This IMCAS Asia 2021 edition – more than ever before – seeks to gather all professionals in Bangkok while insuring social distancing and safety measures. But should any of our attendees find themselves unable to attend the congress physically due to a local travel ban, then virtual attendance will be offered as a full experience.

How? Professionals from all over the world will be able to connect and follow the conference online. To allow the maximum attendance for the sessions, the program has been developed with consideration for major time zones around the globe.

From New York to Sydney, check out our time zones chart and plan your learning program in one view: concentrate on the clear colored areas, shaded areas signify what we consider as healthy bedtimes.
