ACCREDITATION

Topic series

Clinical dermatology

Dermatology is a multifaceted specialty. Over the past 20 years, IMCAS has been able to promote this field by dedicating a scientific tribune within the world of medical aesthetics. This is a specialty that is in constant progress, and the objective of the Clinical Dermatology module is to assemble the essential developments that took place in the last year.

The unparalleled scientific content is the result of numerous partnerships with national and international academic societies, such as the national society of dermatology of Germany, Portugal, Morocco, Spain and Italy, as well as specialized groups like the Global Scar Society, International Dermoscopy Society, Dermatologic Therapy and Groupe Laser SFD. Every one of the collaborations demonstrate the richness and variances in dermatology.

Bolstered by the crucial inputs from the scientific societies and the prominent specialists leading the courses, the Clinical Dermatology sessions explore pathologies and skin diseases that require surgical and aesthetic interventions. Follow along the series to discover the latest developments made in the prevention, diagnosis and treatment methods.

*SESSIONS UNDER UNRESTRICTED EDUCATIONAL GRANTS OF
¹ BELLUS MEDICAL / CROWN, ² CANTABRIA LABS, ³ ALMIRALL, ⁴ AQ SKIN SOLUTIONS
