Dear Colleagues,

We are delighted to welcome you to the exciting metropolis of Mumbai for our 6th edition of IMCAS India. IMCAS is internationally famous for its world-class training at large-scale congresses. In Mumbai, we are offering participants the unique opportunity to benefit from our in-depth knowledge in a more intimate setting.

We have worked hard to create a special two-day congress that puts important selected themes under the microscope; participants from around the world can zone in on specific subjects and receive up-to-the-minute information on the latest techniques and procedures.

For almost two decades, IMCAS congresses have been famed for their training on aesthetic surgery and cosmetic dermatology. In Mumbai, we will bring injectables, threads, lasers and energy based devices to the forefront.

During the congress, our attendees will be offered the best formats from our signature line: patient demonstrations, post treatment results, challenging clinical cases and daily practice, debates, product analysis.

To go even further with IMCAS, join us at our 19th Annual World Congress in Paris and move from an intimate event to a congress on a grand scale. This will be an opportunity to be part of one of the largest multi-specialty conferences dedicated to dermatology and plastic surgery in the world, where you can delve into all subjects in the field.

We once again extend a warm welcome to Mumbai for IMCAS India and we look forward to sharing two days of fantastic learning experiences with you.

THINGS TO KNOW

Official conference language

English is the official language.

The venue

The Leela Mumbai
• Sahar, Andheri East
• Mumbai, 400 059

Set amidst 11 acres of lush landscaped gardens, cascading waterfalls and lotus fountains, The Leela Mumbai is a convenient 5-minute drive from the Chatrapati Shivaji International Airport and 15 minutes drive from the domestic airport. Located in close proximity to North Mumbai's commercial centre and export zone, The Leela Mumbai is an oasis of tranquillity amidst this bustling metropolis. It offers all the facilities the discerning traveller would expect from a five star luxury hotel with an ability to experience the essence of India.

Recording Policy

Recording (Photographic, Video and Audio) of the sessions of IMCAS congresses is **STRICTLY PROHIBITED**. Violators will be banned from future meetings and equipment will be confiscated.

Mobile Phones

As a courtesy to all presenters and attendees, please turn off your mobile phone and/or pager while attending sessions.

Lunch and Coffee Breaks

Coffee, snacks and lunches are served on site to allow our delegates to fully visit the Exhibition Hall. Complimentary food and beverages are provided to those with Delegate and Faculty badges. It is our primary concern to provide you with the freshest and best products. Particular attention has been given to the content of your lunch buffet.

E-learning Station at the IMCAS Academy booth

Scientific lectures in electronic format (E-PAPERS) can be viewed here, offering the possibility to send personalized emails to the authors and exchange ideas. Computers are available at the e-learning station allowing participants to browse the web and submit their evaluation.

Badges

IMCAS welcomes all professionals dealing with the world of aesthetics: doctors and all related professional bodies. Access to the Exhibition Hall is available for all badge types. Access to the Conference Rooms is dependant upon whether one holds a physician, a non-physician, or a corporate professional badge.

Fees for a full delegate registration include:

- all conference sessions during the 2 days
- access to the exhibit area including lunches and coffee breaks
- gala dinner
- complete program book containing all conference details

Companies and participants may copy materials for their personal use but further copy for sale or for any other commercial purpose is prohibited without prior permission of IMCAS.

Conference Admission and Exhibition Hall

Admission is by badge only. An adult must accompany children under the age of 16. IMCAS India 2016 showcases companies who are displaying their products and services on the same floor as the conference rooms.

Insurance

Neither IMCAS Secretariat nor the Leela Mumbai accept any liability for damages and/or losses of any kind which may be incurred by congress participants or by any persons accompanying them, during both the official conferences and the social program.

Attendees may participate in all events at their own risk. Attendees are advised to take out insurance against loss, accidents or damages that could be incurred during the Congress. Verbal agreements will not be binding unless they are confirmed in writing.

Certificate of attendance

Fill in your online evaluation form by 4th January 2017 to receive your certificate of attendance for IMCAS India 2016.

Log on at www.imcas.com

Accreditation

IMCAS offers to its participants Continuing Medical Education credits (CME), necessary for every practitioner in order to confirm his/her quality and to bring himself/herself up to date regarding the fast development of medicine. IMCAS, being an international conference, is currently under process to be accredited at several levels according to the conference location. The number of CME credits that IMCAS offers to its participants varies according to the duration of the congress and the organism of accreditation, given that the evaluation differs from one country to another.

At the time of printing of this program, an application for CME accreditation has been submitted to the Maharashtra Medical Council (ref. MMC201617623). For further information, please refer directly to the welcome desk on site.

IMCAS India 2016 offers you a variety of modern and innovative formats to enable you to expand and deepen your learning

SESSION FORMATS

FOCUS SESSION

covering a major topic of the congress.

organisation

successive 6 to 20 min lectures

- questions & answers
- chaired

CLINICAL CASE STUDY

challenging clinical cases on a pre-determined topic.

organisation

- 2 successive sets of
- 10 min clinical case presentation
- after each presentation, a panel of 2 to 4 experts assesses the case by bringing over his/her proposed treatment plan
- (3 to 5 minutes per expert)
- then, the presenter finally gives a 4 to 5-min presentation of the diagnostic and treatment plan originally applied, as well as related complications
- questions & answers
- chaired

CONTRIBUTING

presentations based on abstract submissions.

organisation

6 to 12 min presentations orally presented in a conference room

- chaired

SYMPOSIA

providing promotional and educational information on products and services directly to attendees.

organisation

under the complete responsibility of exhibiting companies.

PATIENT DEMONSTRATIONS

treatments performed by experts - each series of demos are grouped by topics (i.e. lasers, fillers, threads, etc.).

organisation

1 to 2 introductory 10-min presentations on "What's New" followed by successive 20-min treatments

- chaired

WEBCAST

dedicated recording room welcoming presentations to be filmed by the IMCAS professional AV team in a closed setting with no physical audience. Focus is given to the quality of sound and lighting. Aimed at being published on IMCAS Academy e-learning platform.

E-PAPERS

displayed during the whole conference period, at the e-learning station. Lectures are powerpoint presentations of an average of 30-40 slides, duration 10-15 min each - delegates are able to directly ask questions to the author(s) through mail at any time.

FRIDAY

n°3 What's their opinion?

Diane Irvine DUNCAN
Plastic surgeon, United States

"It's my go-to reference for medical information. I use it frequently when I need a quote, data, or information about a technique or trend. It is easy to access, much more personal than a dry journal article, and I love it!!"

Shehla EBRAHIM
Dermatologist, Canada

"I find that reviewing everything that I learnt from IMCAS on a daily basis reinforces the skills that I thought I knew from attending the lectures at IMCAS. There is so much more that I learnt by clicking on the different modules."

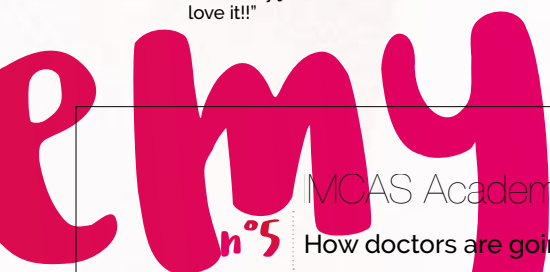

Meriem MARTINS
MD, United Kingdom

"Thank you for the excellent opportunity to learn from the best."

Frederic PICARD
Plastic surgeon, France

"It's definitely very well done and will be useful for all doctors and surgeons."

n°5 How doctors are going digital?

The digital revolution has impacted the world we are living in: how we communicate, how we learn and how we access information. This transformation has affected not only businesses but also practitioners who need to adapt themselves to the new digital world we live in. With these fundamental adaptations, it has created new ways of learning.

E-learning is the answer. This new and essential platform facilitates accessibility of learning at the convenience of the users' own time, comfort and choice.

With more than 20 years of experience, who better than IMCAS to launch this first-ever e-learning platform dedicated to aesthetic and dermatology.

IMCAS Academy is delighted to celebrate its one-year anniversary. During this year, IMCAS Academy successfully created a community of experts from around the world that all share the same goals and values to learn, exchange, and

stay informed on the latest innovations and trends.

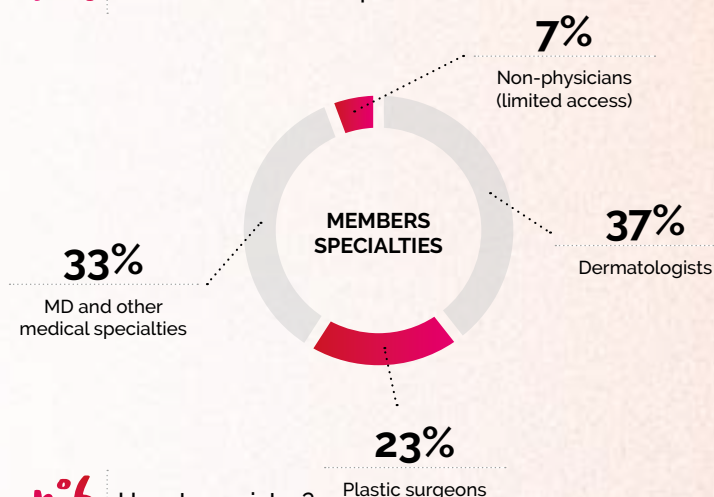

With over 170 courses and 864 lectures of strong scientific content, doctors are able to diversify their learning through multiple themes. Everyday, the content is continuously improved, growing, and integrates digital formats such as live webinars and forums.

On top of the content, IMCAS Academy has integrated a social aspect for all its members. Everyone is able to interact, share and exchange on this platform via commenting, sending messages and accessing profiles of doctors from all horizons.

Thanks to an active community of worldwide experts, IMCAS Academy's platform is spreading its knowledge and expertise all over the world.

So, what are you waiting for? Join this revolution and become part of IMCAS Academy community today!

INDIA'S AESTHETIC

India is experiencing a surge in its aesthetic industry. Close to 700,000 cosmetic surgical procedures are performed every year the country, putting it in the top four powerhouses for plastic surgery, alongside the USA, Brazil and China.

While India's per capita rate of plastic surgery is currently lower than in East or Southeast Asia, as one of the world's fastest growing major economies this is forecast to change. India's burgeoning middle class population is expected to increase to more than half a billion people by 2030, meaning more and more people will have the means to spend on luxury services.

We spoke to some of India's leading aesthetic practitioners to find out how these statistics are reflected in the industry and what current trends indicate about the market.

- Dr Satish Arolkar has been in Aesthetic Plastic and Reconstructive Surgery for 33 years and is a Trustee of the Indian Association of Aesthetic Plastic Surgeons
- Dr Ashish Davalbhakta is Chief Consultant Cosmetic Surgeon and Managing Director of Aesthetics Medispa
- Dr Chiranjiv Chhabra is Director and Consultant Dermatologist of Skin Alive Clinics
- Dr Rashmi Shetty is an aesthetic dermatologist and author of AgeErase
- Dr Kuldeep Singh is the Senior Consultant for Plastic, Reconstructive & Aesthetic Surgery at the Indraprastha Apollo Hospitals & Apollo cosmetic clinics New Delhi, India.

BOOM FACTORS

The doctors spoke of India's flourishing economy, which has touched all of the country's industries, as a significant factor in contributing to the aesthetic boom. As Dr Chhabra states, with the rising disposable incomes, "the gap between aspiration levels and purchasing power has narrowed" and the aesthetic industry is no longer seen as belonging exclusively to the elite.

However, the industry's growing popularity is not only due to a financial change, but also a cultural shift. The doctors say that the expansion in aesthetic procedures has been propelled by the popularity of international beauty pageants; the growth in the Bollywood film industry with its attractive heroes and heroines; and the power of social media and its "selfie generation", which has a particular impact in India with its very young population. Looking good is now paramount to success.

The popularity of aesthetic procedures also means that the latest technologies, training and treatments are finding their way to India. Dr Arolkar observes that there has been an influx of multinational companies selling previously unavailable devices, therapies and technologies. Dr Singh has also seen a similar

change: "Gradually, I think the thrust came from the pharma industry, as they made products available in the country, along with training programs by international faculty. The need was there all along, and everything slotted quickly. Add to this the fact that the purchasing power of the middle class increased, their awareness increased, and most important of all, care providers could provide safe, predictable and high level of treatments which really sent the demand in a spiral."

In short, Dr Singh says the most significant factors contributing to India's aesthetic boom are threefold: "availability, awareness and affordability – in that order".

TRENDS

The doctors have seen a general rise across all segments of the industry.

Dr Chhabra recalls how the initial trend was for reconstructive surgeries, but says consumers are now mostly going for aesthetic procedures, while Dr Singh says that people now are asking for procedures "to satisfy a greater range of needs but also safe, reliable, affordable and quality care. In other words, value for money."

There is also a notable trend in the number of people in India opting for non-invasive, non-surgical procedures. Dr Arolkar names skin peels, lasers, radio-frequency devices, hifu, thread suspension, hair grafting and fillers, as areas of growth.

Part of this surge in interest could also be ascribed to a breaking down of taboos. The public now sees aesthetic treatments in a more positive light, and consumers have become willing to have treatment on any area they feel could be improved.

Dr Chhabra explains that while the initial trend was for "face only", procedures, this has now expanded to the rest of the body.

"Every year, getting 'work done' becomes more accessible and more acceptable," Dr Chhabra says, adding that procedures have become "akin to a regular visit to a salon".

In Dr Shetty's practice, the aesthetic boom means that patients are now more knowledgeable about aesthetic tools, services and drugs and are open to intervention. "It takes less to explain the need of combined approaches and need of regular maintaining," she observes.

According to Dr Chhabra, who has seen the industry evolve significantly over the last 10 years, the changing trends also

BOOM

extend to the origin of the people coming for treatment. She says that one of the trends she has observed is that the patient population is no longer only local, with medical tourism on the up. She cites data from the Ministry of Tourism that shows 96,856 foreigners visited India on medical visas during January to June 2016, compared to 56, 129 for the whole of 2013.

This trend has also been witnessed by Dr Davalbhakta, who says that 40 percent of his practice comes from international medical tourists. Dr Singh added that international patients are coming from countries in Central Asia, Africa and the Middle East.

While dermatologist Dr Shetty has not seen witnessed a growth in foreign patients at her clinic, she notes that this could happen in aesthetic surgery. For her the focus is more local: "every Indian is a potential customer".

Dr Singh also observes a change in the clinics themselves: "Dedicated aesthetic clinics attached to hospitals are coming up, which seem to provide safety, reliability and quality to the people more visibly than standalone clinics."

GEOGRAPHIC GROWTH

So far the growth of India's aesthetic industry has been driven by the metropolitan cities.

However, Dr Chhabra forecasts that going forward "the aesthetics wave" will be driven not only by the larger tier 1 cities, where the penetration still significantly lags global averages, but also by tier II cities, such as Pune and Surat, and by rural growth.

"Led by comparison with their urban counterparts, females in rural India are now awakening to the idea of beauty, wellness and aesthetics," she says.

The other doctors also observed that while the largest number of clinics and consumers are in larger, metropolitan cities, other areas are indeed catching up. Dr Davalbhakta noted that this expansion will continue, "as large parts of rural India become upwardly mobile".

CHALLENGES

In spite of all this growth, there are some challenges for those in the industry to overcome.

According to Dr Chhabra, these include price sensitivity of

Indian consumers; significant investment costs; a lack of skilled manpower, which limits the industry's ability to scale up; and a lack of indigenous R&D.

For Dr Shetty the challenges include too many players in the market as well as a lack of regulations for doctors as well as equipment providers.

Such lack of regulations can lead to a question mark over reliability of services for consumers. Dr Chhabra has observed this and sees potential quality issues for the consumer, extending to medical staff, facilities and infrastructure, and equipment.

As Dr Singh points out, "mushrooming of care, as well as facilities, always brings us to the question of quality. Regulation of who can do procedures, adequate training of professionals providing this care, accreditation of facilities, screening and regulation of new products being pushed into the aesthetic market, and continuing medical education and upgrading of skills will remain, and should remain the priorities in the years to come."

Dr Arolka perceives a challenge for specific therapies, namely PRP and stem cell therapies as they are both regulated by the FDA and are of limited popularity.

While for Dr Davalbhakta, the issue to tackle is a global one: overcoming people's fear of surgery.

THE FUTURE

Looking positively to the future, there are many opportunities for the aesthetic industry in India.

Dr Chhabra points out that "the market size is immense, scope is comprehensive and growth is unparalleled". She says that in this under-penetrated market established service providers are able to rapidly expand.

With the growing awareness of the industry, the economic surge and the sheer size of India's population, Dr Shetty says this could be called "a golden period" for the aesthetic industry.

"This industry is not stopping soon," she asserts.

Questions & answers

ASBTRACT STATISTICS

This year we received 78 abstracts for IMCAS India 2016, meaning we received abstracts for over two thirds of our presentations!

The selection process of these abstracts derives from precision and expertise. To ensure unbiased presentations, each abstract is carefully studied and preceded by the approval of a strict Conflict of Interest policy (COI), which is constantly updated by IMCAS in order to uphold a standard imposed by international CME accreditation entities.

We want to express our gratitude to all of our abstract submitters, and to all of their evaluators for their valuable time and effort to help us continually improve IMCAS India.

For this reason, we are able to continuously assure participants the highest level of scientific content and excellence.

S24 - Contributing lectures: filler, lasers, threads

8 AM
9 AM

CHAIRS: Ganesh Srinivas PAI
Viraj Suresh TAMBWEKAR

- Vascular compromise: a protocol in action
Anjana BHANA (44959/12 min)
- Combination of aesthetic lasers for unsolved problems
Patil Laxmanrao DHIRENDRAKUMAR (42407/12 min)
- A clinical application of 100% polylactic acid reinforcing resorbable filaments to correct paracastic skin transformations
Elena RADION (47021/12 min)
- Hyaluronidase: the dreaded ally - a review on the indications, complications, dosages and practical administration
Shahien DOLLIE (49155/12 min)
- Bloodless anterior approach eyelid lift: the anatomy and art
Prerana TAHILIANI (49315/12 min)

S25 - Indian morphotype and skin

9 AM
10 AM

CHAIRS: Rahul PILLAI, Mukta SACHDEV

- Profile of Acne Excorie patient in Indian set up : Analysis and Management of more than 100 patients
Bipin DESHPANDE (42111/12 min)
 - Defining how the Indian face ages, to allow you to treat aging better - a prospective study
Ayyar ANURADHA (47746/12 min)
 - The full face approach in Indian patients: through SFA (scientific facial assessment)

2:30 PM
3:30 PM

CHAIRS: Debraj SHOME,
Shilpa TANEJA MITTAL

- Evaluation of the Blepharoplasty candidate - look before you leap!
Akshay Gopinathan NAIR (38953/10 min)
- Periorbital rejuvenation – global approach and principles with toxin and HA fillers combination therapies, consensus & recommendations on Indian patients
Sadhana Ramesh DESHMUKH (47377/10 min)
- Lasers for periocular rejuvenation
Rinky KAPOOR (48077/10 min)
- Surgical facial rejuvenation: a play of vectors!
Sandip JAIN (49091/10 min)
- Dynamic upper blepharoplasty with small incisions
Lumin SI (48231/10 min)

Questions & answers

S30 ● COMBINED TREATMENTS - FOR FACIAL REJUVENATION 3:30 PM Challenging clinical cases & 4:30 PM Debate

CHAIRS: Monica JACOB, Ernst Magnus NOAH

- Newer combination lasers for hair removal and HUDs - the new horizon for hair removal + 3min question & answer
Mukta SACHDEV (46812/12 min)
- Laser combined treatment for facial post fat grafting complication + 3min question & answer
Haiyan CUI (42791/12 min)
- Complication in lasers - how to manage + 3min question & answer
Niteen Vishwanath DHEPE (47324/12 min)
- Challenging cases: pigmentation and atrophic scars on the face + 3min question & answer
Sharad MUTALIK (47360/12 min)

E-PAPERS throughout the congress at the e-learning station

Monica JACOB

- Full face rejuvenation focused on lower face, neck and décolleté (47031)

Rinky KAPOOR

- Melasma treatment - 15 year experience of what really works in pigmented skin types (41597)
- Who says you cannot use fractional CO2 laser in patients on oral retinoid therapy?! - A clinical trial on this dermatological controversy (41609)
- Chemical peels in difficult indications... in pigmented skin types (48075)
- Stem cells, PRP or growth factors like the QR678 - what really works in non surgical hair growth (41593)

Ganesh Srinivas PAI

- Lasers in tattoo & pigmentation (46770)
- Q-SW laser for freckles in type V skin (46772)
- Throwing everything at acne-devices and drugs (46766)

Debraj SHOME

- Diagnose, correction and cosmetic rejuvenation of the 0.5-1 mm eyelid ptosis (46847)
- The mid-face lift - "a wonderful scar less technique to make you look years younger" - series of 200 cases (49313)
- Changing the chin - when to use fillers, implants & orthognathic surgery (46855)
- How to use different types of chin implants to mould & manoeuvre the chin shape & the facial contour (46857)
- Rhinoplasty in the Indian patient - series of 300 patients - what have we learnt? (46861)

Lumin SI

- Minimal invasive plastic surgery: my knowledge (48235)

Prerana TAHILIANI

- The importance photography in facial and aesthetic surgery (49313)

Shilpa TANEJA MITTAL

- Trans conjunctival blepharoplasty - is the subciliary technique redundant? (43527)
- The hypertrophic orbicularis oculi roll - eliminate it for beautiful eyes! (43531)
- Beautiful symmetrical eyes - for those who have no eyes (43535)

HOW IMCAS OPERATES

All members of the IMCAS Board, Scientific and Local Support Committee within our worldwide congresses are part of various task forces aimed at ensuring that IMCAS congresses continually offer the best in terms of qualitative content, innovation, distinction and education in the fields of aesthetics, whether medical aesthetics with plastic surgery and dermatology, or non medical aesthetics with the new development of the cosmeceutic field

12 MISSIONS IN 80 COUNTRIES

1. Scientific

Constructs the scientific foundations of IMCAS

2. Ethics

Establishes, develops, and safeguards the ethical principles of IMCAS

3. Practice management

Addresses all business issues associated with everyday practice

4. Young physicians

Represents young physicians and their interests

6. CME & evaluation

Analyses scientific content and sets up the tools for accreditation processes

5. New technologies

Identifies and evaluates the impact of innovations in the field

8. Scientific society relations

Acts as an intermediary between IMCAS and learned societies

7. Free coms

Promotes and encourages spontaneous abstract submissions constructs the scientific foundations of IMCAS

9. Trend benchmarking

Attends international events in the field in order to draw out the current trends

10. Aesthetic professionals

Establishes and develops the criteria for an enlarged non-physician audience

11. Topic management

Drives the development of a particular theme within the scientific program

12. Corporate development

Introduces and advances relations with corporate entities

How do I join a task force?

IMCAS task force
community!

Benjamin ASCHER
Plastic surgeon, France

Benjamin Ascher, MD, is a board certified Plastic Surgeon, lecturer and clinical assistant, from Paris Academy, and chairman and head of the Clinique of Aesthetic Surgery IENA in Paris – France. He is a member of the French, American, and International Societies of Plastic, Reconstructive and Aesthetic Surgery (SOFCPRE, SOFCEP, ASPS, ISAPS). He is section editor of the Aesthetic Plastic Surgery Journal and member of the Editorial Board for the Journal of Cosmetic and Laser Therapy, as well as author of 130 original articles published in referenced journals, and review articles in updated aesthetic surgery, non surgical procedures and recently, editor of "Injections treatments in Cosmetic Surgery" Informa, 2008. He is the founder and scientific director of IMCAS congresses (Paris, Cancun, Bali, and Mumbai), world leader in medical conferences dealing with the interface between Plastic Surgery, Cosmetic Dermatology, and Aesthetic Medicine. He is also co-director of the first French & European university diploma, dedicated to "injectables, face & body fillers and all associated techniques", University of Paris V- Paris XII, Hopital Tarnier, France. He is working extensively on research and clinical studies on many surgical procedures as well as Cosmetic Botulinum Toxin, Fillers, Facial & Body Volumetric Implants, Lipofilling, Suspending Threads, Face Lifts, and Body Contouring energy devices.

Malavika KOHLI
Dermatologist, India

Dr.Malavika Kohli (MD, DVD,DNB) born on 5th August 1964, is a well-established Dermatologist and one of the pioneers of Aesthetic Dermatology in India. With over 15 years of experience in the field of Aesthetic Dermatology, she is the director of Skin Secrets, which is a Cosmetology centre of excellence, located in South Mumbai.

Dr.Kohli is a prolific orator and has delivered numerous lectures and conducted workshops at various national and international Cosmetology and Aesthetic Dermatology Conferences and CME programs.

She is an international trainer for Injectables.

She has written chapters on Chemical Peels, Microdermabrasion and Hair Cosmetics in the IADVL textbook of Dermatology.

She has been a Cosmetology Consultant to premier events such as Lakme India Fashion Week and Ponds Femina Miss India Contest.

She is a scientific committee member of IMCAS ASIA 2013 and course coordinator for IMCAS INDIA 2013.

She is also the president of ICSI-INDIA.

Mukta SACHDEV
Dermatologist, India

Fellow in Cosmetic Dermatology (USA), DD (UK), DPD (UK).

Dr Mukta Sachdev is professor and head of the department of dermatology Manipal Hospital, Bangalore, India and is also the medical director of her private dermatology practice and a dermatology clinical trial organisation in India.

She is regarded as one of the international experts on skin of colour. Her special interest is lasers and cosmetic dermatology in skin of colour.

She is regularly invited, as a speaker, to national and international meetings and has presented and published several papers, written several textbook chapters and is now co-editing a 3rd textbook on skin of colour.

Sanjeev AURANGABADKAR
Dermatologist, India

Dr. Sanjeev Aurangabadkar completed his MBBS and MD from Osmania Medical College, Hyderabad, AP and was awarded the best outgoing student from the department of dermatology in the year 1998 and was awarded IADVL medal for the year 1998 at the NTR University convocation held at Vijayawada, AP, India.

He was awarded the International Society of Dermatology (ISD) scholarship at the World Congress of Dermatology 2007 held at Buenos Aires, Argentina (October 1st – 5th 2007).

He has obtained intensive training in laser surgery from experts in New York, USA, Sharjah, Hong Kong, Israel and is an international fellow in dermatologic surgery and laser surgery-Department of Dermatology, Mount Sinai Medical Center, New York, USA in 1999-2000.

Bernard MOLE
Plastic surgeon, France

Dr Bernard Mole, Plastic Surgeon, France, is a founding member of the French Society of Plastic and Aesthetic Surgeons (SOFCEP). Former Paris Hospitals' intern and later head of the Faculty Clinic, he has conducted research and fellowships on several topics such as clinical applications for human epidermis growing.

A precursor practitioner, he has been the main IMCAS Paris Course Coordinator regarding Plastic Surgery teaching materials for several years.

Today, he's a renowned physician, specialized in plastic and reconstructive surgery. He is the national secretary for France of the International Society of Aesthetic Plastic Surgery (ISAPS). He divides his time between his local practice and his humanitarian activities.

Chiranjiv CHHABRA
Dermatologist, India

Dr Chiranjiv Chhabra is a leading Dermatologist in India with a special interest in Cosmetic Dermatology. She has been practising Dermatology now for more than 20 years. She is group director at Skin Alive clinics, India, a chain of cosmetic dermatology clinics. Skin Alive clinics were awarded best skin clinic, best MedSpa awards. Dr Chiranjiv Chhabra was awarded the Business Award in the Health Care Industry in India in 2014. She is an esteemed member of various dermatology societies and is a highly evolved trainer in the field of lasers and injectables. She received her medical training and specialization in Dermatology from one of the most prestigious institutes in India - Maulana Azad Medical College. She believes that aesthetics is a combination of art and medicine and that a doctor should be a doctor by training and an artist at heart.

Kuldeep SINGH
Plastic surgeon, India

Senior Consultant
 Plastic & Reconstructive Surgery
 Indraprastha Apollo Hospitals
 New Delhi, India

- MBBS -1982
- MS (surgery)-1986
- MCh (plastic surgery)-1989
- Worked as an assistant and associate professor at Kasturba Medical College, Manipal - 6 years
- Senior Consultant in Plastic Surgery at Apollo Hospitals, New Delhi since 1996

Areas of interest

- Primary surgery in burns
- Microsurgery
- Lasers, Botox & fillers in aesthetic surgery

Publications in international and national journals on

- primary excision in burns
- pain relief in burns
- immunological parameters in burns
- microsurgery

Member ISAPS, ISBI, APSI, IAAPS, NABI, ISSH

Raj ACQUILLA
MD, United Kingdom

Dr Raj Acquilla graduated from Manchester University Medical School in 1999 and during his 16 year medical career has gained 12 years experience in Cosmetic Dermatology having performed over 25,000 procedures. He is an expert in medical aesthetics, facial contouring and non-surgical facelift, Dermatological surgery including facial skin cancer and undergraduate / postgraduate clinical education. He runs busy private clinics in Cheshire, London and Ibiza in addition to his own Facial Aesthetic Academy where he is a recognised masterclass trainer using the latest and most innovative facial rejuvenation techniques from demonstrating all around the globe. He is a full member and regional chair of the British College of Aesthetic Medicine, UK ambassador for Allergan Facial Aesthetics, faculty member of The European College of Aesthetic Medicine & Surgery, IMCAS, AMWC and global key opinion leader in the cosmetic use of Botulinum toxin and Fillers. He has been recently awarded an honorary fellowship with the Australasian College of Cosmetic Surgery. In addition to speaking at every major UK domestic conference, he has lectured extensively in Europe, South Africa, Russia, Middle East, India, Asia Pacific, Australia & New Zealand, Latin America and the USA. In 2012 he was given the prestigious title of Speaker of the Year at the UK Aesthetic Awards where he was also highly commended as Trainer of the Year and nominated as Aesthetic Practitioner of the Year 2013 & 2014. In 2014 he was listed as one of Tatler magazine's finest cosmetic doctors in the UK. He is actively involved in scientific audit, research and development of pioneering products, techniques and the continuous refinement of the art and science of medical facial aesthetics. "My principles are grounded in the promotion of excellence, safety, science, education and not just satisfaction...but delighting my patients with exceptional results through precise facial mapping and beautification"

Satish KAROLKAR
Plastic surgeon, India

M.B. B.S. (1977 - Bombay)

M.Ch.(Plastic Surgery)(1982 - Bombay)

FFCARS (Paris)(1985 - Dr Marchac D)

Locum Prof. (1986 - Rotterdam-Prof JC van der Meulen)

President IAAPS (Indian Association of Aesthetic Plastic Surgeons) 2013-2015

Conducted Leprosy Re-constructive surgery at Acworth Hospital Mumbai since 1982-2010.

Conducted several Reconstructive Plastic surgeries at several Camps in 2 states of India.

Extension of surgery to Diabetic foot and Footwear.

Presently engaged in Autologous Adipose Mesenchymal cell therapy to Arthritic knee joints.

Massimiliano Federico BRAMBILLA
Plastic surgeon, Italy

Dr. Brambilla graduated from the University of Milan with laude in 1992 and specialized in Plastic and Reconstructive Surgery at the University of Pavia with laude in 1998.

He attends as fellow assistant, the prestigious Dept. of Plastic Surgery in the States and in Israel.

Since 1998 he has been assistant of Plastic Surgery at the IRCCS Fondazione Ospedale Maggiore Policlinico Mangiagalli of Milan. He is in charge of the gynoplasty, eyelid and regenerative surgery team.

Professor at the University of Milan, referent of the SICPRE (Italian Society of Plastic Surgery) for vulvovaginal surgery, professor at the Agorà Aesthetic Medicine School teaching botulin toxin, hyaluronic acid body reshaping and aesthetic medicine of the genital area.

He has published numerous papers on various subjects; he is currently invited for lectures and courses mostly on vulvovaginal and regenerative surgery subjects.

Ashish DAVALBHAKTA
Plastic surgeon, India

Dr Davalbhakta is a board certified Cosmetic Surgeon who did the main part of his Cosmetic Surgery training in the UK and in the US. He qualified with MS in general surgery from B J Medical college in 1993. He acquired his masters in Plastic Surgery from Bombay University in 1996 with distinction and went onto specialise in further reconstructive and aesthetic plastic surgery in the United Kingdom.

He has done fellowships in Hand and Microsurgery, Breast Aesthetic and Reconstructive Surgery and Cosmetic Surgery in various centres including the world renowned Plastic Surgery unit at Addenbrooke's Hospital Cambridge, St. Andrews Centre for Plastic Surgery, Chelmsford, the royal Preston, Mt Vernon among others, acquiring his FRCS in 2000. He worked as a Consultant in the South Manchester University NHS Trust Hospital.

He is currently practicing as an honorary consultant Aesthetic Plastic Surgeon at both Ruby Hall Clinic and Oyster and Pearl Hospitals in Pune, India. He is the founder and director of Aesthetics Medispa, a unique health, wellness and Cosmetic Surgery centre, the first of its kind in Pune, India. He is also the head of the Cosmetic Surgery department of Noble Hospital, Pune.

Anup DHIR
Plastic surgeon, India

Dr Anup Dhir, M.Ch in Plastic Surgery, has been working as a senior consultant Plastic & Cosmetic surgeon since 1995. He has a special interest in Aesthetic Surgery of the face and body. He is an international active member of the American Society of Aesthetic Plastic Surgery. He was the secretary of the Indian Association of Aesthetic Plastic Surgeons for the years 2009 to 2015. He is the convener of the healthcare division of the American Society of Quality in India.

Manoj KHANNA
Plastic surgeon, India

Dr. Manoj Khanna is a dynamic Cosmetic Surgeon practising in India. He is the chairman & MD of Enhance Clinics, the first cosmetic surgery and cosmetic dermatology chain in India with more than 22 centres in India presently. Based in Kolkata, Dr. Khanna has been practising in Delhi, Mumbai and Bangalore, and also in the UAE since 2001. Currently the President of Indian Association of Aesthetic Plastic Surgeons and National Secretary for India for ISAPS, he was the President of Association of Hair Restoration Surgeons of India. He is also an executive member of the Association of Plastic Surgeons of India.

He is one of the pioneers of HT in India, and has done more than 5000 hair transplants since 1995 including many celebrities and cricket stars like Harsha Bhogle, Shastri, Arun Lal, Yusuf Pathan, etc. He also has vast experience in Body Contouring surgery, and more than 1200 clients have undergone liposuction and tummy-tucks with him. He is the pioneer of Breast Augmentation via the peri-areolar route in India with vast experience and expertise. He also has made some modifications in the super-medial pedicle approach for breast reduction and has done more than 500 procedures. He has been doing Male Breast Surgery for Gynecomastia under local anaesthesia only since 2001 and has done more than 700 cases under LA. His proficiency in nose surgery and face surgery is also well acknowledged.

He has received numerous awards and titles. He was awarded the Swami Vivekanand National Award for Healthcare in 2011 in Delhi, and the Mother Teresa International Award in 2013 in Kolkata. He was also bestowed the Rajiv Gandhi International Award for health in 2014.

Dr. Manoj Khanna is also a keen sportsman and still plays cricket and tennis regularly, at competitive level. He has been a commentator for cricket and tennis in Kolkata since 1990 and was fortunate to be one of the commentators for the live telecast of Mother Teresa's funeral on Doordarshan.

Navneet MAGON
Gynecologist, India

Dr. Navneet Magon MBBS, FCCP, MS (Ob-Gyn), is a leading icon in Urogynecology and Reconstructive Pelvic Surgery, and a pioneer in developing & popularizing Female Cosmetic Genital Surgery in India. He has more than 60 peer reviewed publications and is a peer reviewer and on the editorial board for various journals. His work and publications on the subject have received international recognition. He has the unique recognition of serving as the National Coordinator for the Endoscopy Committee as well as the Urogynecology Committee of the Federation of Gynecological & Obstetric Societies of India, a 33000 plus strong body of gynecologists. He is one of the first physicians from India to embrace Cosmetic Gynecology, and his contributions as the pioneer of establishing Female Cosmetic Genital Surgery in India have been well acknowledged. He is amongst the first gynecologists in India to integrate non-invasive technologies into his cosmetic gynecology practice and as an AIAVS fellow; he has attained the master trainer status for Indian Subcontinent. He is an astute clinician, a daring surgeon, an inspirational teacher and a thought-provoking author. An ace pelvic reconstructive and endoscopic surgeon, Dr Magon is the chairman and founder president of 'Urogynecology and Pelvic Health Association of India' and also the Founder President of The Society of Cosmetic Gynecology, India. He is a senior faculty at the American Academy of Aesthetic Medicine. He is truly a game-changer in the specialty and a very strong voice for women's empowerment and their reproductive rights. Amongst the various awards he has been bestowed upon, he has been one of the most deserving recipients of the FOGSI Dr Kamini Rao Oration and the AOFOG Dr S.S. Ratnam Young Gynecologist Award. He has also been awarded with the Delhi ISAR "Award of Excellence in Urogynecology and Cosmetic Vaginal Surgery" in year 2016. He is a celebrated orator and has been repeatedly invited to deliver guest lectures and orations at national and international scientific deliberations. Dr Magon is fondly called the "Iconic Gynecologist"

Haiyan CUI
Plastic surgeon, China

- Chief of Hongmei Road Outpatient Department of Shanghai Ninth People's Hospital affiliated Shanghai Jiaotong University. Associate professor.
- Deputy Chief of Minimally Invasive Cosmetic Study Group of Plastic Surgery Branch of the Chinese Medical Association
- Deputy Chief of Laser Cosmetic Study Group of Plastic Surgery Branch of the Chinese Medical Association
- Standing Committee Member of Medical Cosmetology Committee of Chinese Association of Integrative Medicine
- Council Member of Chinese Association of Plastics and Aesthetics
- Committee Member of Chinese Association of Reparative and Reconstructive Surgery
- Committee Member of Minimally Invasive and Anti-Aging Committee of Chinese Association of Plastics and Aesthetics
- Member of IPRAS
- Member of ISAPS
- Chief Expert of Many Micro Plastic Products/ Equipments in china

Dr. Haiyan Cui is the chief of Hongmei Road Outpatient Department of Shanghai Ninth People's Hospital with lots of clinical experience in the field of plastic surgery and cosmetic surgery. He's good at injection cosmetology, minimally invasive cosmetology, body overall design, RFAL firming, autologous fat transplantation, comprehensive rhinoplasty, facial contour, liposuction, breast augmentation and laser cosmetology, etc. Dr. Cui first proposes the concepts of "the overall design and build of human aesthetic image" and "future" design. Every year, Dr. Cui is invited to attend international academic conferences and gives a lot of excellent speeches.

Bipin DESHPANDE
Dermatologist, India

Dr. Bipin Deshpande, a practising Dermatologist from Pune, INDIA.
Birth Date - 4th November, 1962.
He graduated from B.J. Medical College, Pune as MBBS in 1986, did a diploma in Dermatology, Venereology & Leprology from Pune University in 1988.

Denis GUILLO
MD, France

Born on 28 November 1954 in FRANCE.
University diploma of Medicine (LYON I - UER Alexis Carrel) 1987
Diploma (PARIS X) in European Masters of Medical Lasers 2010
Diploma (PARIS XII) in Injection and filling techniques in plastic and maxillo facial surgery 2012.
President of SOMEREFs (French Medical Society for Research and Expertise in suspension sutures)
Member of AFME (French Association of Aesthetic Medicine)
Exclusive practice in aesthetic medicine since 1991, including deep peelings, fillers and botulinum toxin. Specialized in permanent threads lifting since 2002. (cf CV for workshops and publications)
Inventor of X technique (2004) and Easylift® concept (2005)
The interest to suspending threads, as a minimally invasive medical solution to perform face and neck lifts came to us in 2002. After years, many new threads, including resorbables, and numerous procedures appeared, making its visibility more difficult for patients or even practitioners.
It became necessary to clarify, by creating a singular technique, powerful and regular, in which every thread action could be logically justified.
The idea was first to specify the real needs and expectations of patients, and to propose the best plan of implantation, requiring the bare minimum number of threads for a broad optimized lifting action on sagged tissues, along with an acceptable durability.
Easylift® concept is our answer to these features of efficiency, reliability and regularity;
- Including the treatment of temporal and malar areas with a real benefit for the look,
- being conservative for the skin and avoiding scars and vascular damage due to scalpel action,
- giving very satisfying natural look and long lasting results,
- allowing original reactivation every three years by retightening the smooth threads curls.
- being secure with the permanent possibility to know the threads location,
Easylift®, now fully worked-out concept, can be considered as a credible alternative to surgical lift

Monica JACOB
MD, India

Dr. Monica Jacob – Aesthetic Physician and Anti-Aging Physician in Mumbai.
Dr. Monica Jacob is MBBS, M.D (Bom), She is Aesthetic physician, Obesity Consultant and an Anti-aging physician. She has been practicing for 13 years. He was the co-founder of the Esthetic Clinic at Apollo health City, Hyderabad, and was the Head of the Department of Facial Plastic Surgery there from 2009-2011.

Dr. Shome is an internationally renowned and noted Facial Plastic Surgeon who specializes in facial cosmetic & reconstructive surgery, facial & ocular cancers and orbital surgery and is one of very few Indian surgeons listed by Wikipedia, the world's largest online encyclopedia (http://en.wikipedia.org/wiki/Debraj_Shome).

Dr. Shome obtained the degrees of F.R.C.S. (Fellow of Royal College of Physicians and Surgeons of Glasgow) in 2003 and also his Diplomate of National Board (D.N.B.) in 2004. He specialized in Ophthalmic Plastic surgery and Orbital surgery in a rigorous fellowship from L.V. Prasad Eye Institute, Hyderabad, India. Dr. Shome subsequently completed an esteemed clinical fellowship in Cosmetic Facial Plastic surgery from one of the world's top centers at the University of Utah, Salt Lake City, USA. Dr. Shome completed another Fellowship in Maxillofacial Surgery under the aegis of the AOCMF in May 2015 and a Fellowship in Head & Neck Surgery from the Department of Head & Neck Surgery at the M D Anderson Cancer Center in August 2007. Dr. Shome is thus one of very few plastic surgeons with dedicated training in four different sub-specialties of facial plastic surgery.

Viraj Suresh TAMBWEKAR
Plastic surgeon, India

Dr. Viraj Tambwekar is a Mumbai based plastic surgeon and has special interest in cosmetic surgery. He is a consultant at Bombay Hospital, Breach Candy Hospital and Apollo Spectra Hospital. He is a faculty for the DNB (Plastic Surgery) course at Bombay hospital Institute of Medical Sciences. He is an International candidate for membership to the American Society of Aesthetic Plastic Surgery. He is a full member of the APSI, IAAPS, ISCLP&A, and ISRM.

He completed his plastic surgery training from KEM hospital Mumbai and acquired his DNB in plastic surgery in 2000.

He undertook higher training in microsurgery at The Chang Gung Memorial Hospital in Taipei & started his practice in Juhu.

His keen interest in aesthetic surgery led him to work with stalwarts in the field of facial rejuvenation, breast surgery, body contouring and rhinoplasty. He honed his skills further by acquiring training from experts in the field by working at their centers in various parts of the world like Singapore, Sydney, London, Paris, Los Angeles, San Francisco, Istanbul, Buffalo, Boston and Miami.

His expertise is in facial rejuvenation using a variety of procedures from the minimally invasive fillers, toxins and threads to the more invasive facelift, blepharoplasty, facial implants and adipose tissue transfer.

Rhinoplasty, breast rejuvenation and body contouring are other areas of expertise and interest. He has presented and published papers in national and international conferences. He is recognized as an expert in the use of fillers, botulinum toxin and threads and is actively engaged in the scientific and technological advances in this field.

His approach is based on the ideals of natural aesthetics with a focus in providing a natural appearance and a 'less-is-more' philosophy. He strongly believes that treatment should respect the balance and proportions of the face and body, and produce results that restore or enhance, but are never overdone.

Lumin SI
Plastic surgeon, China

Lumin Si, MD, born in Shandong China, is an independent plastic surgeon. He used to be the director of Department of Plastic Surgery in Zibo Central Hospital, the largest government hospital in the local area. He set up his private clinic, Youhao Aesthetic Plastic Clinic, in 2002. His main work now is aesthetic procedures, especially minimal invasive procedures. He has experience in holding workshops and international congresses. He holds workshops on minimal invasive techniques frequently in his clinic and around China. He was frequently invited to present his papers on minimal invasive techniques in international and domestic congress all over the world.

Shilpa TANEJA MITTAL
Facial plastic surgeon, India

Dr. Shilpa Taneja Mittal is an eminent and well renowned facial plastic surgeon, internationally trained and currently in practice in New Delhi, India. Dr. Shilpa Taneja Mittal specialises in facial aesthetic surgery, oculoplastic surgery, orbital surgery, facial reconstructive surgery following fractures & carcinoma and non surgical facial rejuvenation using injectables & lasers.

Ayyar ANURADHA
Oculoplastic surgeon, India

Dr. Anuradha Ayyar is a Consultant Ophthalmic Plastic Surgeon practicing in Thane and Mumbai. She is Fellowship trained in Ophthalmic Plastic Surgery, Ocular Oncology and Dacryology from L.V.Prasad Eye Institute, Hyderabad under the preceptorship of Dr.Milind Naik. She was also a Research Fellow in Ocular Oncology at the same institute. She completed her DNB in Ophthalmology from Aravind Eye Hospital, Tirunelveli, Tamil Nadu. In her rigorous training in these prestigious institutes, she has acquired adequate clinical and surgical experience in handling a wide range of disorders of varying complexity. In the earlier part of this year she had the privilege to learn more about Facial Aesthetics from famed Facial cosmetic and reconstructive surgeon, Dr.BCK Patel in the University of Utah, Salt Lake City. She is a Fellow of the All India Collegium of Ophthalmology (FAICO) and of the International Council of Ophthalmology (FICO). Her main areas of interest include Reconstructive and Aesthetic Oculofacial Surgery, Cosmetic Blepharoplasty, Filler and Botulinum toxin injections, Eyelid surgeries for correction of lid malpositions and Eyelid tumors. She is pursuing a long term Research project with a team in IIT, Hyderabad on Facial Palsy and its management. She has a keen interest in academics and has been a part of research projects and papers since her fellowship days. She has presented papers at many international and national conferences and forums. She is passionate about teaching the residents and fellows and always finds time to probe the young minds and learn more in the process. Facial aging has always been a subject that has intrigued her and she is currently pursuing her spare time towards studying more about the Indian face and aging.

Anjana BHANA
Dental Surgeon, South Africa

Dr Anjana Bhana is a wife, mom and extremely hard-working and ambitious individual. Her passions are people, beauty and health. She graduated from the University of the Witwatersrand in 2005, taking the SADA Medal for leadership (for her role as Dental Student Council President as well as other leadership roles) as well as The Maxillo Facial Department's Research award for her study on Rhinocerebral Mucomycosis in a Ketoacidotic Diabetic. Socially and academically she excelled at University. She also has a love for aesthetics that lead her to start learning and developing her skills in Aesthetic and Anti-aging Medicine. She constantly updates her knowledge with various courses, workshops and conferences as well as doing an Advanced Diploma in Aesthetic Medicine. She has trained for Restylane as well as a trainer for Perfectha (Genop). She has also recently completed a train the trainer masterclass with Dr Fredrik Berne and Dr Sabine Zenker (9 May). She is also a trainer for the Merz range of fillers Belotero (trained under Kate Goldie) and Hyalual Xela Rederm. She has completed the only South African registered post graduate course in Aesthetic Medicine offered in South Africa -the Advanced Diploma in Aesthetic Medicine with Distinction/ Cum Laude (84%). Aesthetic Medicine is her passion and she takes every opportunity to study and grow her skills. She has also completed a course on Maxillofacial orthopaedics and orthodontics and has developed an interest in interceptive orthodontics. Also completed ACLS training. She is on the SAACD – South African Association of Cosmetic Doctor's EXCO and recently delivered a lecture to members at a scientific meeting – Lifting, contouring and volumizing – which fillers where? She gave a lecture at the AMCSA 2015 (the Art of a Beautiful Smile) as well as Cosmedica 2015 (Botox Complications and peri-oral anatomy as well as a demo on lip fillers). In October 2015 she was asked to assist in the practical teaching of other doctors for the American Academy of Aesthetic Medicine. Spoke at Cosmedica 2016 - Art of Lip Augmentation

Sadhana Ramesh DESHMUKH
Dermatologist, India

Dr. Sadhana Deshmukh (DNB, DDV, FCPS) is a Cosmetic Dermatologist & Trichologist practicing in Mumbai. She is a postgraduate dermatologist/ dermatocosmetologist from B.Y.L. Nair Hospital, Topiwala National Medical College Mumbai. She has done her fellowship in dermatologic laser surgery & cosmetology. She is medical director at Forever Young Skin Hair Body Aesthetics clinic at Mumbai. She is specialized in beauty-aesthetic treatments in India. She has been trained for Botulinum toxin & Dermal Fillers in India and abroad. She is a life member of "Indian Association Of Dermatologist Venereologist And Leprologist" & "Cosmetic Society Of India". Dr Sadhana believes in generating awareness among people about the role of newer Lasers and dermatosurgery techniques in treating many skin problems which otherwise would be difficult to treat. She is specialized in the following fields:

- Consultation pertaining to diseases of skin, hair and nail.
- Cosmetic Dermatology.
- Laser for skin rejuvenation and resurfacing.
- Laser Hair reduction
- IPL for skin rejuvenation
- Botox & Dermal fillers
- Mesotherapy
- Non-ablative Face Lift with radiofrequency
- Micro-needling
- Radiofrequency surgery for removal of skin tags, warts & moles
- Chemical peeling
- Microdermabrasion
- Acne scar surgery

Shahien DOLLIE
MD, South Africa

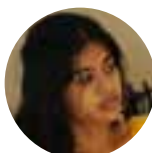

Dr Shahien Dollie has an acute passion for aesthetic medicine and is an active practitioner and advocate for this growing field in South Africa, a country both plagued and blessed as being a first and third world country. After attaining his MBChB from the University of Cape Town in 2006, Dr Shahien Dollie practiced general medicine and orthopaedics. He then developed an interest and fascination for aesthetic medicine. Dr Shahien Dollie graduated (cum laude) and completed the only registered course on aesthetic medicine in South Africa: the Advanced Diploma in Aesthetic Medicine in 2014. He has completed numerous other aesthetic training sessions, workshops and congresses since, and has been appointed Medical Director at The Aesthetic Doctors. Dr Shahien Dollie is a member of the South African Association of Cosmetic Doctors and the Aesthetic and Anti-aging Medicine Society of South Africa.

"While general practice has given me a good insight and understanding of medical conditions and health, and orthopaedics has taught me a great deal about the structure and form of the human body, it is within aesthetic medicine that elegance, beauty and art, and science, discipline and allopathic medicine have borders that are both shared and blurred. Thus by combining artistic creativity with sound scientific medical practices, aesthetic medicine allows one bring out one's inner elegance and beauty like the proverbial butterfly emerging from its cocoon."

Sandip JAIN
Plastic surgeon, India

Aesthetic Plastic Surgeon with expertise in Liposculpture, Body Contouring, Abdominoplasty, Post Massive Weight Loss Contouring and facial rejuvenation.

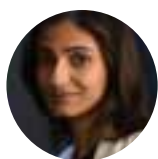

Stuti KHARE
Dermatologist, India

Currently specialising in M.D. Dermatology. Completed her M.B.B.S from P.C.M.S Bhopal, in 2012. Holds special interest in aesthetic treatments, hair transplant surgeries and P.R.P

Elena RADION
Dermatologist, Russia

Elena Radion, Doctor in Aesthetic Medicine since 1999. In 2007 she founded a private clinic for aesthetic medicine "Belle Allure" in Moscow, Russia. Dr. Elena Radion has extensive experience in thread lifting, dermal fillers, botulinum toxin therapy. She is constantly improving her skills, taking part in World Anti-Age conferences as a speaker. Dr. Elena Radion published a number of scientific articles and has her personal educational center in thread lifting.

Prerana TAHILIANI
Oculoplastic surgeon, India

Dr Prerana Tahiliani is an expert in the field of eyelid and facial cosmetic surgery. Over the past 6 years Dr Tahiliani has performed several procedures for the cosmetic, structural and functional rehabilitation of the eyelids and lacrimal region in India.

Dr Tahiliani completed her MD in Ophthalmology from the Sree Sankaradeva Netralaya, one of the best post-graduate training institutes for Ophthalmology in India under the guidance of Dr Kasturi and Harsha Bhattacharjee. Following that, she focused on Oculoplastic surgery by completing her fellowship at the LV Prasad Eye Institute in Hyderabad under the guidance of Dr Milind Naik. This training helped her specialize in techniques of plastic surgery as it relates to the eyes and their surrounding structures such as eyelid repairs, tear duct (lacrimal) surgery, orbital cancers, eye cancer in children and the treatment of thyroid eye disease.

Dr Tahiliani has special interest in tumors affecting the eyes and the periocular region. She completed a short observership at the Childrens Hospital, Los Angeles under the supervision of Dr Jonathan Kim. Apart from clinical work, Dr Tahiliani also focuses on research and developing minimally invasive techniques for orbital and cosmetic surgeries. She has delivered scientific talks at many national and international forums and actively pursues teaching the younger generation of ophthalmic surgeons. She has various scientific publications on peer-reviewed journals.

Dr Tahiliani with her partner, Dr Adit Gupta dream of establishing a centre of excellence for ocular oncology and oculoplastic surgery in Western India.

Reema TEBAK ARORA
MD, India

Dr Reema Arora has been a national and international trainer in BOTOX® and Fillers for the past 8 years working for Allergan India pvt Ltd. as Medical Head- Facial Aesthetics. She has the credit of training over 500 Dermatologists and Plastic surgeons in the art of facial rejuvenation with injectables. Dr. Arora has single handedly revolutionized the use of Botox and dermal fillers in India with new innovations and focus on Indian faces. She has perfected the art of using Botox, Juvederm, and Voluma amongst other injectables to rejuvenate, enhance and treat the whole face including -facial asymmetries, define various facial features like the nose, jaw, lips and excessive sweating. Dr. Arora made the switch to cosmetic medicine in 2006 following her passion for Aesthetics. She has been trained in Australia, Korea and Singapore with acclaimed dermatologists and plastic surgeons. Dr. Arora, a medical graduate from St John's Medical College Hospital and a pediatrics postgraduate, has gone on to become a brand in herself in Facial Aesthetics, continuously perfecting her well honed skills. Being India's leading Rejuvenation expert for over 8 years, Dr. Arora has always been a pioneer in Injectables. She constantly updates her techniques and extensive knowledge of the subject by attending training workshops and seminars. Academic achievements:

- Part of the International Consensus on the dosage of Botox at various sites, March 2008
- Conducted the first cadaver workshop in aesthetics in India in September 2013 to revisit Anatomy.
- Has conducted 2 RTM discussions with Indian doctors in Aesthetics in New Delhi.
- Is writing 2 textbooks on the Indian Inject able Experiences.
- Has been a faculty at various National and International Aesthetic conferences.

In 2011, LG Life Sciences, Korea marked its entry in Facial Aesthetics segment with the launch of a new generation Hyaluronic Acid dermal filler injection called YVOIRE. August 2015 witnessed the launch of YVOIRE by LG Life Sciences India. YVOIRE has been developed after 15 years of R&D, using a unique patented HICE (High Concentration Equalized) Cross Linking technology which gives better and long-lasting results. Today YVOIRE has a global footprint in more than 20 countries worldwide and is a preferred choice of dermal filler in many European & Asian countries.

MERZ PHARMA

Company name: Merz India Healthcare Private LTD

Country: India

Contact: snigdha.sinha@merz.com

www.merz.com

Merz Pharma is an independent international aesthetics and neurotoxin company with its own research and development capabilities. Our continued growth and market leadership in aesthetics and neurotoxins is the result of our drive for innovation, along with focused, strategic acquisitions. We have continued to expand across all areas of our business, due to a focused, purposeful approach that includes both organic and inorganic growth. As a privately-held and family-owned company with a 100 year-plus history, we believe in taking a long-term view. Merz brings an unwavering focus to the specialties we serve, combined with a flexible, responsive approach to the individualized needs of our physician customers and their patients. Merz India healthcare private limited has begun direct operations since January 2015 with Ultherapy as flagship brand. Headquartered in Mumbai & currently Merz India will be launching Xeomin & Belotero in Dec 2016.
