discussion, content or choice of Faculty members. This is why we highlight the difference between activities supported by a sponsorship and activities supported by an unrestricted educational grant.

WHAT IS THE DIFFERENCE BETWEEN SPONSORSHIP AND A GRANT?

SPONSORSHIP is a mutually beneficial partnership exchange between the supporting company and IMCAS. The supporting company provides financial support for an activity such as a live demonstration, a symposium or a guest lecture and in return may present syntheses of studies or trials, practical solutions to specific patient problems and/or live demonstrations to the audience. The content of these sessions is therefore not endorsed by IMCAS.

An UNRESTRICTED EDUCATIONAL GRANT is a financial donation offered to support a specific scientific session with no exchange partnership. These sessions are eligible for CME credits and thus for ethical and educational purposes, the Scientific Board decides the scientific content and speakers of these sessions.

WHY SHOULD THIS FUNDING BE CLEARLY IDENTIFIED?

Identifying the origins of the funds allows transparency at all stages. Participants of all activities, whether doctors or industry representatives, should therefore disclose all potentially distorting financial or other influences (Conflict of Interest). The audience may then judge and, if necessary, make allowances for the impact of bias on the information being presented.

WHICH SESSIONS BENEFIT FROM EDUCATIONAL GRANTS?

At IMCAS Asia 2015, the Live anatomy on cadaver: Injectables & fat workshop scheduled on Friday July 31 from 2 PM to 5 PM benefits from a financial donation of three companies, with no exchange partnership.

The companies that offer grants for this session are:

- MATRIFILL 海薇 SHANGHAI HAOHAI BIOLOGICAL
- MERZ AESTHETICS
- IPSEN PHARMA

WHICH SESSIONS ARE SPONSORED?

See the list of Symposia on page 35 and the details of the Live Demonstrations on pages 16 and 20 to see the details of the sponsored sessions.

IMCAS ASIA 2015 \ JULY 27 V 32

ASIA IN BALL **INTERVIEWS**

DR PATRICK PO HAN HUANG **DERMATOLOGIST, TAIWAN**

What are the newest techniques and developments in injectables that you are using?

The most interesting and newest technique that I am using to treat the tear trough is to use microcannulae to detect the orbicularis retaining ligament and fill filler right next to it. It will give enough and direct support to the tear trough. It was not easy to feel underlying structures with needles before. In addition, very superficial subdermal injection of fluid HA over the cheeks after fractional lasering is preferred by my patients for its amazing dermal «hydrating effect» which cannot be achieved by lasers alone.

What are some ways that filler complications can be avoided?

There are several ways to avoid filler injection complications. One way is to always do retrograde injections to avoid intravascular injection. To avoid unnecessary deposit of HA, accurate bolus injection with microcannulae, rather than field treatment is suggested. In addition, distribution of HA, though it looks great right after molding, usually changes chronically because of gravity and facial muscle movement.

What will the partnership between the Taiwanese Dermatological Association and IMCAS Asia bring to practitioners?

In Taiwan, there are many experienced dermatologists using injectables, energy-based equipment and surgical procedures. including liposuction, liposculpting and hair transplant. Our most advanced medical and surgical techniques and the modern Asian aesthetic concept in Taiwan will benefit all attendees and enhance the standards of aesthetic dermatology and cosmetic surgery in this area. Being a partner of IMCAS Asia, the Taiwanese Dermatological Association (TDA) will bring you a fruitful meeting program provided by our members and contribute to the continuation and the growth of medical education. IMCAS Asia will be one of the best congresses of aesthetic dermatology and cosmetic surgery in Asia.

DR SRI ARYANI SUDHARMONO **DERMATOLOGIST. INDONESIA**

What are the laser treatments that are better suited to or more effective on Asian skin?

Laser treatments are becoming better suited to or more effective on Asian Skin because of the development of understanding in laser tissue interaction in Asian skin. Research has shown a greater rate of melanogenesis and higher melanin content in darker skin types. That is why any trauma easily produces post-inflammation hyperpigmentation. Asian skin is also vulnerable to trauma that can very easily cause it to develop scars or even keloids.

Fortunately in the last decade, there has been an increased understanding about laser tissue interaction especially in Asian skin. Also there are a lot of developments of new lasers and old lasers with new technology. So nowadays there is increasing laser effectiveness and safety in the treatment of many diseases or many aesthetic problems for Asian skin.

What are some ways that complications from lasers or energy based devices can be avoided?

Continuing research and clinical studies especially in laser and tissue interaction can definitely help complications from lasers or energy based devices to be avoided. Proper training and regulations do not just minimise the risk of complications but also increase the efficacy of therapy.

In your opinion, how is Indonesia positioned in terms of global medical aesthetic practices?

It is growing rapidly, especially in aesthetic injections. Continuing medical education and training is the key for maximum results and patient safety.

IMCAS ASIA 2015 \ 39 JULY 27 V 32

International Master Course on Aging Skin

DR ADRI PRASETYO DERMATOLOGIST, INDONESIA

What makes the Live Anatomy on cadaver workshop important and relevant for all practitioners to attend?

The live anatomy on cadaver & injectables, threads and fat workshop is a unique educational experience that allows practicing physicians to explore the complex 3-dimensional anatomic structures of the face while injections take place. Delegates will be taught how to identify facial structures such as the fat compartments, retaining ligaments, blood vessels, nerves etc. This will allow delegates to see and understand the injection basis and anatomic structures that are poorly taught in other workshops and which are, as a result, frequently misunderstood. With this highly practical education, clinicians will be more competent to create more aesthetic results and to avoid anatomic danger zones during botulinum toxin and filler injections. Delegates will also have the rare opportunity to immediately correlate the injection technique and immediate results with the exact location in the anatomy of the cadaver.

A section on threads is being included in the Cadaver Workshop for the first time ever, what do you think has led to their increased popularity?

Thread lift is a minimally invasive procedure that is designed to produce lifting of the saggy tissue of the face using specific sutures. This procedure has been so popular in Asia because of the simplicity of its technique, the minimal risk, and the fact that it is said to have dramatic yet natural results. However, thread lifts have not been very extensively studied and rarely instructed using cadaver in any live workshop. At IMCAS Asia 2015, this popular procedure will be scientifically and clinically reviewed with lectures, debates, and live anatomy on cadaver & thread lift workshop. For the first time, attending physicians will gain anatomical insight to improve their practice of thread lifting in the correct facial tissue layer and will therefore get better result for their patients.

In your opinion, how is Indonesia positioned in terms of global medical aesthetic practice?

Indonesia is considered as the rapidly growing country in global medical aesthetic practice. The number of Indonesian delegates often dominates congresses in Asia-Pacific. New procedures and technology are quickly practiced by Indonesian doctors due to their intense involvement in global education. The conducive government policy also allows medical aesthetic products, materials, and instruments to enter the Indonesian market. As the fourth biggest population in the world (below the US and above Brazil), Indonesia is of great interest for the medical aesthetic industry.

This is the first time that IMCAS will be held in Indonesia, what will this unique location bring to the congress?

IMCAS Asia, with its first Indonesian edition on the beautiful island of Bali, sets a unique point of combining high science with a great holiday. After the congress, the delegates and faculty speakers can visit many interesting places in Bali, from the beach in Nusa Dua to the cultural Ubud, as featured in Julia Roberts' *Eat Pray Love*. Nothing more can be expected from a medical aesthetic congress.

DR MICHEL ROUIF PLASTIC SURGEON, FRANCE

What are some of the newest techniques that you are using when performing lipofilling procedures on the face?

One of the newest techniques that I am using in facial lipofilling procedures is micro grafts. For this procedure, I use the cutting-edge motorized cordless injection device specifically designed and engineered for micro-fat grafting. Precision, control, repeatability, and safety are the key words for micro fat grafts. The HAPI concept for micro fat transfer in the face allows me to achieve a complete control of harvesting micro fat graft in a closed system to maximize fat retention and predictability. I optimize the micro procedure with a closed and sterile procedure. This solution offers the most high quality fat purification, and a control of micro injection. In the future this proved system could be the most «user friendly combined set» for all micro fat injections.

What has led SOFCEP to develop a partnership with IMCAS, not just during the Annual World Congress in Paris, but also in Asia?

The partnership between IMCAS and SOFCEP gives French surgeons the opportunity to create relationships with their international colleagues. Furthermore, plastic surgeons can learn an enormous amount at IMCAS because of its interdisciplinary approach. IMCAS congresses also provide an opportunity for plastic surgery to become bigger amongst the specialities and as a platform for SOFCEP, it goes a long way towards promoting French surgery and 'the French Aesthetic Touch' all around the world, not just in France. Finally, IMCAS offers French surgeons an excellent opportunity to present in English in an international environment, a very useful skill and a good training exercise for any surgeon.

How does IMCAS help practitioners to anticipate future developments in the field of aesthetic plastic surgery and dermatology?

IMCAS helps practitioners to anticipate future developments due to its mix of specialities: a plastic surgeon can learn a lot from a dermatologist and vice-versa. IMCAS was one of the initiators who brought these two specialities together and now it is exactly this association which enables practitioners to better anticipate the future developments in the field.

Get social!

Like the official IMCAS Facebook page and follow @imcascongress on Twitter to get all of the latest updates, news and information about IMCAS and the medical aesthetic domain.

A MOMENT WITH THE EXPERTS

DR TATSURO KAMAKURA PLASTIC SURGEON, JAPAN

What are the latest developments in the use of stem cells and PRP in aesthetic medicine?

I have been using adipose derived stem cells for breast augmentation and facial rejuvenation but the latest study that we are working on is to use adipose derived stem cells for alopecia. We started the clinical study using adipose derived stem cells for alopecia and we are seeing very interesting results. Regarding PRP, using PRP itself shows effect but adding b-FGF (basic fibroblast growth factor) will drastically show better effects and consistent results.

Where do you think that the future of stem cell use lies?

Regenerative medicine is to use your own cells to cure and improve function. In the cosmetic field, if the patient does not have to use a foreign object to meet their expectations, this will be ideal. I believe stem cells have the capability to meet this function.

Why has the Japanese Society of Aesthetic Surgery chosen to collaborate with IMCAS for this congress?

The Japanese Society of Aesthetic Surgery (JSAS) has been trying to improve the quality of aesthetic surgery in Japan. Current aesthetic medicine is broad including, surgery, dermatology, and internal medicine. IMCAS is the world's largest and known congress and the collaboration with IMCAS will improve aesthetic medicine in Japan and it is also a good opportunity to share Japanese techniques and ideas of aesthetic medicine globally.

DR SO YEON LEEM POST-DOCTORAL FELLOW. SOUTH KOREA

Dr So Yeon Leem is currently conducting research at the Collège d'études mondiales of the Fondation Maison des sciences de l'homme in Paris. A South Korean national, she has spent the last decade or so researching plastic surgery culture and beauty ideals in South Korea.

Can you tell us a bit more about how you became interested in exploring plastic surgery?

Whilst pursuing my PhD in Science and Technology Studies at Seoul National University, I found that there was a hole in social studies of science and technology. Many studies that are strictly scientific don't necessarily reflect everyday life. If we take nuclear energy as an example, there are, of course some people who are very interested in this subject and who know a lot about it, but this is not a subject that people generally think and talk about everyday. I saw this as problematic because if we don't consider something like plastic surgery as a topic for serious research, then, we cannot understand our desires to live a better life or our intimate relationships with science and technology. My research into plastic surgery in Korea fills this hole – everyone is concerned about their body and what they look like and it is a subject that is often talked about among friends, partners and family. It is this that makes it so interesting to study.

How have beauty ideals changed and developed over the years in South Korea?

I generally attribute two eras that correspond to two very different beauty ideals in South Korea: before the year 2000, and after the year 2000, with a transitory period during the South Korean financial crisis of 1997 to 2000.

During the first period there was a real focus on Western, developed countries in South Korea. South Korea wanted to catch up with these countries and to modernize itself. This overall feeling was reflected in the predominant beauty ideal, which focused on Western beauty. Individual Western features, such as the eyes, nose and mouth, were

considered to be beautiful and therefore to be emulated by South Koreans. There was not, however, a concrete idea of the beautiful South Korean face as a whole. Rather, the beauty ideal in this era was very fragmented.

During and after the economic crisis, these ideals began to change. A new beauty ideal, which focused on the South Korean face as a whole, emerged as a kind of defense reaction. South Koreans became very sensitive to competition on both a national and an individual level. The days when cheap 'made in Korea' products were sold to Western countries and the demand was higher than the supply in the job market were over. This competiveness meant that South Korea and South Koreans were desperate to find what they did better than others, rather than simply imitating others. This search led to the casting off of previous Western beauty ideals and the search and creation of the new ideal of a harmonious South Korean face.

In your research, you talk about 'plastic beauty' and 'plastic monster', can you explain a little bit more about this concept?

These two terms are very commonly used in modern Korean culture, although they are difficult to translate into English. Broadly speaking the 'plastic monster' represents the aforementioned first beauty ideal, where a focus on parts of the face, such as the eyes or nose, led to an over-Westernised, unnatural look, which is now viewed negatively. 'Plastic beauty' is representative of the second beauty ideal, which focuses much more on the balance and proportions of the face as a whole. The boundary between 'plastic monster' and 'plastic beauty' is very ambiguous and subjective in the same way as the boundary between 'plastic beauty' and 'natural beauty' often is. Indeed, the more that it is confused with 'natural beauty', the more praised 'plastic beauty' is. Together, the terms 'plastic monster' and 'plastic beauty' represent Koreans' ambivalence towards plastic surgery.

Do you think that South Korean beauty ideals have spread across Asia in the same way as other cultural forms?

Definitely! Plastic surgery is a part of the Korean Wave [the increasing popularity of Korean culture – music, television dramas, film – across Asia]. It is not, however, explicit. It forms a subtle part of this wave as people idolize and copy very good-looking actors and singers. Asians look upon the new beauty ideal that is so prevalent in Korean culture as one to emulate. I talked to plastic surgeons in Thailand who used the term 'Korean style plastic surgery' to promote their clinic. They associated Korean style plastic surgery with 'natural-looking' and 'friendly-to-Asian' faces.

South Korea is often described as being the 'capital of plastic surgery'. Do you agree with this assessment?

Yes, I think that it is justified to call South Korea the 'capital of plastic surgery'. However, in my opinion, this is not due of the sheer number of procedures performed in the country, but rather because of the ways that South Koreans think about plastic surgery. The prevalence of plastic surgery in South Korea means that it is seen as being an essential part of people's national identity no matter whether it is seen negatively or positively. In this sense, plastic surgery is a cultural phenomenon that has a real influence on how South Korea people think about themselves.

42 \ IMCAS ASIA 2015

Welcome to IMCAS Academy

Over **250** videos
More than **80** courses **15** themes to choose from

Introducing our brand new e-learning platform

Bringing you a sleek modern design along with an intuitive navigation experience and increased functionality, we are certain that you will enjoy exploring everything that the new and improved imcas.com has to offer you.

Our congresses may only happen a few times a year but we know that learning is a continuous process so we have developed IMCAS Academy to allow you to access all of the quality scientific content that you find at an IMCAS congress anytime, anywhere. Our new e-learning platform has been built with user-friendliness and functionality in mind. Log in and get access to exclusive videos, scientific articles, aesthetic journals and more: let IMCAS be your encyclopedia of aesthetic medicine. At this congress alone we are filming a great number of sessions. These will be uploaded onto the IMCAS Academy e-learning platform over the year offering you the chance to experience your favourite lectures again and again.

IMCAS Community

IMCAS Community is your new online meeting place.

Join a comprehensive network of plastic surgeons, cosmetic dermatologists and aesthetic practitioners around the world. Exchange new research findings, engage in scientific debates, share great educational content and comment on the latest advances in your field along with the best in your profession. Distance should not get in the way of fruitful professional relationships - with IMCAS Community you can connect with colleagues and peers around the world and develop your professional network and standing on an international level wherever you are on the globe.

IMCAS Academy launches in January 2016

IMCAS Academy is

UP-TO-DATE

Content is updated regularly to ensure that you stay abreast of the latest advances in your field.

COMPATIBLE

Desktop, laptop, tablet or smartphone - *imcas.com* will now function seamlessly on all of your compatible electronic devices.

INTUITIVE

Find the information you want when you want it - the easy navigation system is instinctive and responsive.

EDUCATIONAL

Learn all year round via the IMCAS Academy e-learning platform.

SOCIAL

Comment on content and share your favourite videos, articles and more with your colleagues and peers around the world.

The Leader Leads Again

The World's First Picosecond Laser for Aesthetic Treatments

PicoSure is already known for its proven track record removing pigmented lesions and tattoos, and for managing melasma. In addition, PicoSure Focus for skin rejuvenation and toning has shown dramatic results without the typical downtime and discomfort.

IMCAS 2015 BOOTH 67

"REVOLUTIONARY PICOSECOND LASER TECHNOLOGY"

SYMPOSIUM 6

SATURDAY, AUGUST 1ST 9:30 AM - 10:30 AM

Join Dr. Carl Cheng and Dr. Peter Peng as they present their experience and clinical results using the world's first picosecond aesthetic laser.

Try Beauty A New Way

SAFE

LONG-LASTING

EFFECTIVE

Syneron Candela Launches Breakthrough Technology. Again. Introducing PicoWay.

PicoWay is a remarkably innovative **dual wavelength picosecond laser** from Syneron Candela, the most trusted brand in lasers. With both 532nm and 1064nm wavelengths, PicoWay can treat a very broad range of pigmented lesions and tattoo types and colors on any skin type.

PicoWay has the highest peak power and the shortest pulse duration of any picosecond laser for superior efficacy, safety and comfort. Proprietary PicoWay technology creates the purest photo-mechanical interaction available to most effectively impact tattoo ink and pigmented lesions, without the negative thermal effects of other lasers.

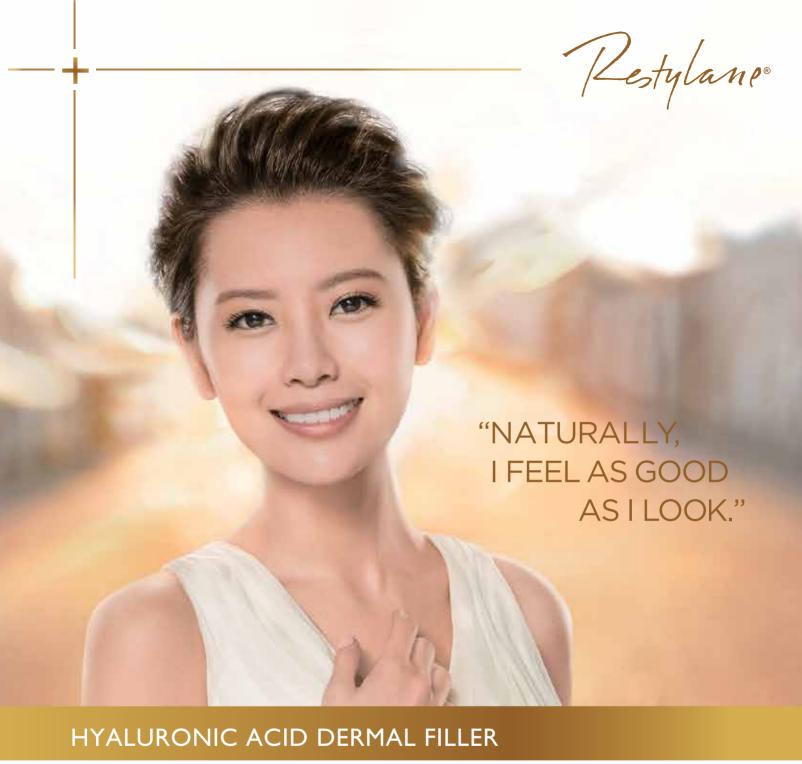

And, PicoWay has the reliability physicians want.
